Message from the Collection Editor

Dear Colleagues,

This Topical Collection, “Feature Papers in Neurogenetics and Neurogenomics”, aims to collect high-quality research articles, review articles, and communications on advances in the research area of Neurogenetics and Neurogenomics. Since the aim of this issue is to illustrate, through selected works, frontier research in the field of neurogenetics and neurogenomics, we encourage Editorial Board Members of the Section “Neurogenetics and Neurogenomics” to contribute feature papers reflecting the latest progress in their research field, or to invite relevant senior experts and colleagues to make contributions to this Topical Collection. We aim to represent our Section as an attractive open-access publishing platform for neurogenetics and neurogenomics research.

Prof. Dr. Diego Centonze

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
