### **Message from the Guest Editors**

The 15th International Conference on Environmental Science and Technology (CEST2017) was held in the island of Rhodes, Greece, 31 August to 2 September, 2017. CEST2017 is one of the leading worldwide conferences on Environmental Science and Technology. The main aim of the conference is the presentation of state-of-the art research and innovative technologies to address local and international critical environmental issues. A wide range of topics are presented while addressing the new opportunities for the emerging science-policy interface promoting the dialogue between the scientific and policy-making communities. This Special Issue will select works from Sections ecology and ecosystem management, energy technologies and sustainability, smart cities for a sustainable development, use of microwave communication links as near-ground weather sensors, water and wastewater treatment.

## Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.
