

Supplementary Table

Table S1. Relative standard deviation (RSD%) of peak areas and retention times of a range of specific lipids representing major lipid families observed in plasma QC samples ($n = 21$), which were monitored during the analysis of the study samples.

Lipid Identity	m/z	%RSD Peak Area	%RSD Retention Time
Docosahexaenoic acid	327.232	7.6	0.62
α -or γ -Linolenic acid	277.217	7.3	0.31
