

Figure S1. Crop maps at 10 m resolution of ten EU countries for 2018.

Figure S2. Feature importance values for the top of 50 variables from random forest models in 2018 (a) and 2019 (b).

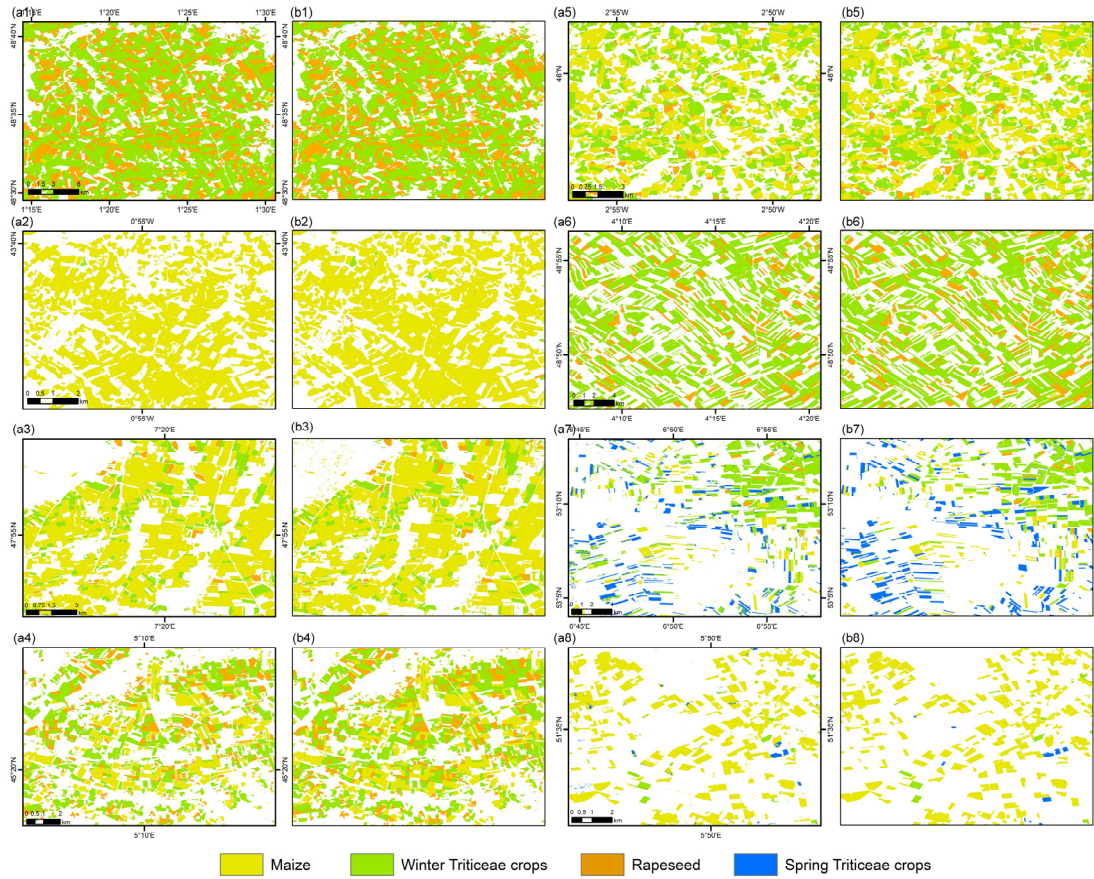

Figure S3. Visual comparison between our final crop maps (a1-a8) and existing reference datasets in 2018 for France (b1-b6) and Netherlands (b7-b8). For France, winter and spring Triticace crops was concluded as a single category (green color).

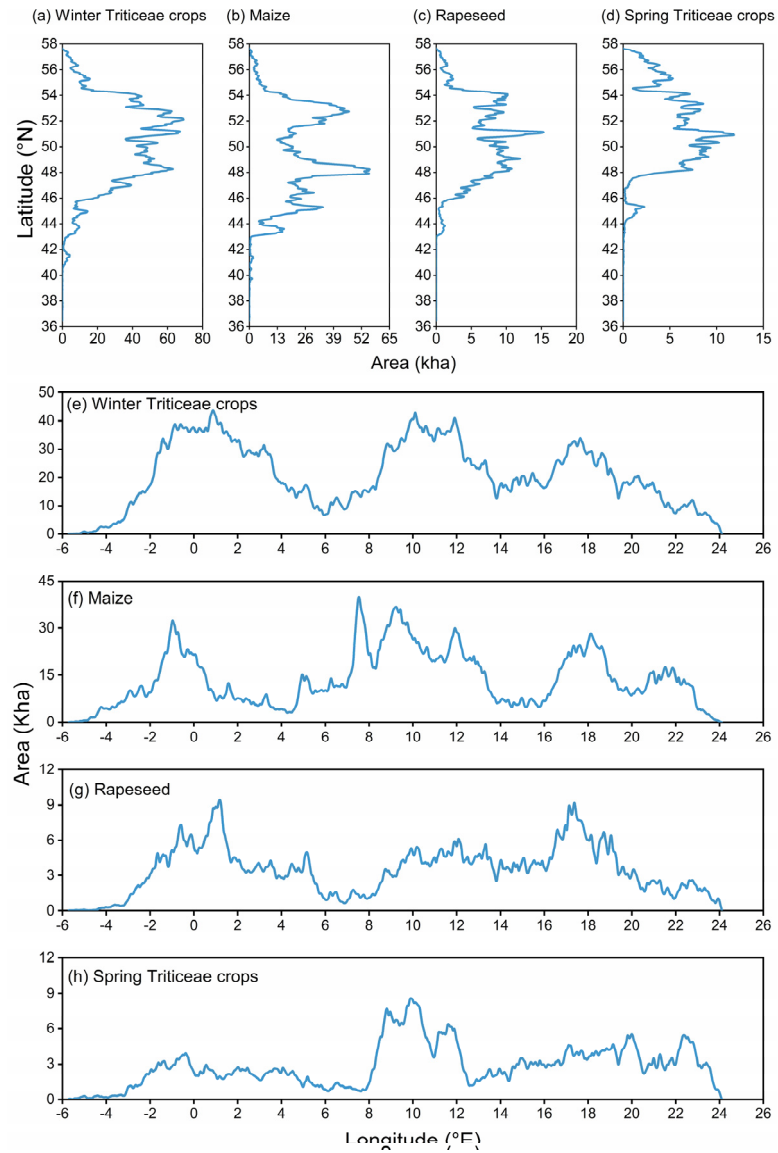

Figure S4. Distribution of crop area along latitude gradients (a)-(d) and longitude gradients (e-h).

Figure S5. Temporal profiles of NDVI for maize of different countries. Lines depicts the mean values. Shaded area depicts error bars with one positive/negative standard deviation of maize.

Table S1. The number of Sentinel-2 images processed in this study for each country in 2018 and 2019.

Country	2019	2018
England	5839	5859
France	14024	13904
Netherlands	2272	2299
Germany	12154	12098
Denmark	3014	3009
Poland	9368	9393
Czechia	3774	3738
Slovakia	2570	2578
Hungary	3399	3395
Italy	11248	11346

Table S2. Confusion matrix of the point-based validation for England in 2019.

	Others	Winter Triticeae crops	Maize	Rapeseed	Spring Triticeae crops	Total	UA	F1
