

Figure S1: Molecular docking study results showing pocket binding view(A) and different types of bond found during complex formation(B) of IV with IVL.

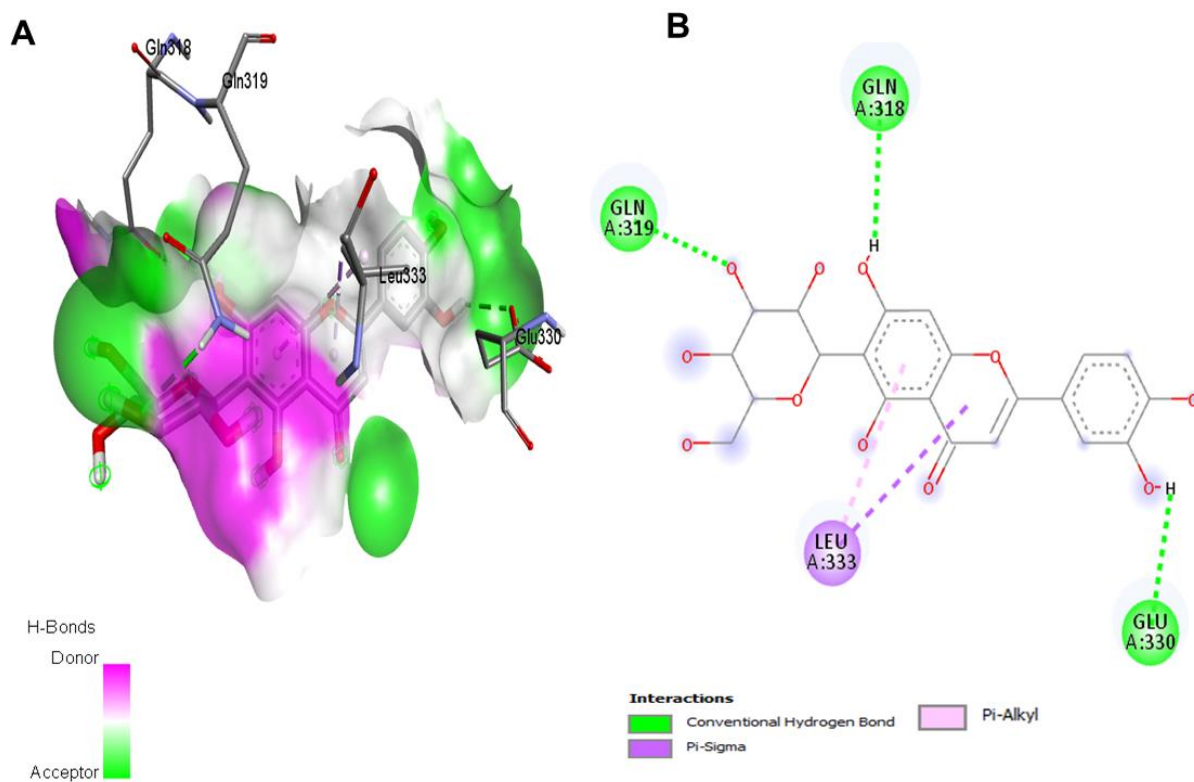

Table S1. Content analysis of major constituents of EE and AE (ng/mg) by HPLC.

Sample Name	IO	V	IV
Retention time(Minutes)	18.56	23.64	25.004
Contents in EE	392.99±0.062	118.10±0.069	224.12±0.002
Contents in AE	214.11±0.096	40.74±0.037	126.36±0.082
