

**A)**

**B)**

**Figure S1.** AUDA and CDU are not toxic to rat VSMCs. **(A, B)** Effects of AUDA **(A)** and CDU **(B)** on rat VSMC viability. Rat VSMC were treated with vehicle, AUDA (1 to 30  $\mu\text{g}/\text{mL}$ ) or CDU (1 to 30  $\mu\text{M}$ ) for 48 h. VSMC viability was measured by Sulforhodamine B assay. Statistical significance is indicated as \* $p < 0.05$  vs control.
