Received: 22 March 2016; Accepted: 22 March 2016; Published: 24 March 2016

The *Viruses* Editorial Office wishes to notify its readers of a correction in [1]. The third paragraph of Section 2.5 should be replaced with the following:

“To detect autophagic flux, BSR cells were transfected with pEGFP-LC3, infected with BTV or left untreated as described above for the indicated time. Then the cells were stained with 50 nM LysoTracker Red DND-99 (acidic compartments marker) (C1046, Beyotime) for 30 min. After the cells were washed three times with PBS, they were processed for analysis using a confocal microscope”.

The manuscript will be updated and the original will remain available on the article webpage. The authors would like to apologize for any inconvenience caused.
