

**Supplementary figure 1.** Representative histograms of the percentage of lymphocytes-IL-2<sup>+</sup> by flow cytometry in untreated cultures (NC), stimulated with PMA (PC), stimulated with PMA in the last 4 hours in a total of 8 hours of DMSO treatment at 1; 2.5; 5. or 10% v/v or 5 µg/mL of cyclosporine (CsA).

**Supplementary figure 2.** Representative histograms of the percentage of lymphocytes-IFN- $\gamma$  by flow cytometry in untreated cultures (NC), stimulated with PMA (PC), stimulated with PMA in the last 4 hours in a total of 8 hours of DMSO treatment at 1; 2.5; 5. or 10% v/v or 5  $\mu$ g/mL of cyclosporine (CsA).

**Supplementary figure 3.** Representative histograms of the percentage of lymphocytes-TNF- $\alpha^+$  by flow cytometry in untreated cultures (NC), stimulated with PMA (PC), stimulated with PMA in the last 4 hours in a total of 8 hours of DMSO treatment at 1; 2.5; 5. or 10% v/v or 5  $\mu$ g/mL of cyclosporine (CsA).
