

Supplementary Information

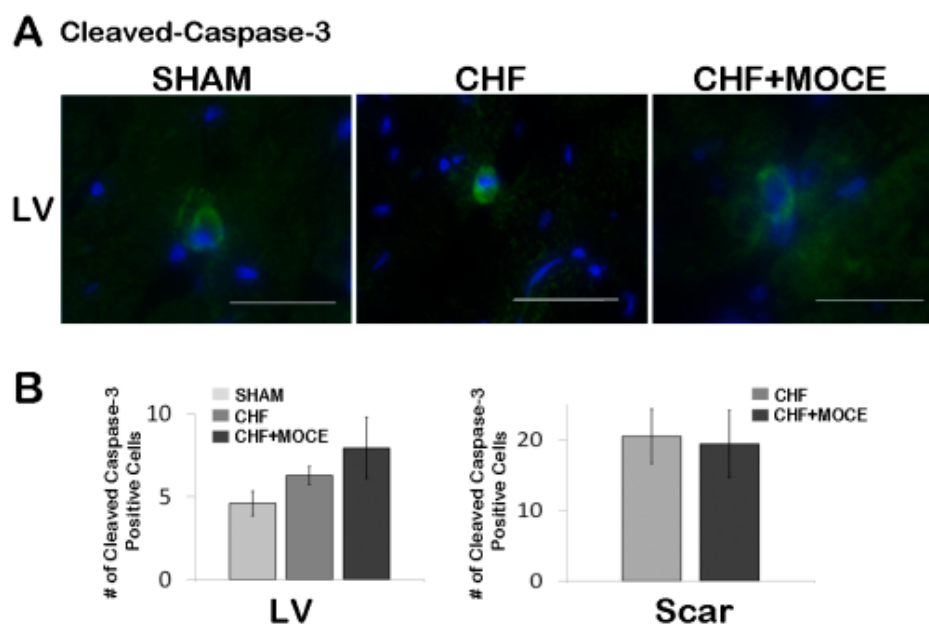

Figure S1. Cleaved-Caspase 3 levels were unchanged in Mocetinostat treated animals. Cross section of LV and Scar tissue were stained with Cleaved-Caspase 3 antibody in sham, Mocetinostat treated and untreated CHF hearts. Number of positive cells was counted in LV (**A**) and scar (**B**). Error bars indicate SE. Scale bar 20 μ m, $n = 4$. MOCE, Mocetinostat; CHF, congestive heart failure.
