

Fig. S2. The K_a , K_s , K_a/K_s distributions of paralogous expansin gene pairs in *B. rapa*, *B. oleracea*, and *B. nigra*. (A–C) Box plots of K_a , K_s , and K_a/K_s of orthologs. Vertical lines represent the range of values, boxes represent interquartile distances, and the colored line represents the median. The circle represents the abnormal values and the cross represents the average values.

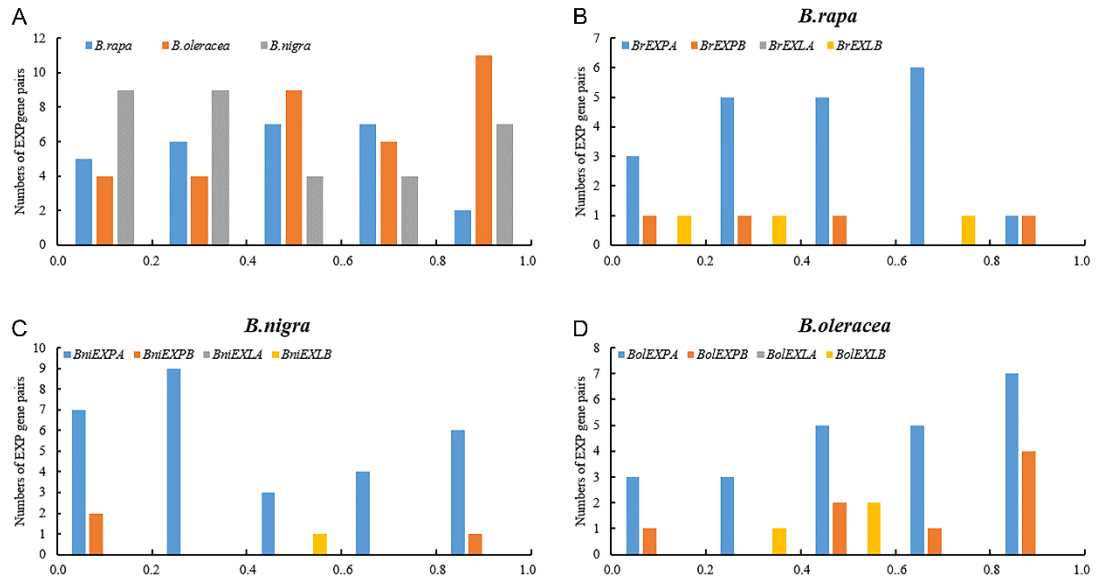

Fig. S3. The d_{SM} distributions of paralogous expansin gene pairs in *B. rapa*, *B. oleracea*, and *B. nigra*. (A) The d_{SM} distribution of expansin gene pairs in three basic species of *Brassica*. (B–D) The d_{SM} distribution of expansin gene pairs in four subfamilies of *B. rapa* (B), *B. oleracea* (C), and *B. nigra* (D). Paralogous gene pairs did not exist in the EXLA subfamilies of three *Brassica* subspecies.
