Deadline for manuscript
submissions:

28 August 2024

Message from the Guest Editors

Currently, the energies used by human beings are mainly petroleum, natural gas, coal and other fossil fuels. These fuels are non-renewable, and their extensive use has also brought serious environmental problems.

Ocean renewable energy (ORE) is clean, pollution-free and abundant. It plays a key role to support the sustainability of our economy and society. Although it gradually becomes a common view to exploit ORE, the technical challenges brought about by reducing the overall cost while utilizing ORE are still a major concern. In order to exchange new ideas in developing and utilizing ORE, this Special Issue in *Sustainability* is proposed.

Manuscripts covering the following topics are warmly welcome in this Special Issue:

- Innovative approach to assess the potentials of ORE, and the discussion on the possibility of exploitation;
- Innovative design of devices for the exploitation of ORE;
- Advanced technologies for developing and utilizing new marine energy sources, such as wind energy, wave energy and tidal energy, etc.;
- Reviews for the current status and future developments for the utilization of ORE;
- Other studies concerning the utilization of ORE.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
