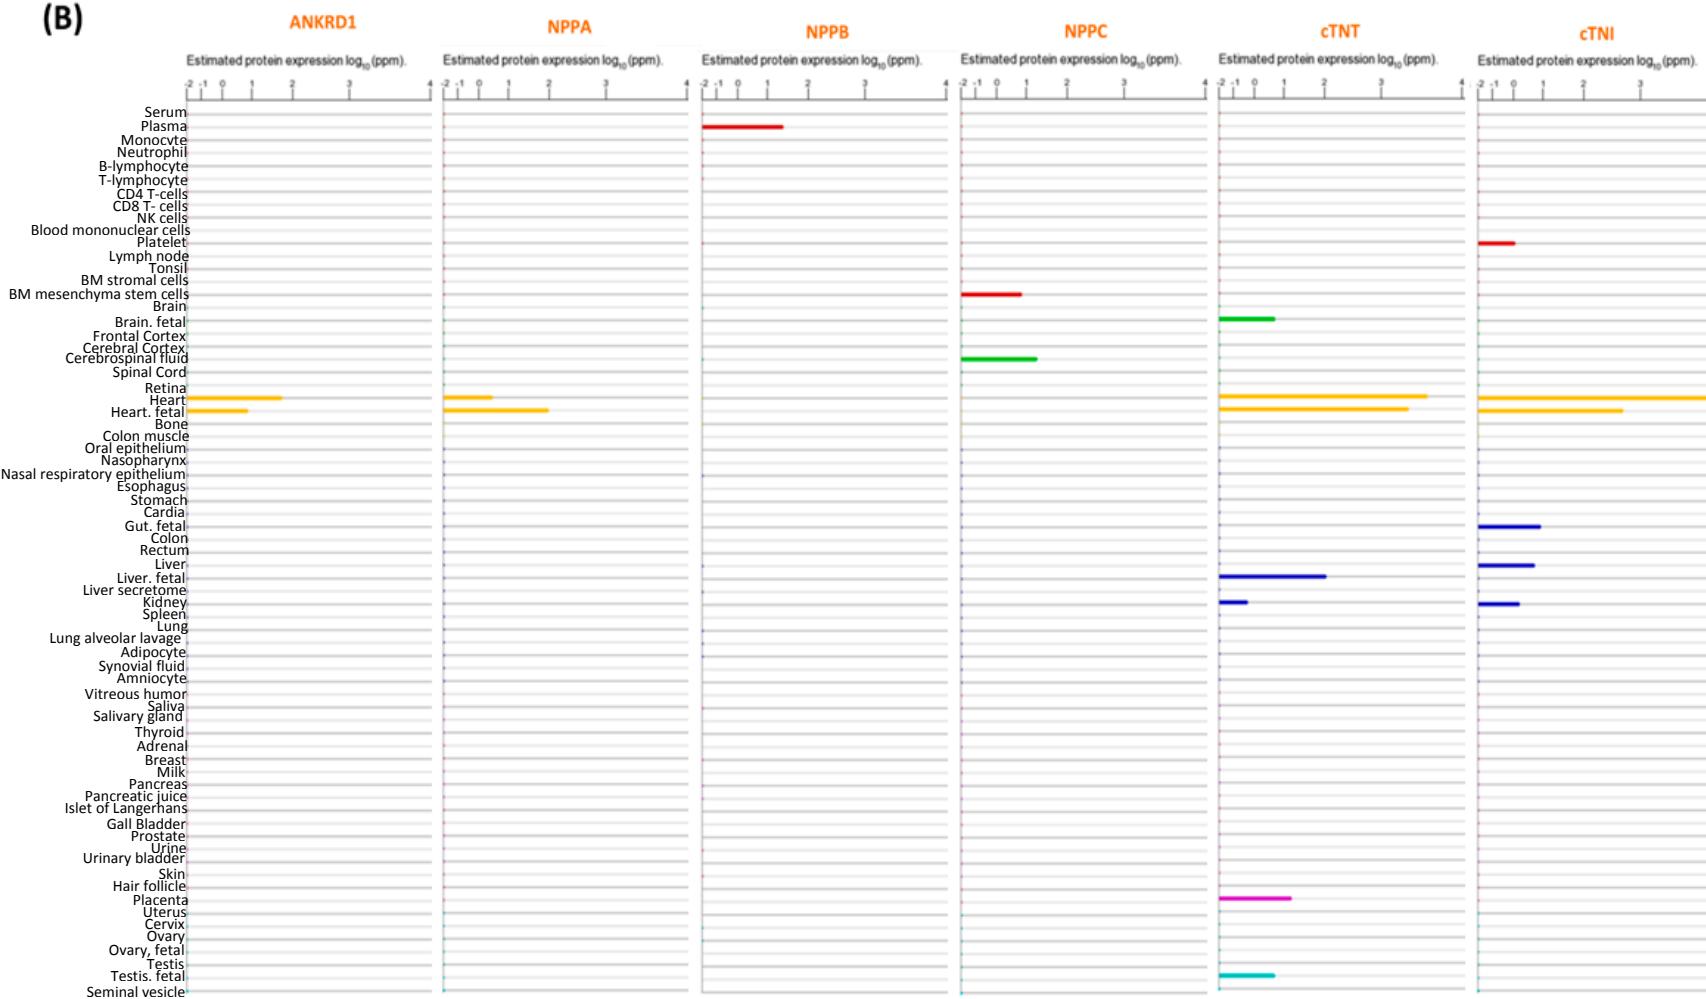

Figure S1. mRNA expression and protein distribution profiles of ANKRD1 in comparison with other established and upcoming cardiac biomarkers. (A) mRNA expression of various cardiac biomarkers in 19 different tissue and compartments by Serial Analysis of Gene Expression (SAGE); (B) Protein distribution profiles of various cardiac biomarkers in 92 tissues and compartments. Data and figures were extracted and adapted from the GeneCards® database (www.genecards.org)

[112]. ANKRD1, ankyrin repeat domain 1; BM, bone marrow; cTNI, cardiac troponin I; cTNT, cardiac troponin T; NPPA, natriuretic peptide A; NPPB, natriuretic peptide B; NPPC, natriuretic peptide C.
