

Figure S1: Mass spectrometry (MS/MS) spectra under positive ionization of anthocyanins from *Solanum tuberosum*. Identifications of signals according Table 1 and Figure 1.

Table S1: Individual anthocyanin concentrations (g kg⁻¹ fresh weight) by HPLC-DAD in fresh samples of *Solanum tuberosum*. Identifications according Table 1 and Figure 1. Different letters in a column indicate the presence of statistically significant differences according the Tukey's multiple range test ($P \leq 0.05$; $n = 3$). Where nd: not detected.
