(E) Net Cost	2137.45					
(F) Other overhead cost=10% of the net cost	213.745					
(G) Total cost	2351.2					
Number of fibers (N)	Net cost (RMB)	1 Fiber cost (RMB)				
360	2351.2	6.53				

The break-up cost for each step and the total cost for the preparation of 360 fiber in Chinese Renminbi (RMB) have been calculated stepwise to give an idea about the approximate cost involved in the present investigation. So, the approximate cost of fiber is (Total cost/360 fiber) **6.53 RMB or 0.97 USD** which is much cheaper than the commercial fiber (1000 RMB or 149 USD).
