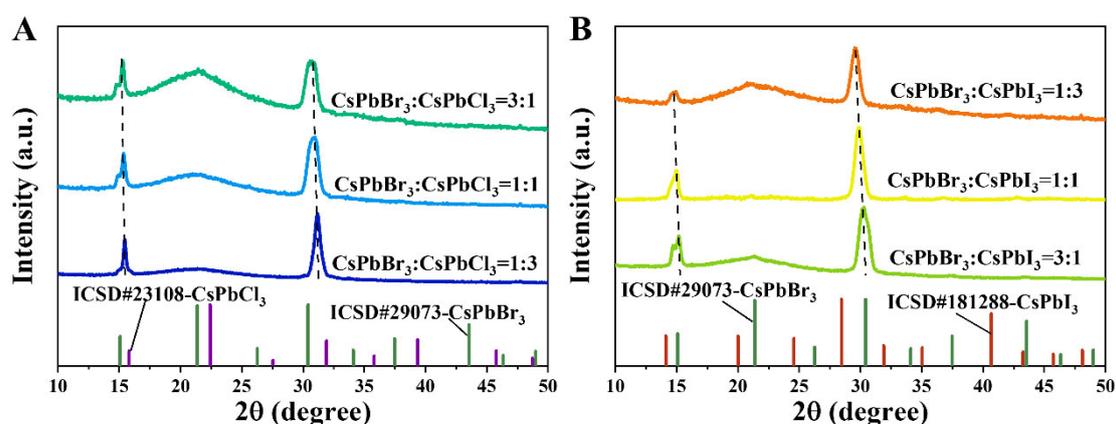

Figure S1. (A,B) XRD patterns of halide perovskite nanocrystals with different halogen composition.

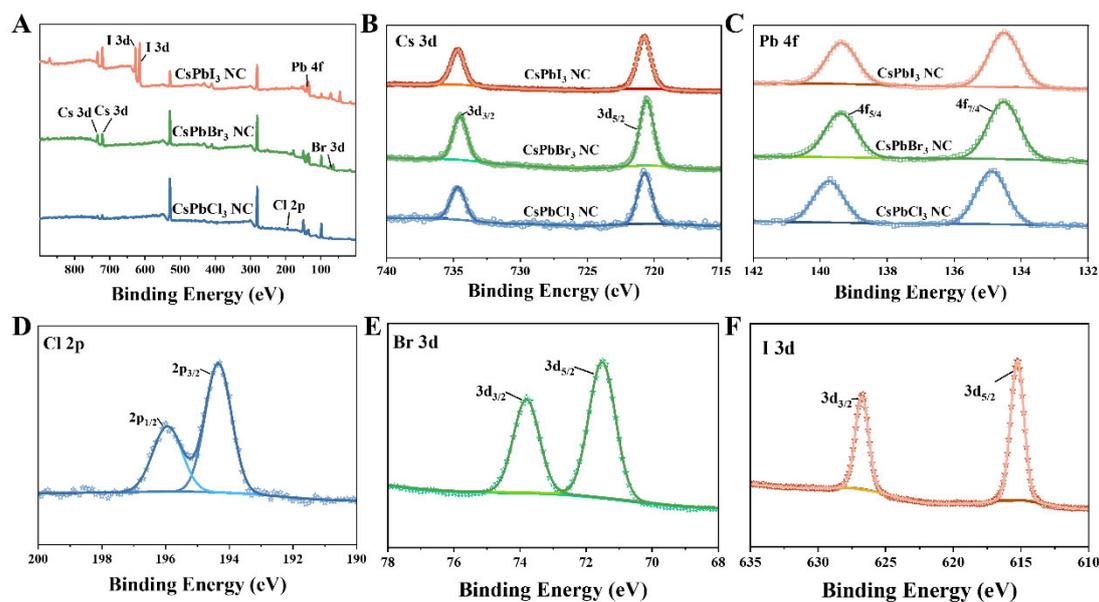

Figure S2. XPS spectra of CsPbX₃ (X = Cl, Br, I) nanocrystals. (A) Full spectra, (B) Cs 3d, (C) Pb 4f, (D) Cl 2p, (E) Br 3d, (F) I 3d.

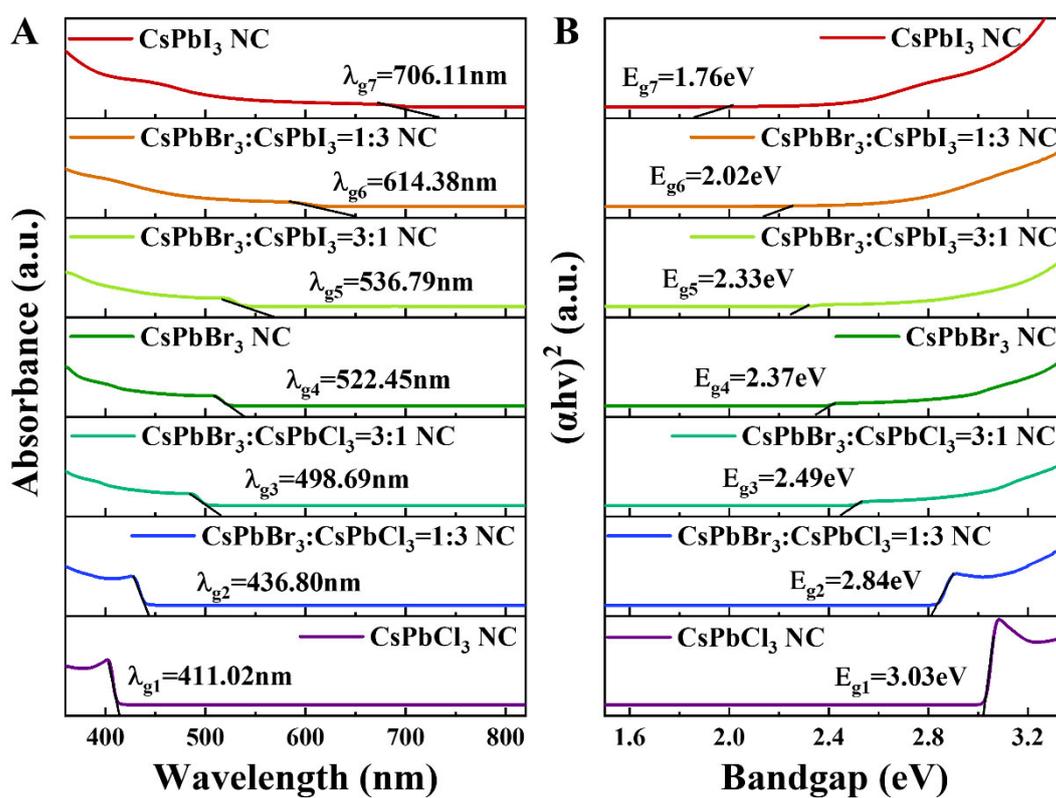

Figure S3. (A) UV-vis absorption spectra and (B) Absorbance versus photon energy and the determined bandgap E_g of halide perovskite nanocrystals with different halogen components.

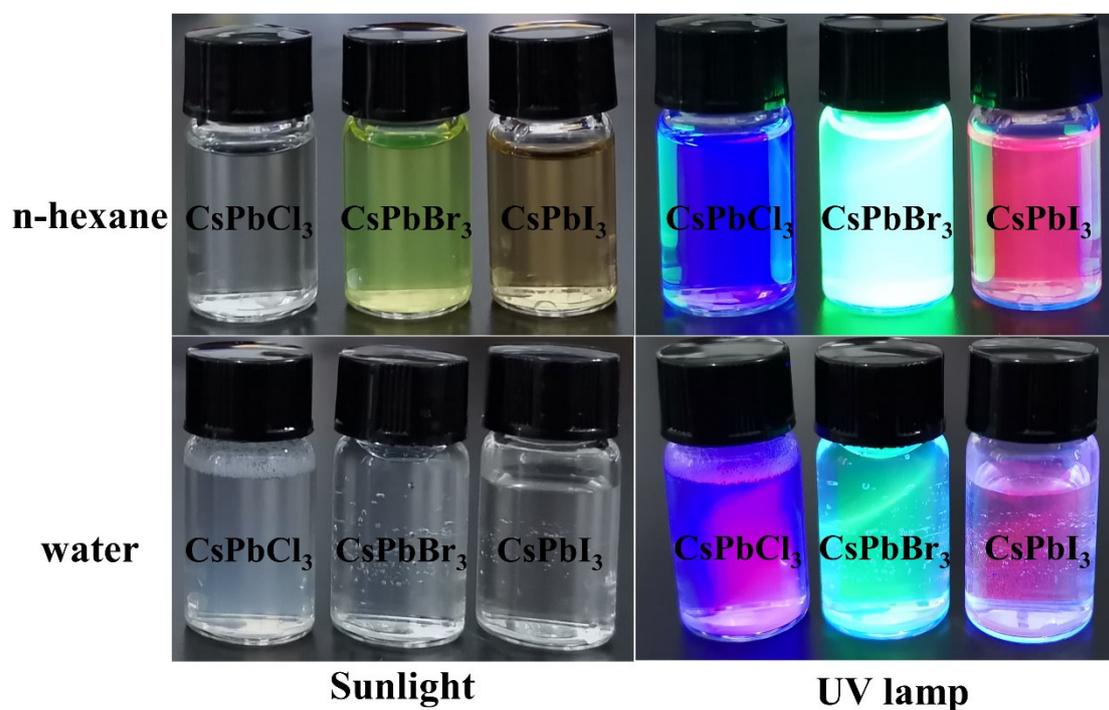

Figure S4. Images of CsPbX₃ (X = Cl, Br, I) nanocrystals in different solvent (water and n-hexane) under sunlight and 365 nm UV lamp, respectively.

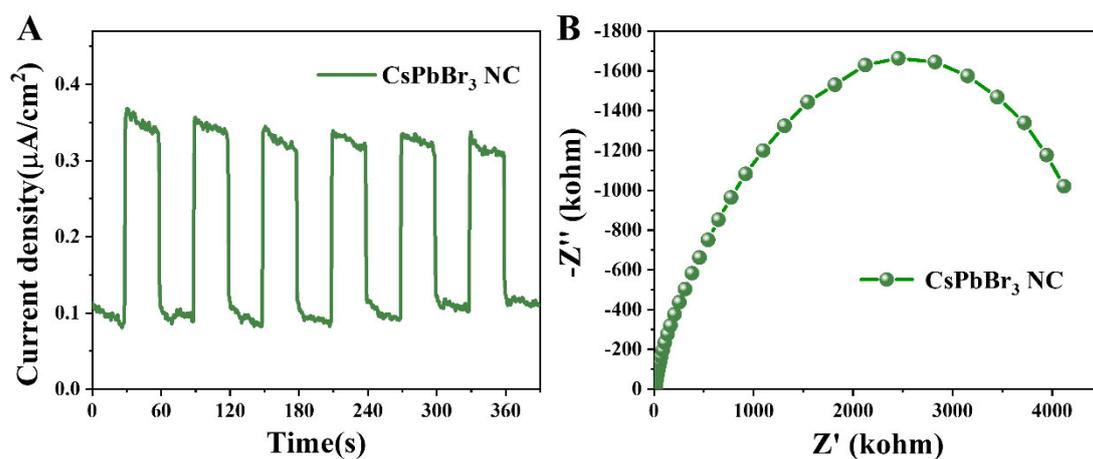

Figure S5. (A) Transient photocurrent responses to on-off illumination of CsPbBr₃ nanocrystals electrodes at -0.1 V versus NHE in neutral water (0.5 M Na₂SO₄). (B) Electrochemical impedance spectra (Nyquist plot) of CsPbBr₃ nanocrystals.
