

SUPPLEMENTARY MATERIALS

This material presents the 15 large-scale maps used to guide respondents during interviews on the drivers of the three invasion patterns of *Prosopis*. Each map represents a single temporal pattern(trajjectory) of invasion within a single hotspot area.

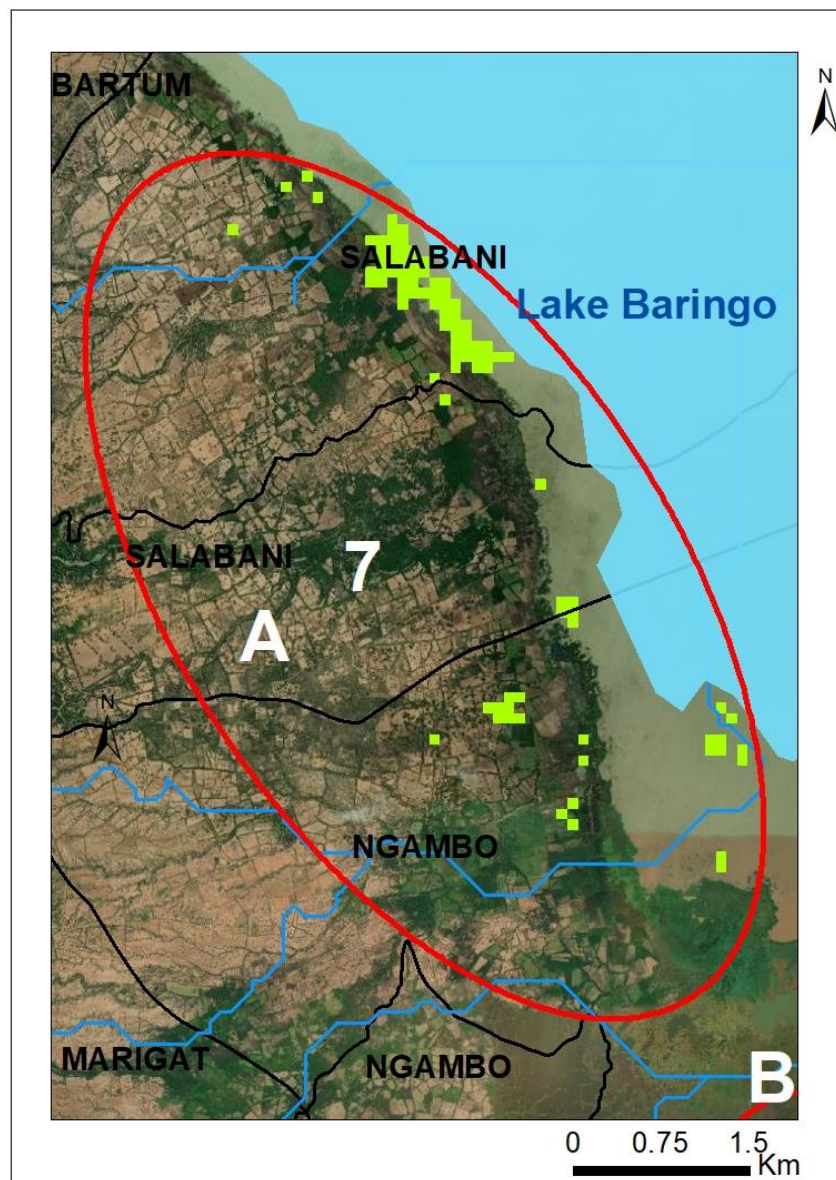

Figure S1: Cleared areas in hotspot A

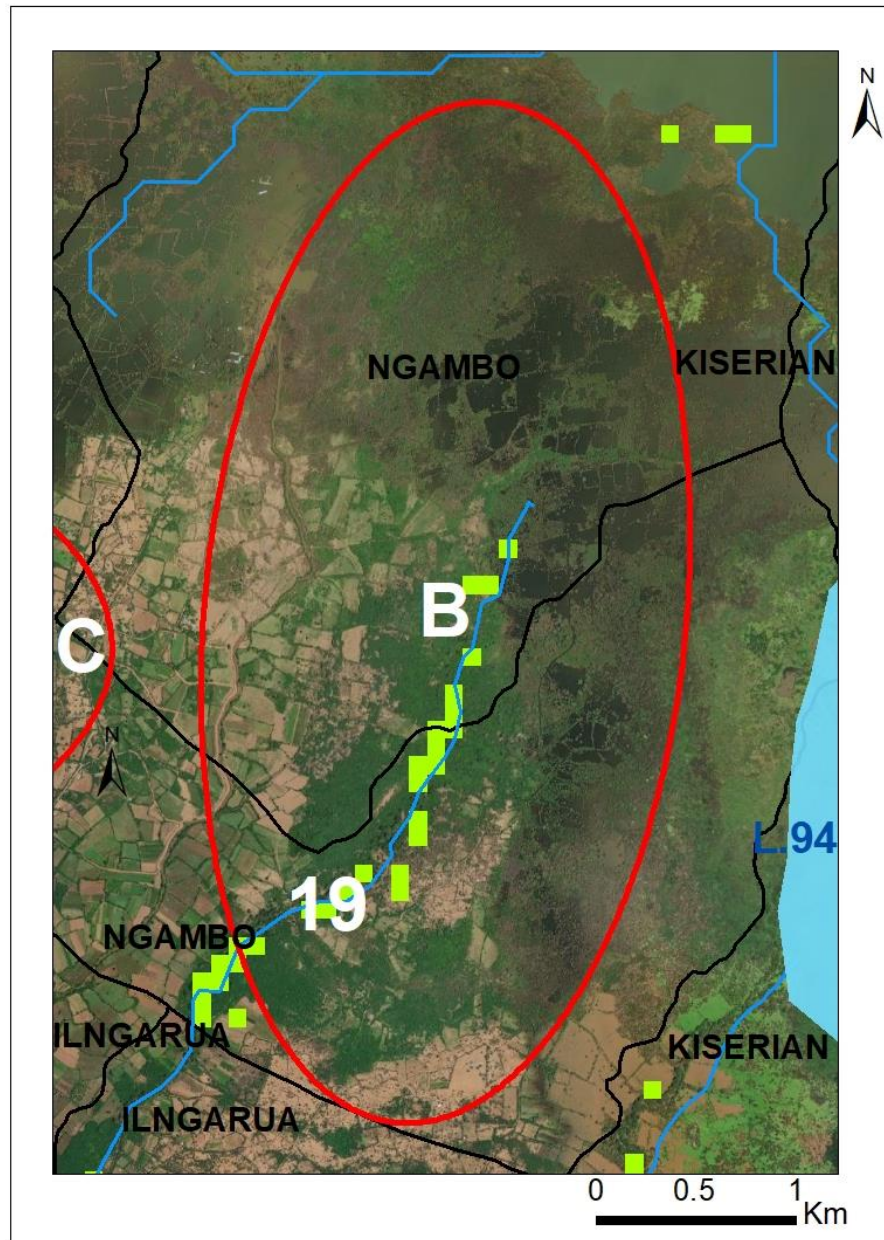

Figure S2: Cleared areas in hotspot B

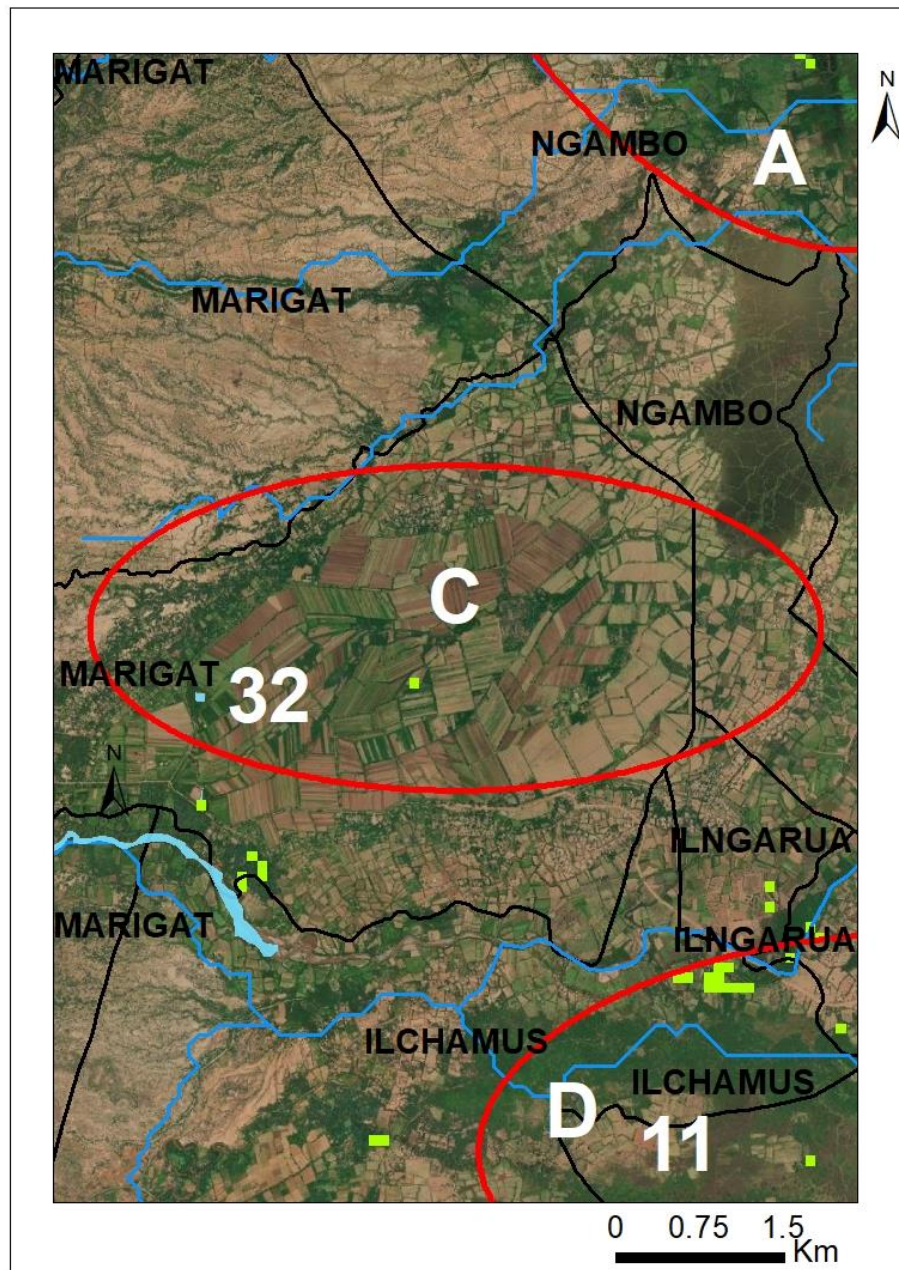

Figure S3: Cleared areas in hotspot C

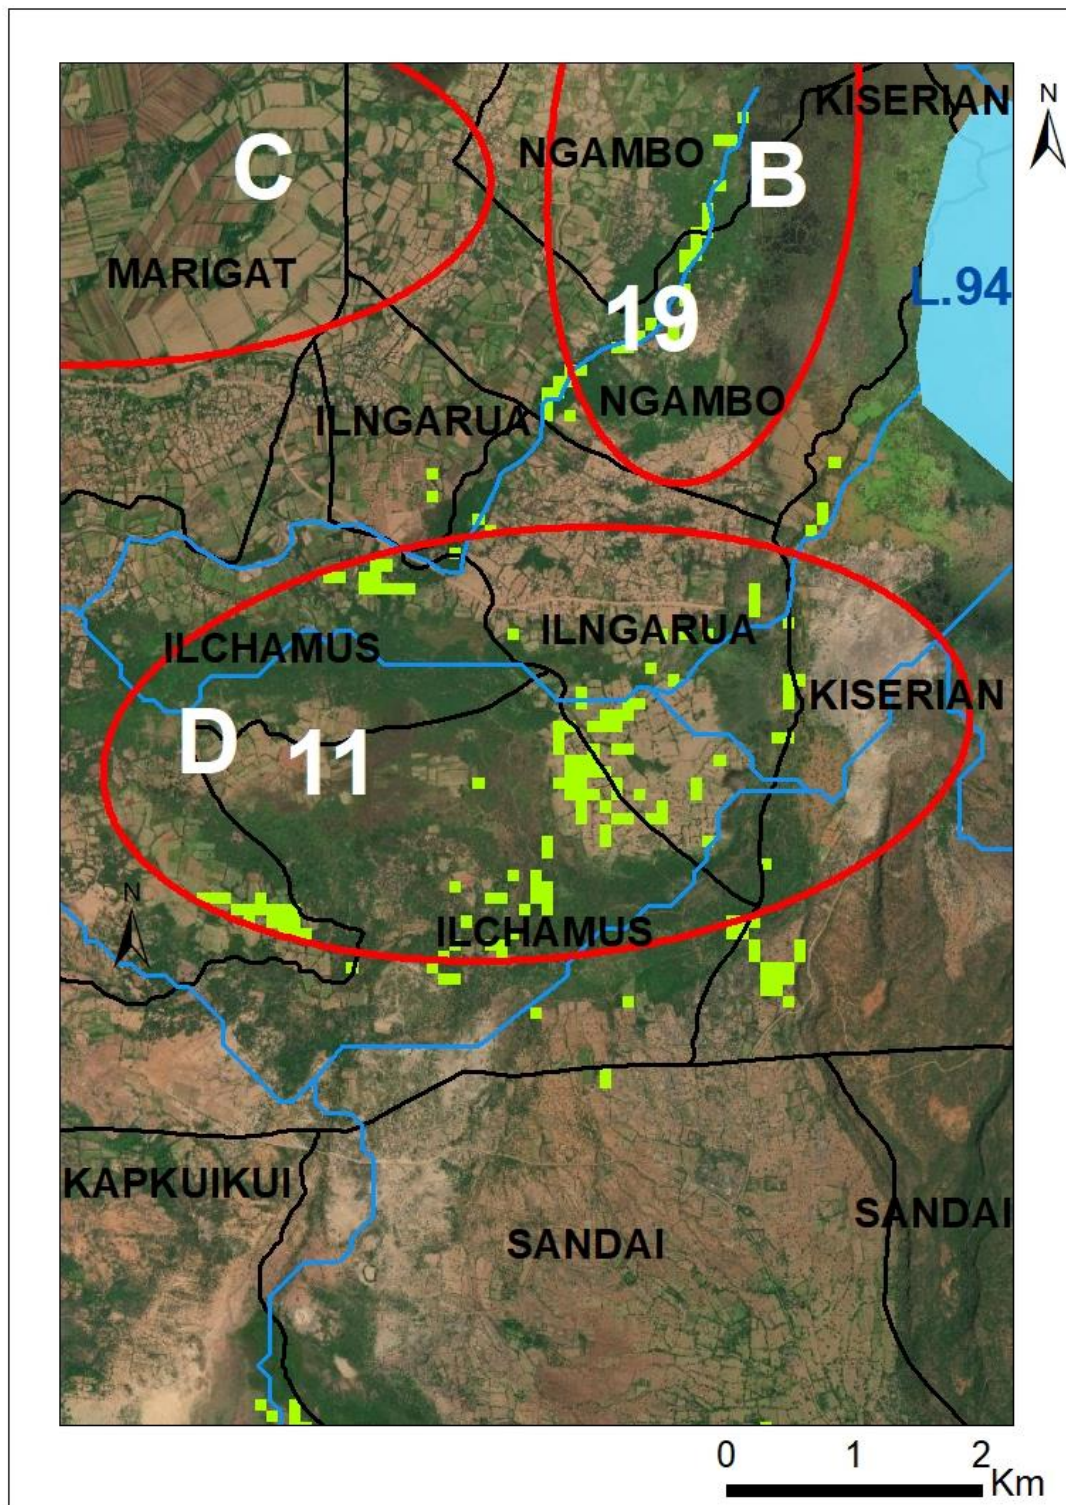

Figure S4: Cleared areas in hotspot D

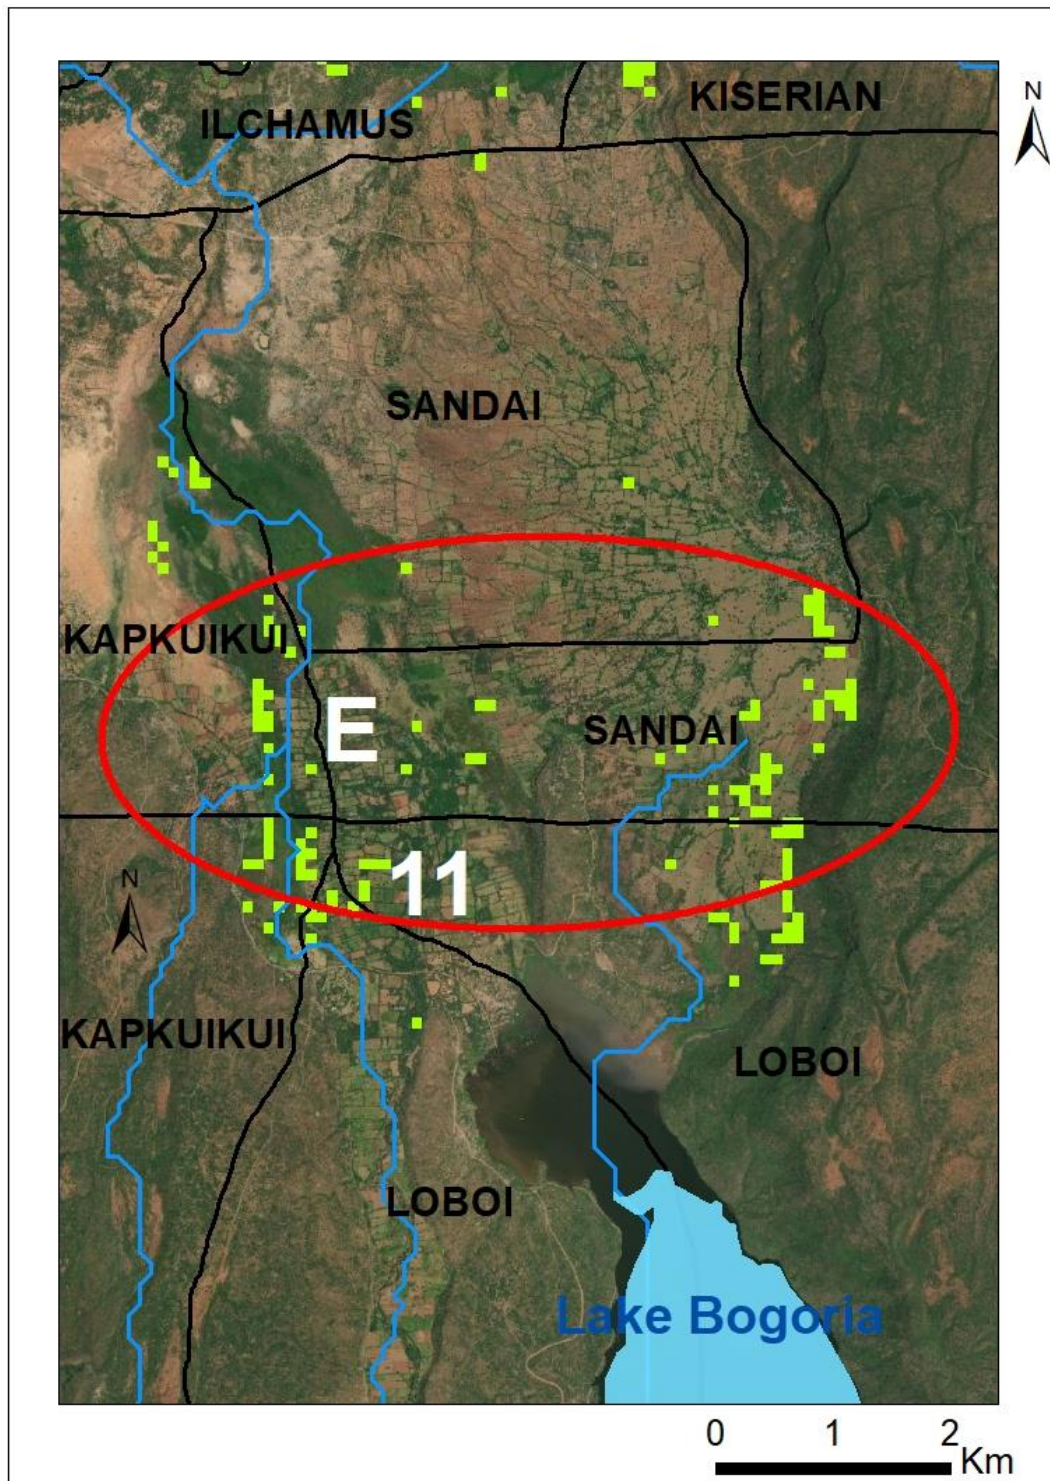

Figure S5: Cleared areas in hotspot E

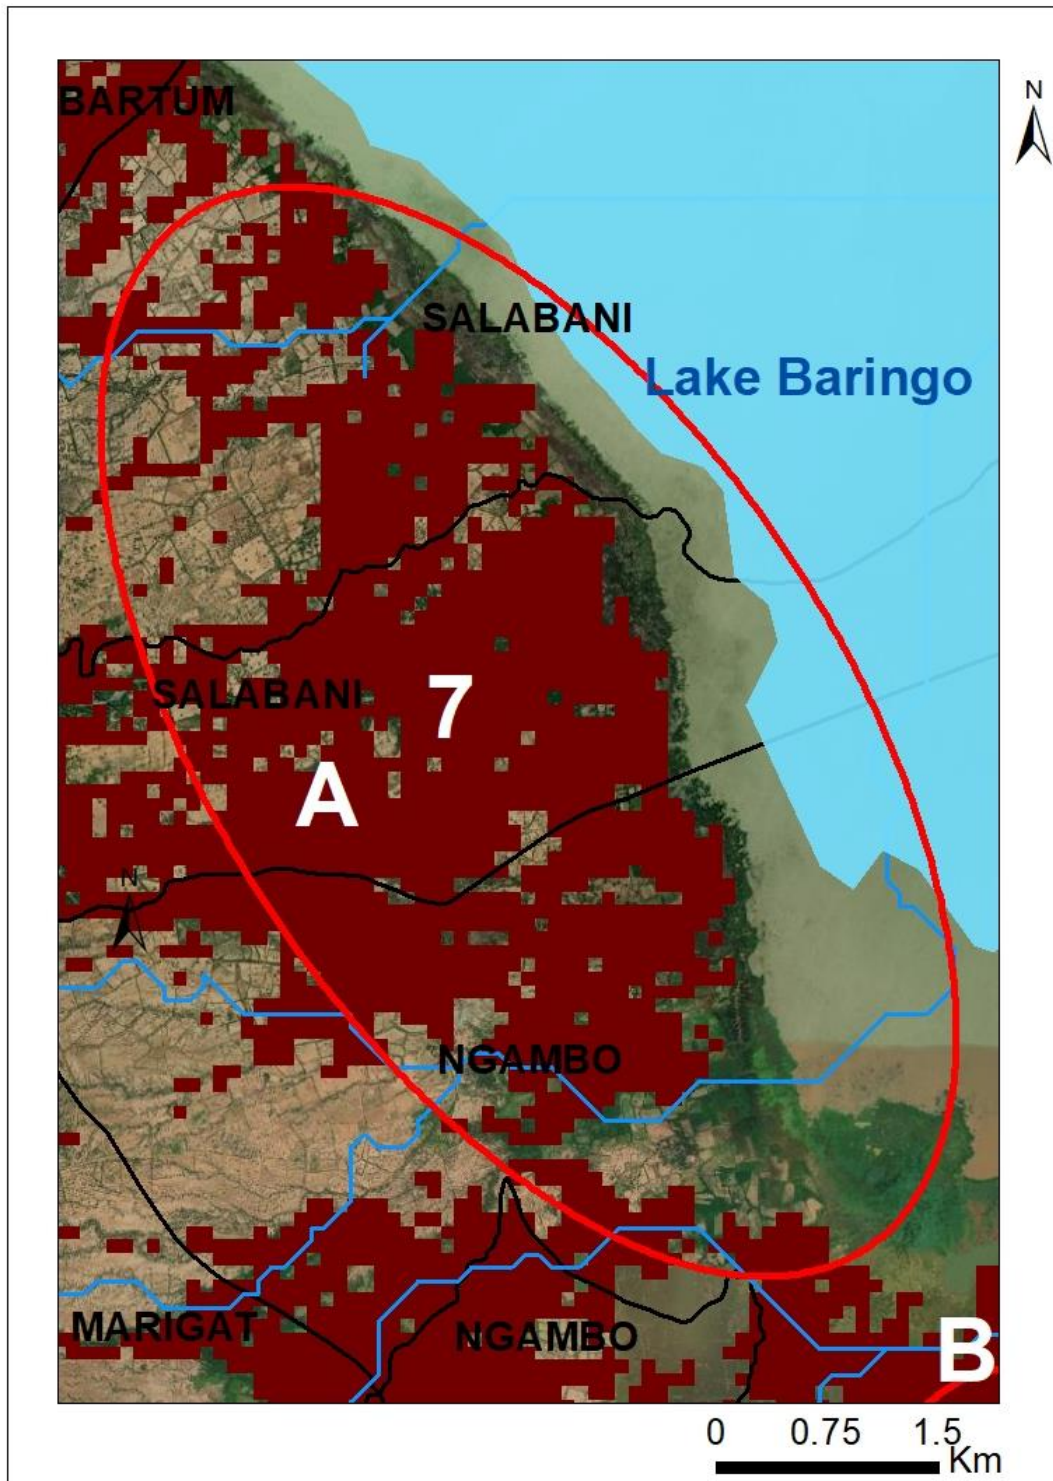

Figure S6: Areas in hotspot A that have never been cleared since their initial invasion

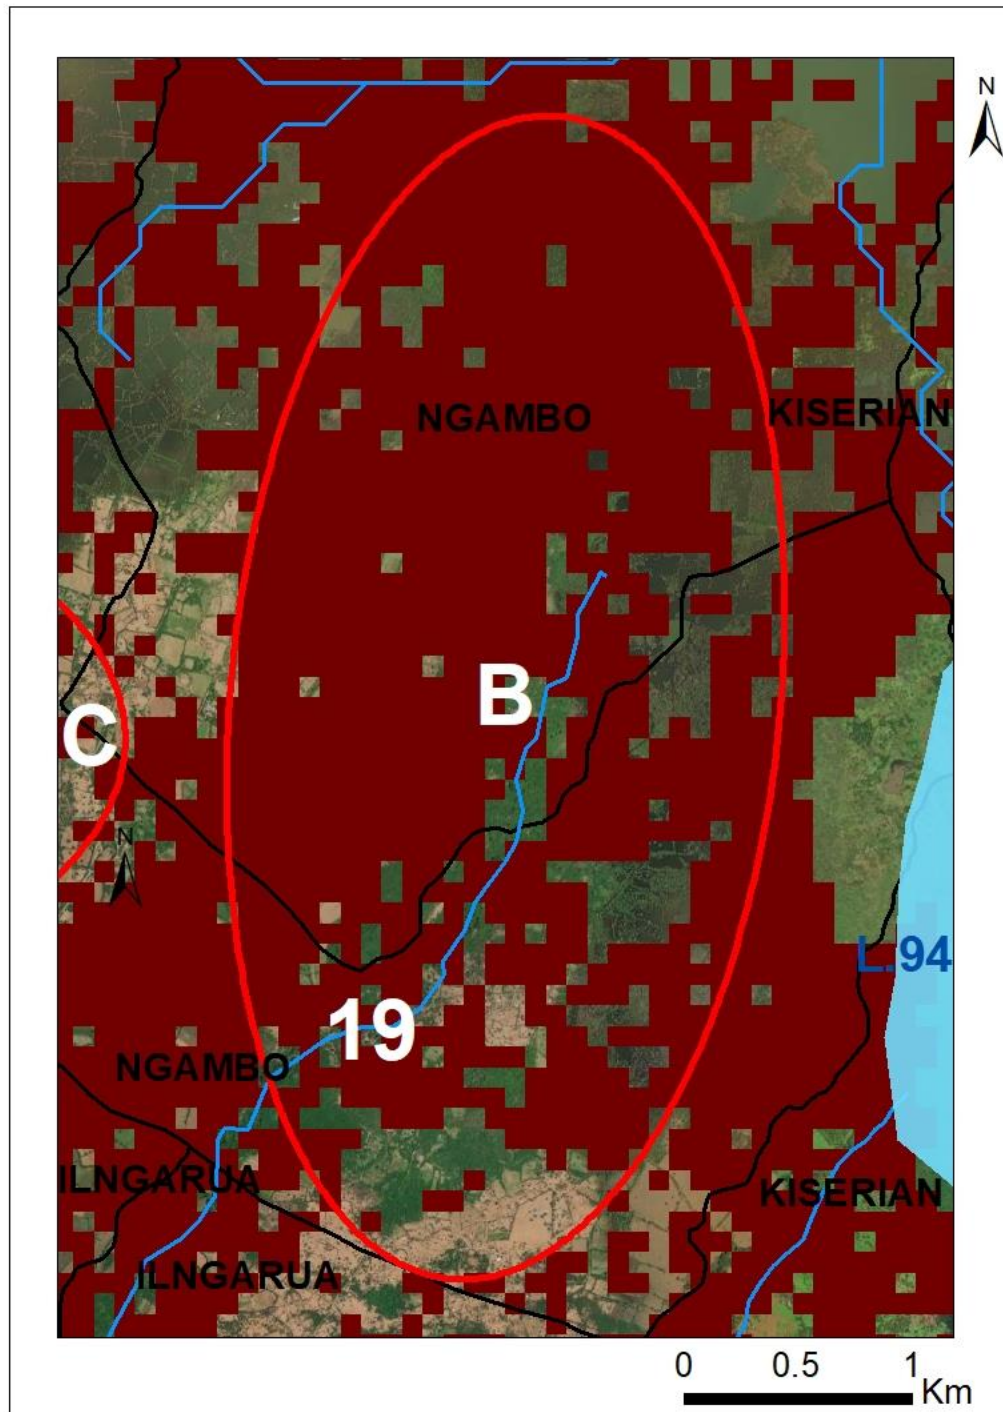

Figure S7: Areas in hotspot B that have never been cleared since their initial invasion

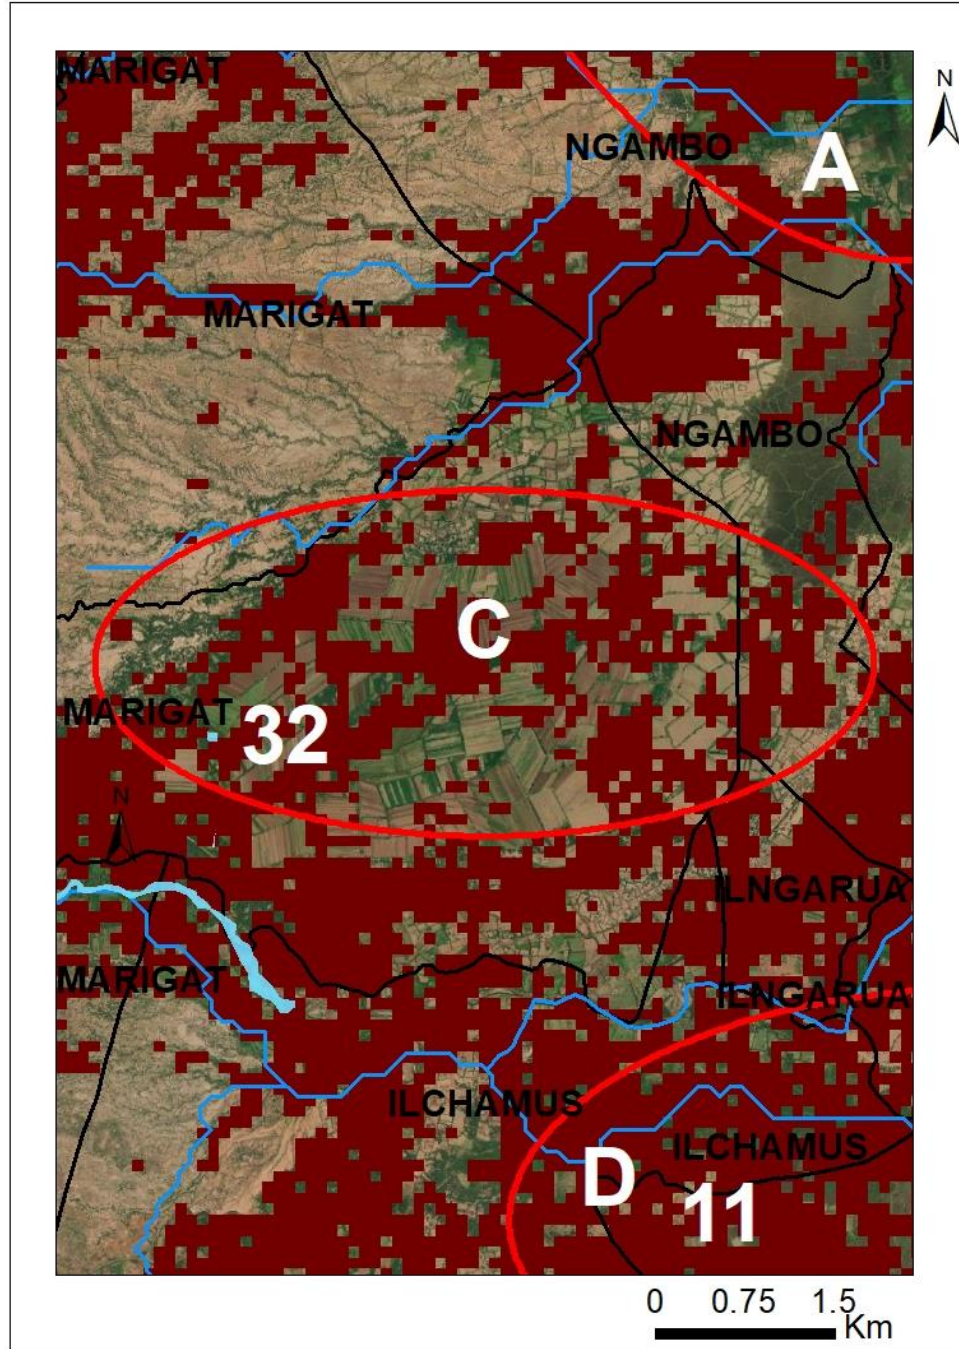

Figure S8: Areas in hotspot C that have never been cleared since their initial invasion

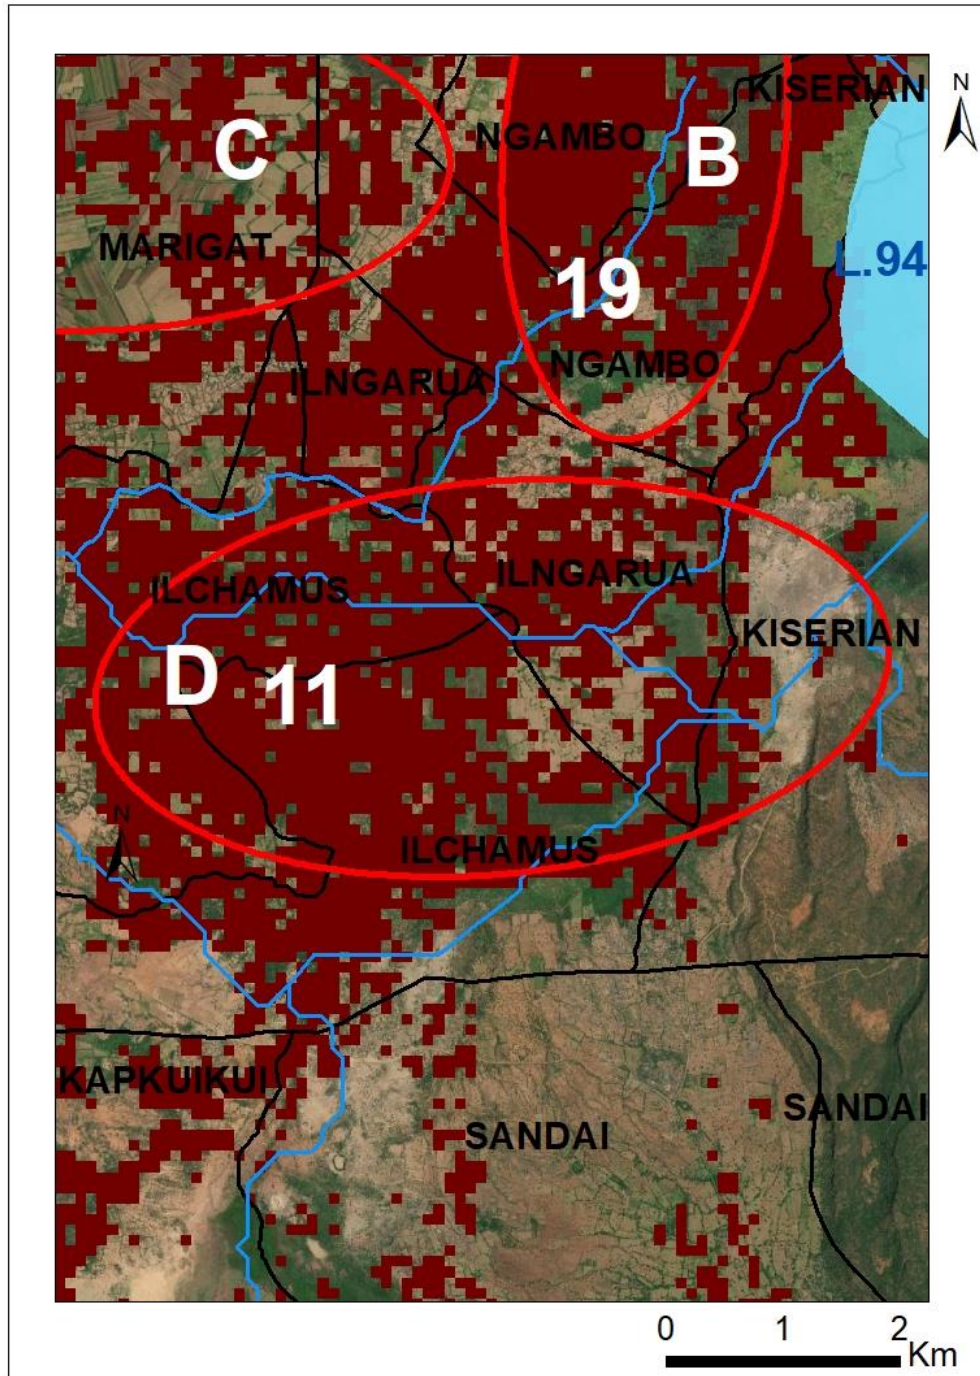

Figure S9: Areas in hotspot D that have never been cleared since their initial invasion

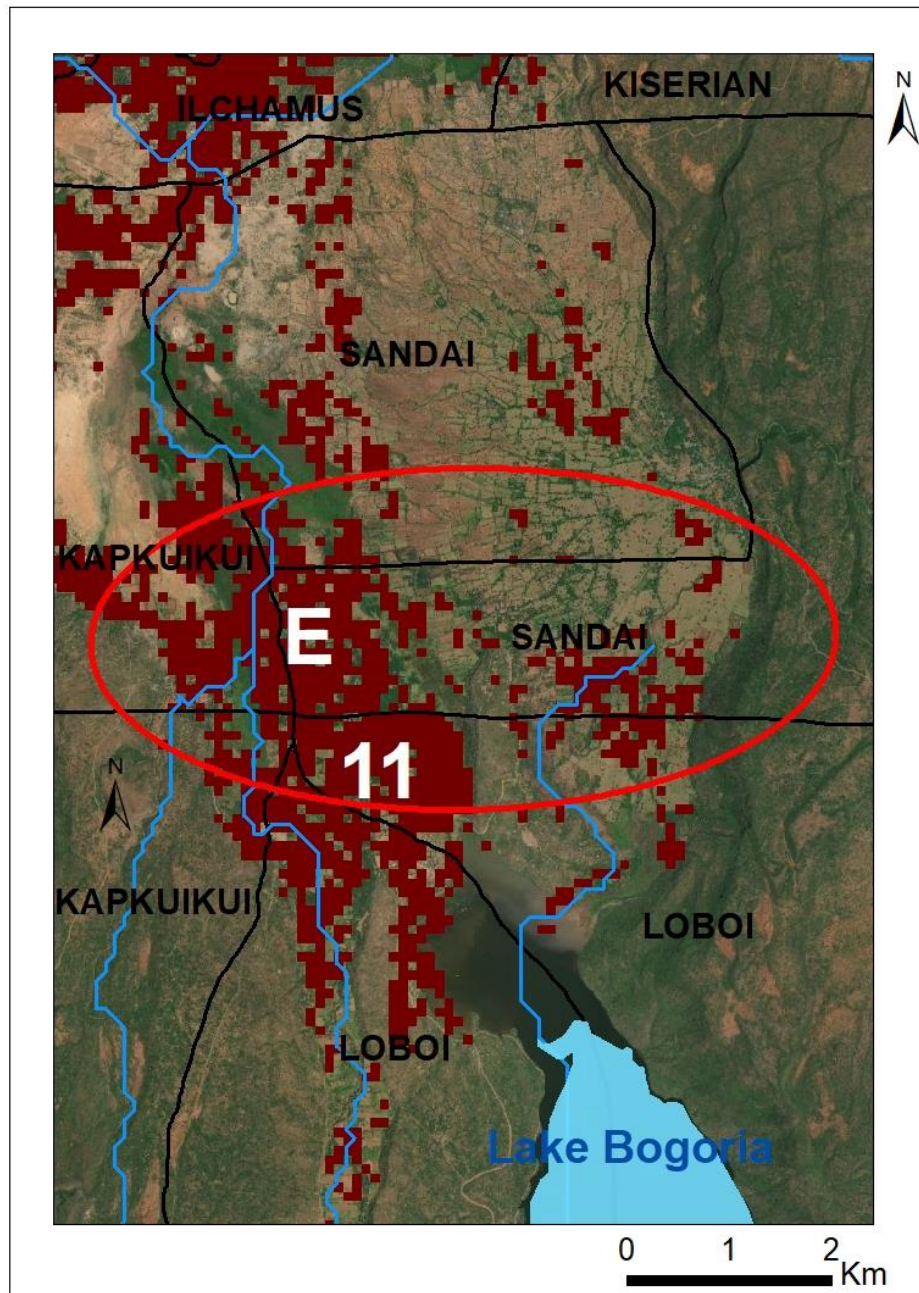

Figure S10: Areas in hotspot E that have never been cleared since their initial invasion

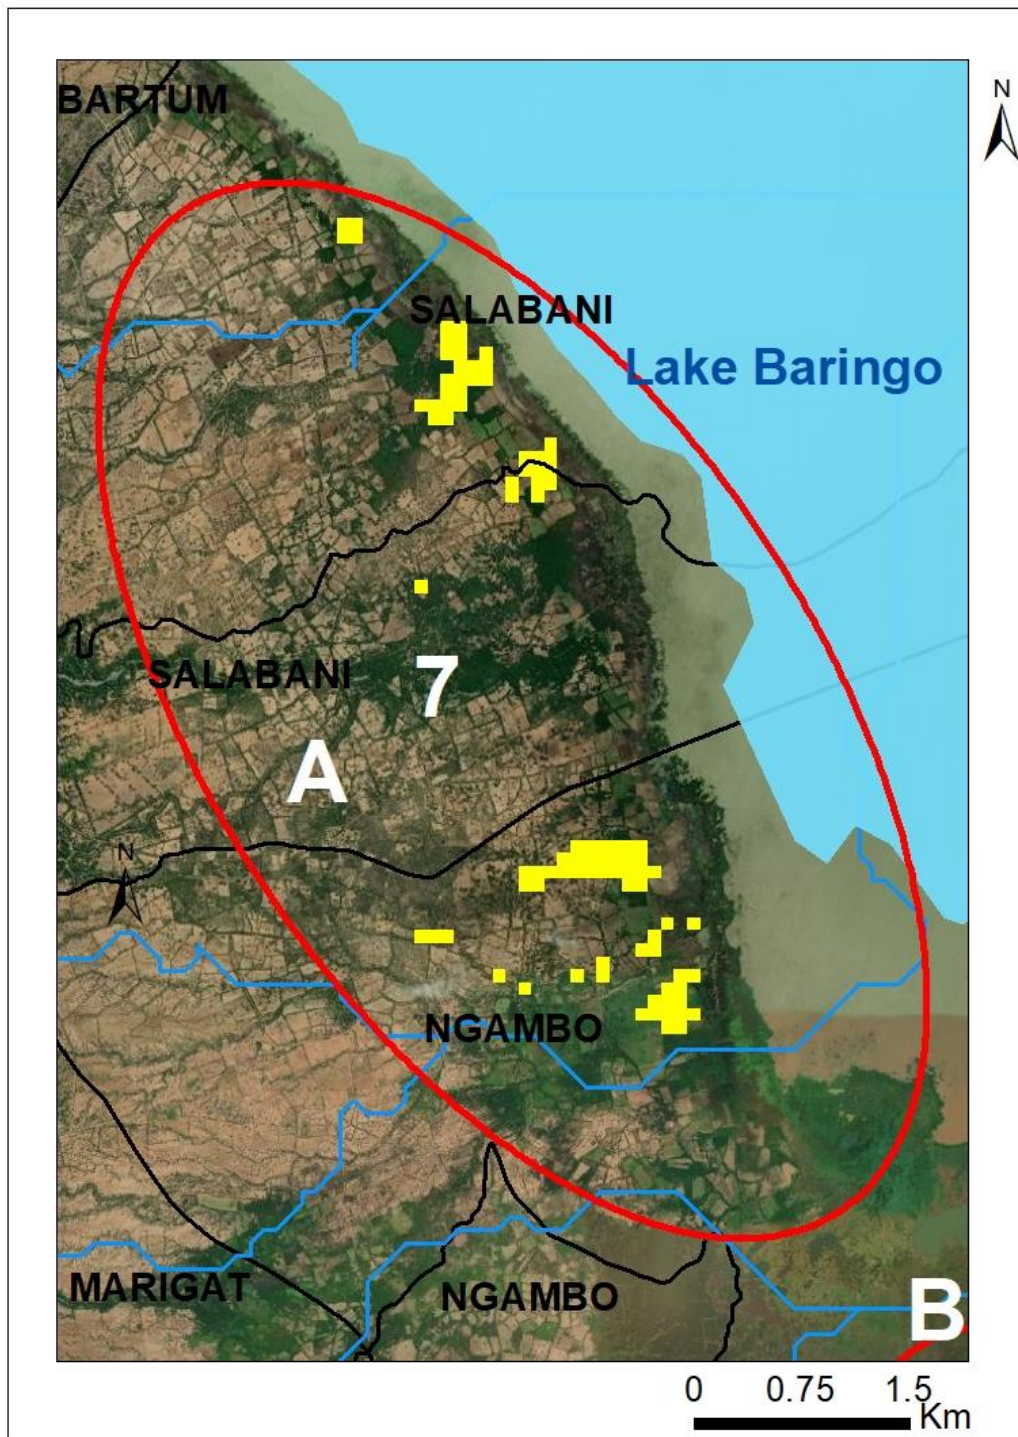

Figure S11: Areas in hotspot A that were cleared but re-invaded

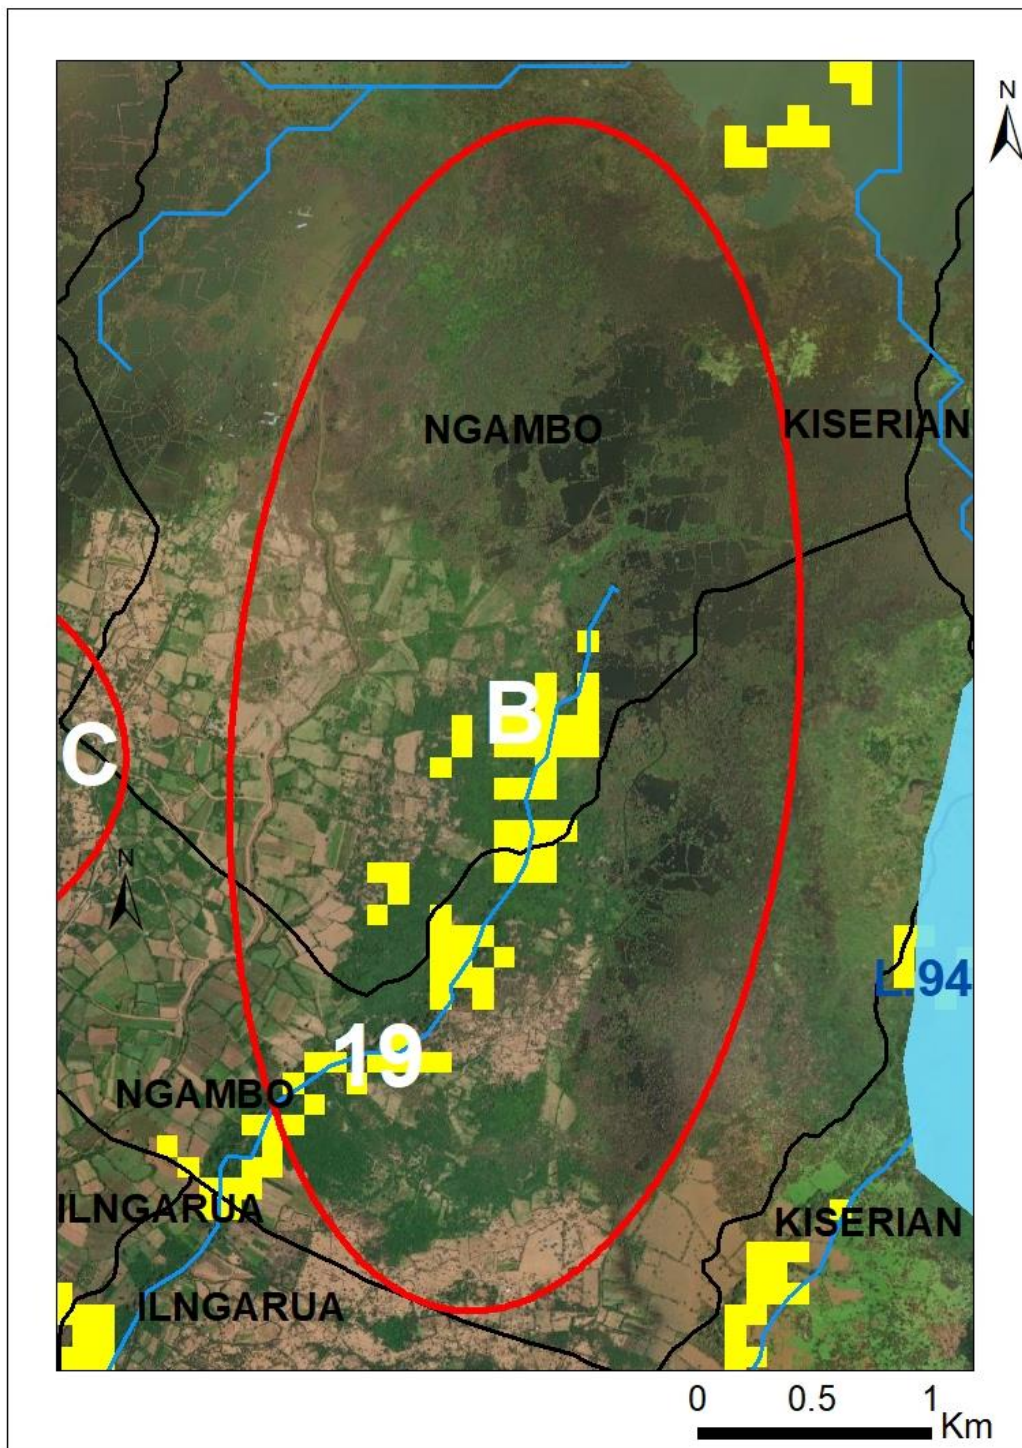

Figure S12: Areas in hotspot B that were cleared but re-invaded

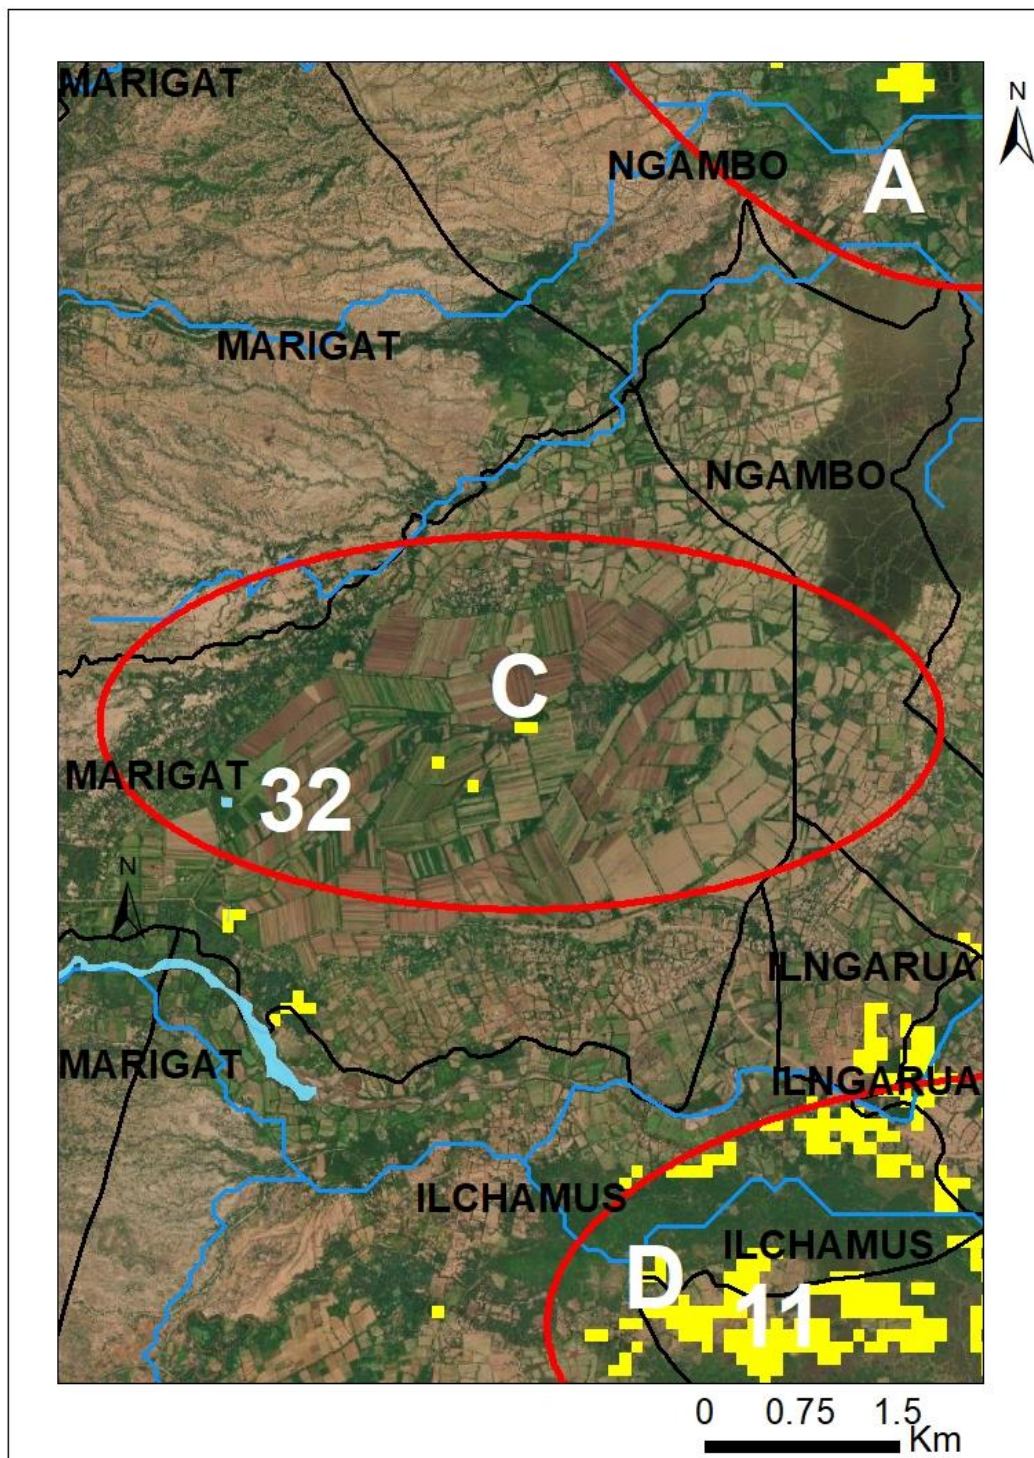

Figure S13: Areas in hotspot C that were cleared but re-invaded

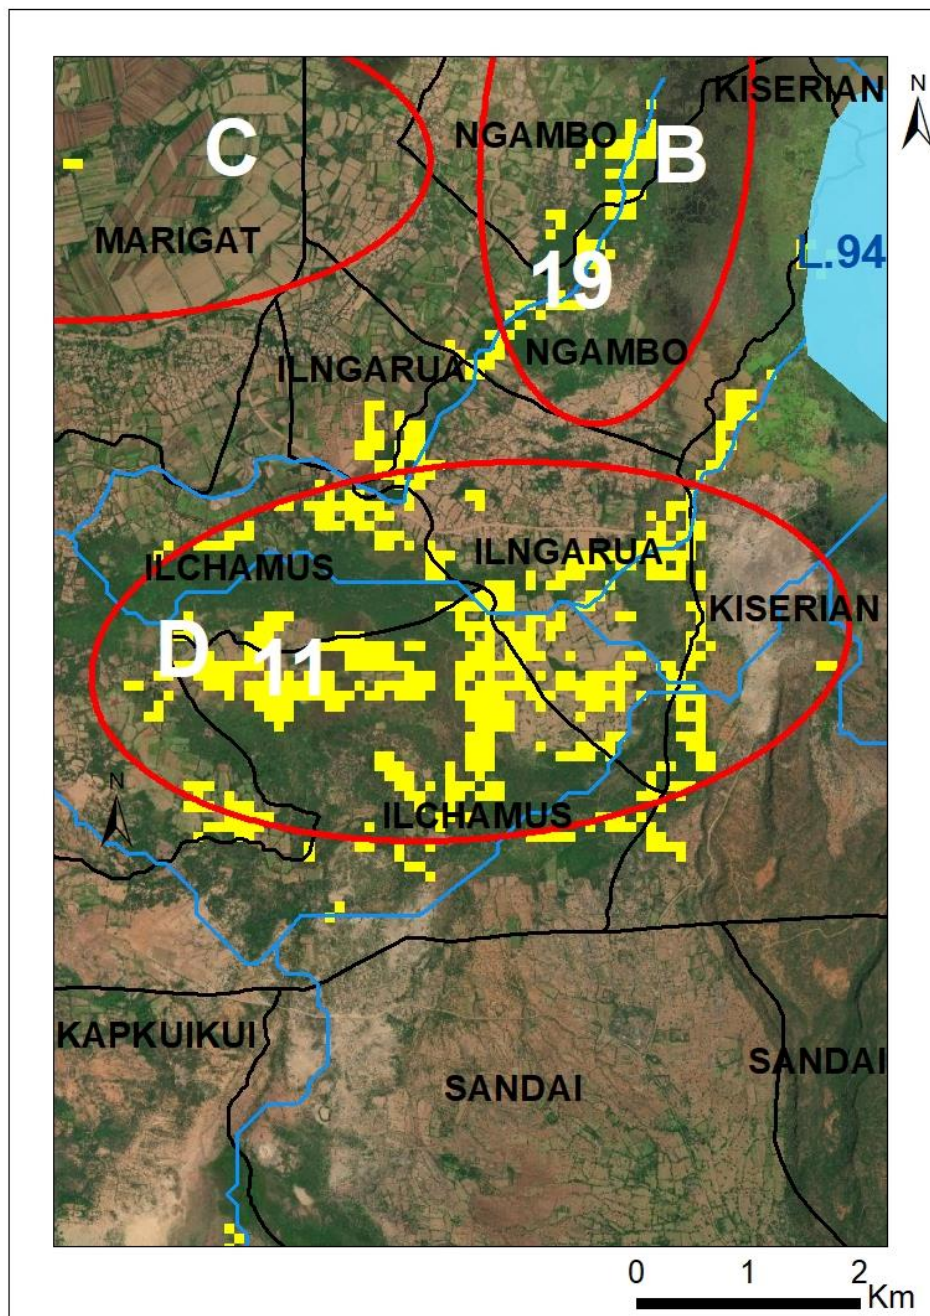

Figure S14: Areas in hotspot D that were cleared but re-invaded

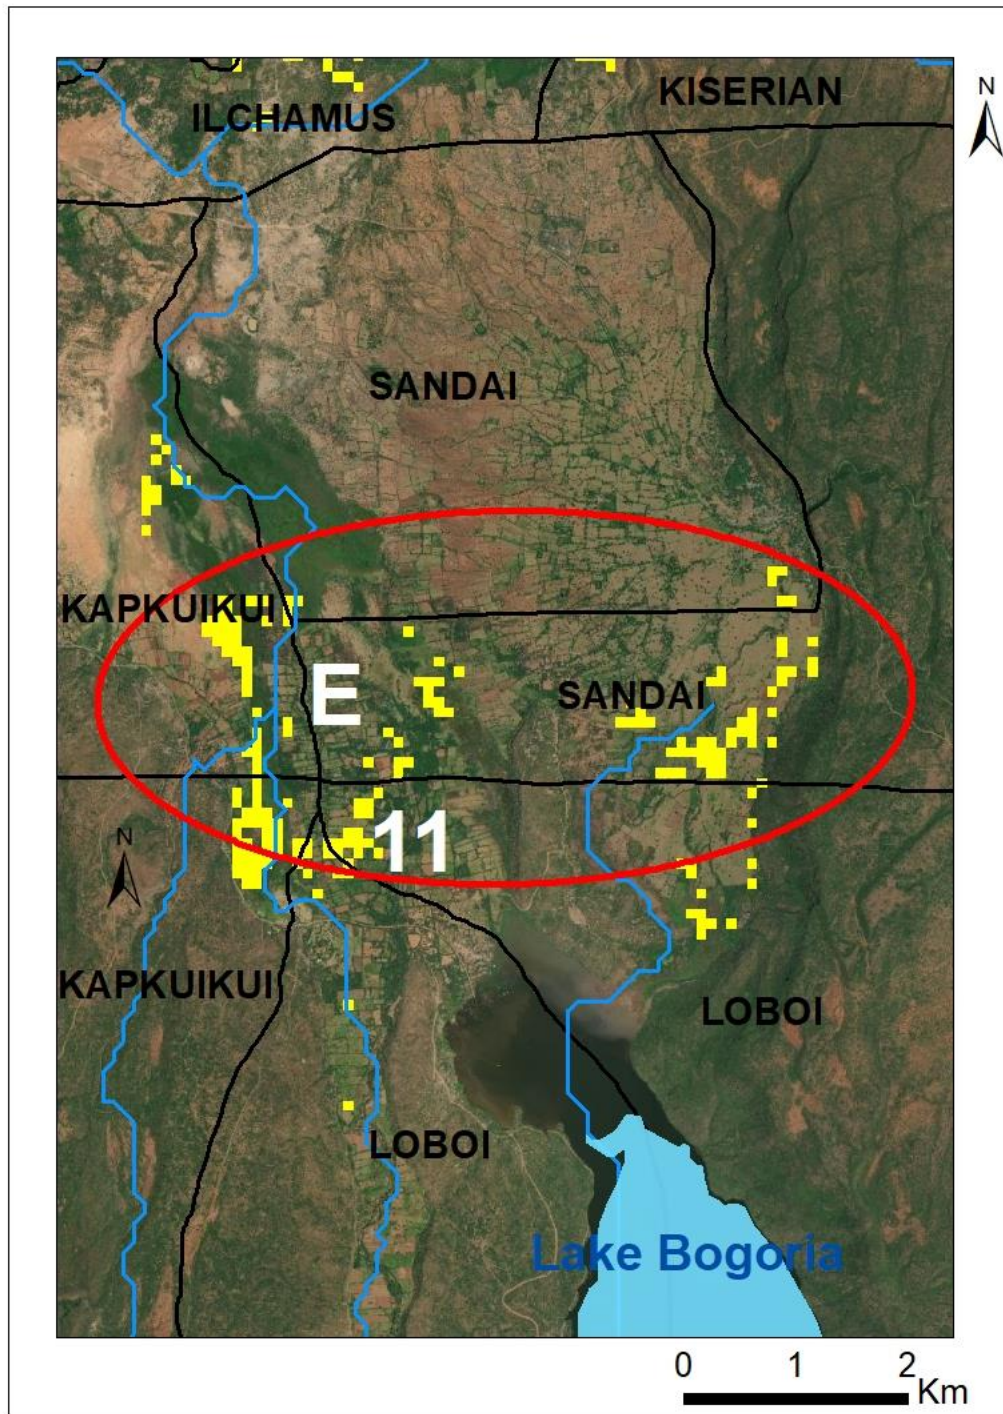

Figure S15: Areas in hotspot E that were cleared but re-invaded
