Message from the Guest Editors

The goal of this Special Issue is to showcase theoretical and practical contributions regarding sustainable production and sustainable operations management from a variety of industries, especially in the wake of an accelerating transformation towards a carbon-neutral economy and an advanced digital society.

The focus of this anthology is on the manufacturing industry, which is undergoing complex transformations in line with the Industry 5.0 approach and has to answer to difficult challenges related not only to sustainability and digitalization but also to supply chain disruptions, resource depletion, and engineering personnel shortages.

The editors encourage the submission of interdisciplinary and multidisciplinary approaches that can bring new insights into the field, stimulating and reinforcing competitiveness in harmony with the natural environment and the social landscape, which need protection and nurturing.
