F: FTMS + p ESI d Full ms2 567.4182@hcd33.33 [50.0000-595.0000]

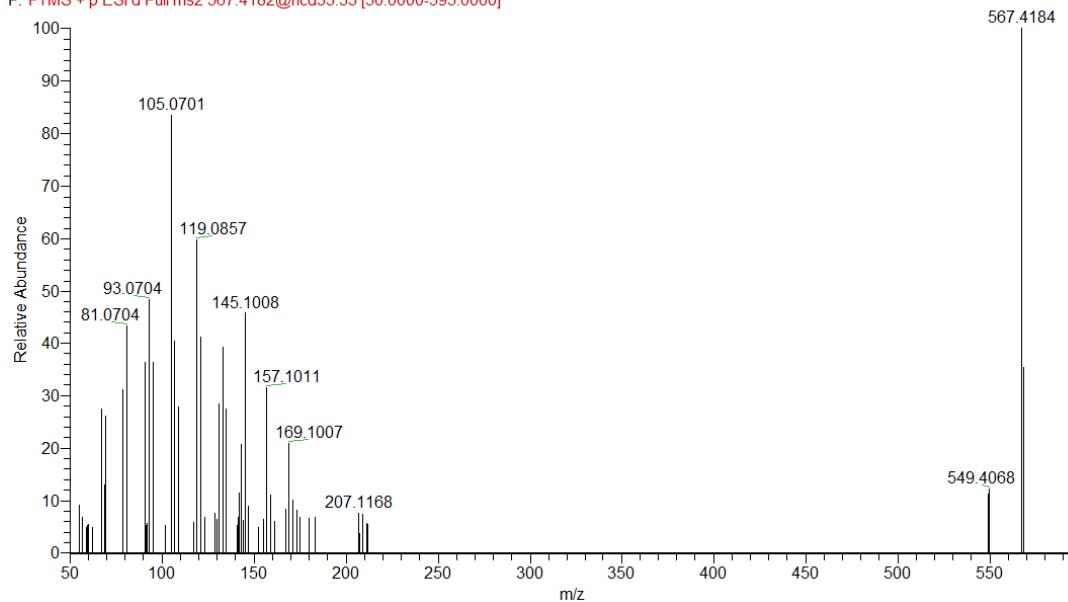

Figure S2. Monoisotopic profile of hydroxyechineone (**3**) in Full MS spectrum (up); (+) ESI-MS/MS spectrum (down).

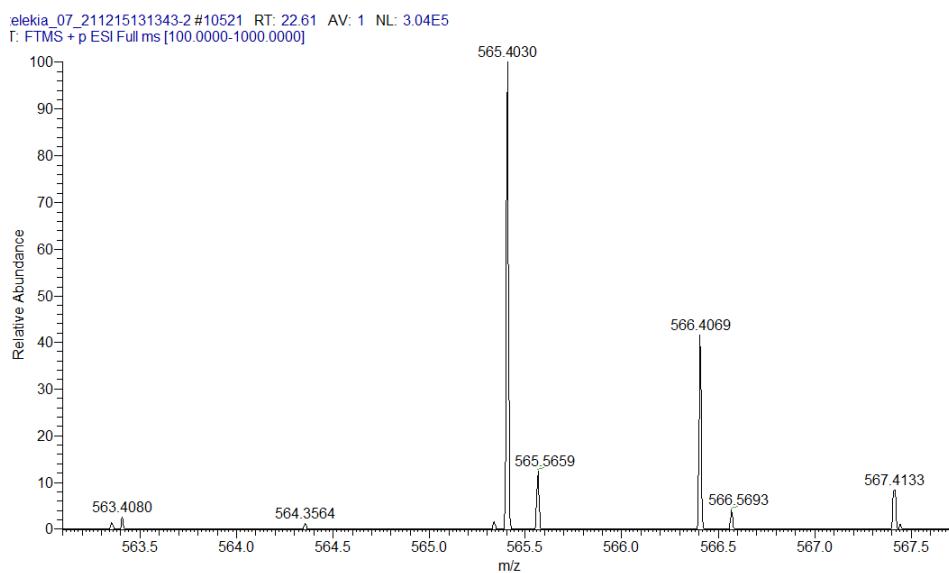

Figure S3. Monoisotopic profile of canthaxanthine (**2**) in Full MS spectrum.

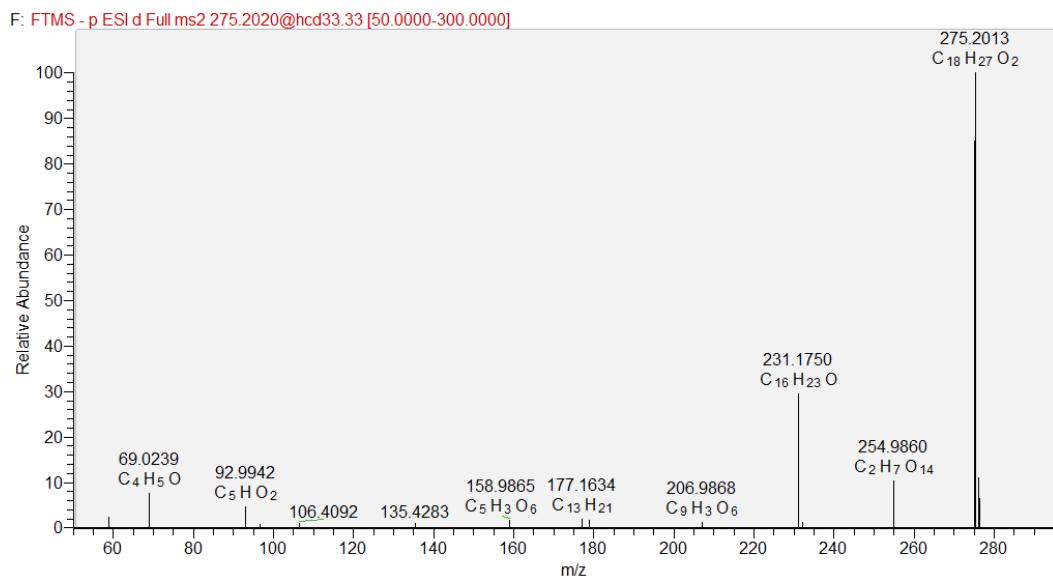

Figure S4. (-) ESI-MS/MS spectrum of octadecatetraenoic acid (**10**).

F: FTMS - p ESI d Full ms2 293.1403@hcd33.33 [50.0000-320.0000]

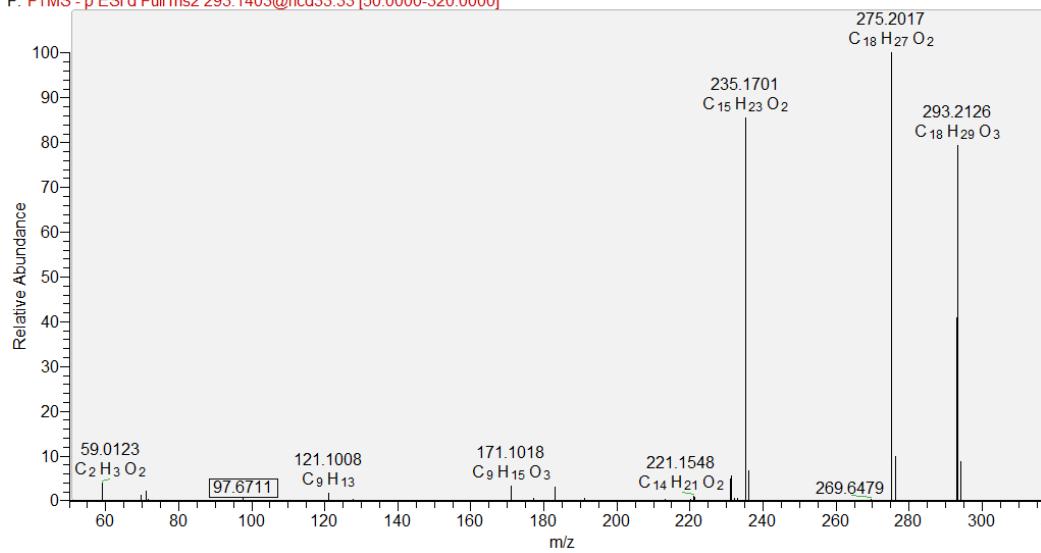

Figure S5. (-) ESI-MS/MS spectrum of hydroxyoctadecatrienoic (**12**).

F: FTMS - p ESI d Full ms2 305.1767@hcd33.33 [50.0000-330.0000]

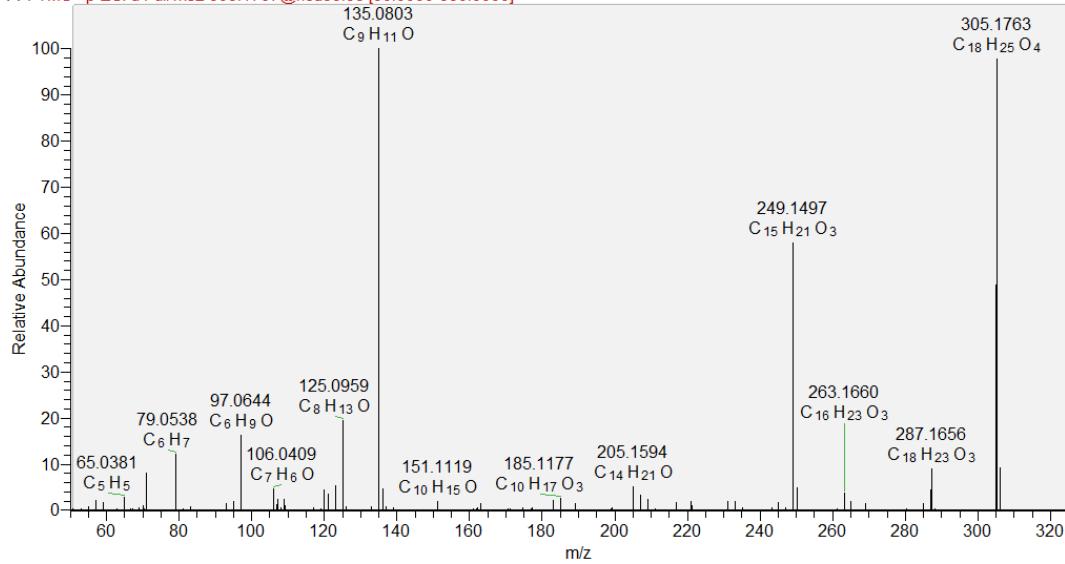

Figure S6. (-) ESI-MS/MS spectrum of dihydroxyoctadecapentaenoic acid (**14**).

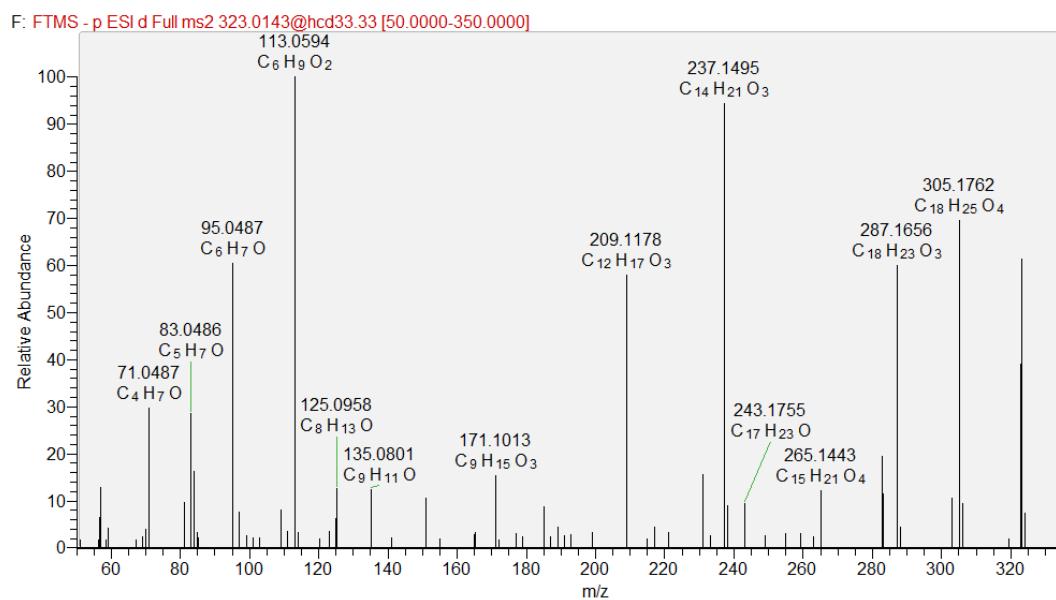

Figure S7. (-) ESI-MS/MS spectrum of trihydroxyoctadecatetraenoic acid (**18**).

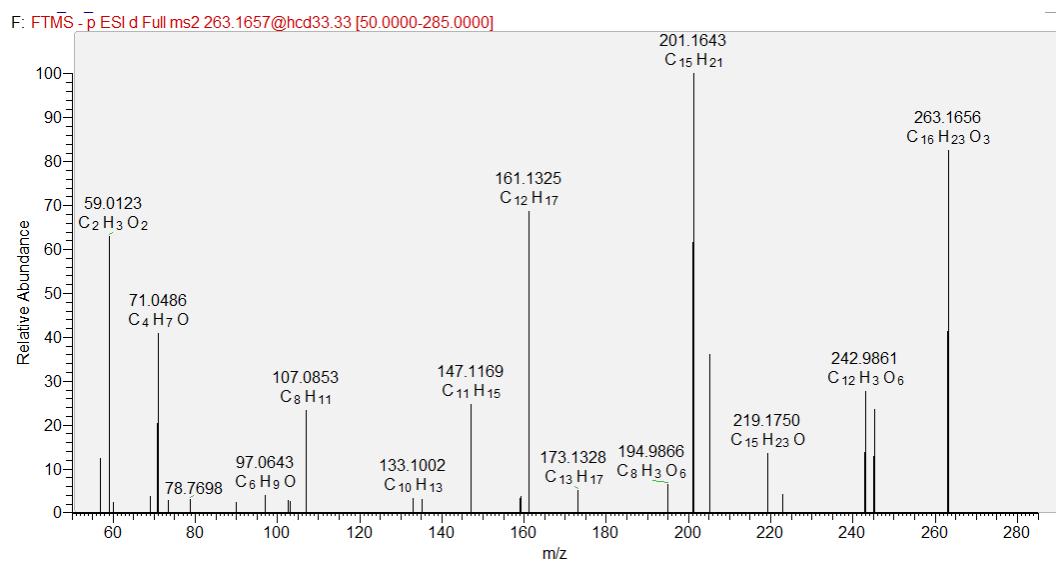

Figure S8. (-) ESI-MS/MS spectrum of hydroxyhexadecatetraenoic acid (**6**).
