

### Cytotoxicity of EOW against MCF-12

**Supplementary Figure S1.** Cytotoxicity of EOW against MCF-12, MCF-12, a normal human epithelial cells derived from mammary gland. Cells were treated with the indicated concentration of EOW (1 mg/mL) with DMSO control for 24 h followed by determination of viability by MTT assay, as detailed in the Methods section. Data represent mean  $\pm$  SD of 8 technical well-replicates.
