

Questionnaire addressed to pregnant women

We invite you to take 2 minutes of your time to complete the bellow questionnaire.

Why to complete?

Accurate medical information enables childbearing ages women to take an informed decision regarding self protection against infectious diseases during pregnancy and for the future infant during the first couple months until she/he will be immunized according the National Vaccination Program.

Where will be used collected data?

The questionnaire is intended for a doctoral research study. The results will be published in a scientific medical journal. Participants will have free access to the results of the study by request.

Data protection.

The data collected in this questionnaire remain anonymous. Completion of the questionnaire is not mandatory. Withdrawal from the study at any time without any explanation is a personal option. Participation in the medical education program is free of charge. Completing the questionnaire represents your agreement to participate. The questionnaire completion signified your agreement to enter into the study. The survey complied with the Romanian legislation (Law 190/2018) and GDPR – the General Data Protection Regulation 679/2016. The study was approved by the Ethics Committee of the Academy of Medical Sciences, National Bioethics Commission of Medicines and Medical Devices, under the number 1SNi/21.02.2019.

Thank you!

1. Age (years)
2. Residence (urban/rural)
3. Educational level (primary, secondary, high-school, university, post-university studies)
4. Gestational age (weeks)
