Message from the Guest Editors

This Special Issue aims to present and disseminate the most recent advances related to the numerical modeling of efficient energy management using Fuzzy Decision Support Systems (FDSS). Topics of interest for publication include but are not limited to the development of FDSS to energy efficiency and energy management in construction, mobility, industrial processes, materials, manufacturing, environmental processes that include water, air and soil resources, exploration, exploitation, conversion, supply of energy resources, etc.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
