Supplementary material

Fig.S1. DPPH assay (A) and Liver cell protective assay (B) result.

Plant sampling and DPPH and liver cell protective assay were performed according to previous method of Xue et al (2017). Sample concentration of black soybean extracts were 0.25 mg/ml for DPPH assay and 0.1 mg/ml for Liver cell protective assay.

Fig.S2. UV Chromatogram of major components of A63 and ST.

HPLC and UV detector used for isoflavone detection. Wavelength for isoflavone was 254 nm.

Detected compounds were numbered as following:

1. Daidzin, 2.6-Malonyldaidzin, 3.6-Malonylgenistin, 4. Daidzein, 5. Genistin.
