

Polyinosinic:polycytidylic acid and murine cytomegalovirus strongly modulate expression of murine IL-10 and IL-21 in white adipose tissue.

Pablo Garcia-Valtanen , Ruth Marian Guzman-Genuino , John D. Hayball and Kerrilyn R. Diener.

Supplementary material

Figure S1. Serum cytokine expression in C57Bl/6J (black bars) and TLR3 KO (white bars) mice 12 hours after intraperitoneal administration of 20 mg/kg of poly(I:C). Bars represent average values from two independent experiments (n=7). Error bars denote SEM. No statistically significant differences were found according to Sidak's multiple comparisons test.
