

Supplemental Figure 1

Supplemental Figure 1. Phylogenetic Analyses of the HD-ZIP II Subfamily Proteins from *Arabidopsis* and *Wheat*. The phylogenetic tree was constructed via MEGA 7.0 software.

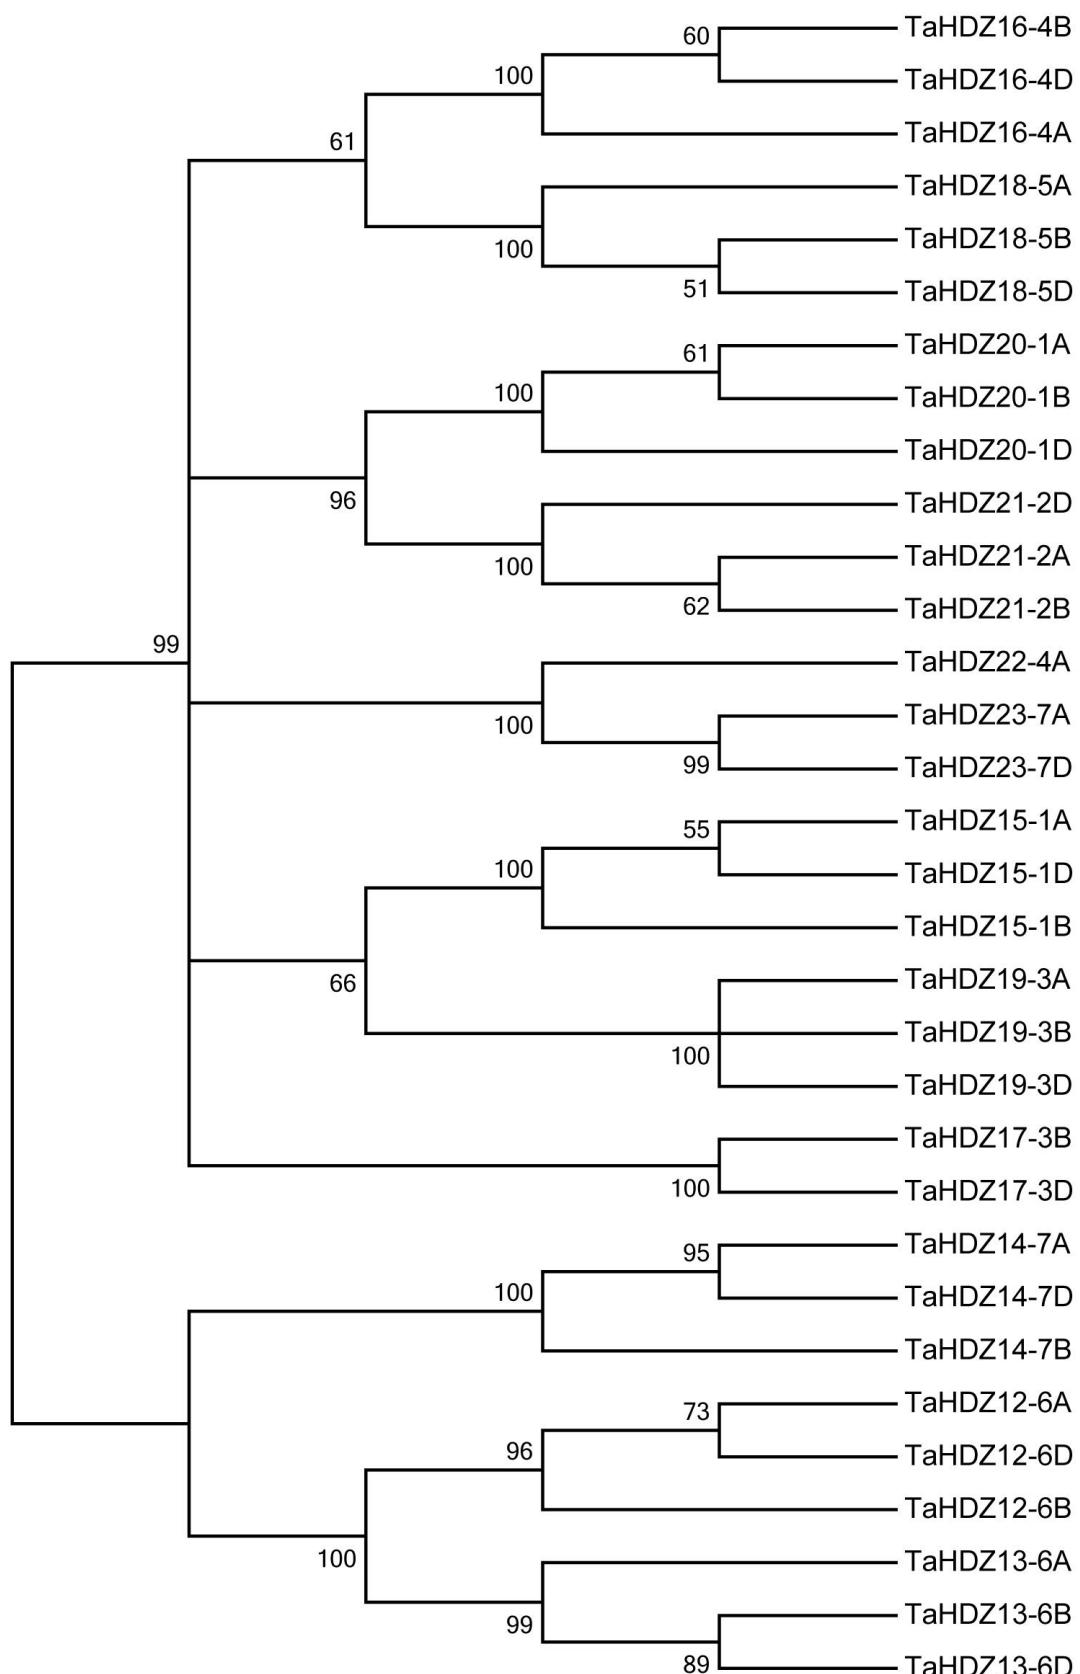

Supplemental Figure 2

Supplemental Figure 2. The Primary Root Length of Col-0 and *iATHB2* transgenic Seedlings.

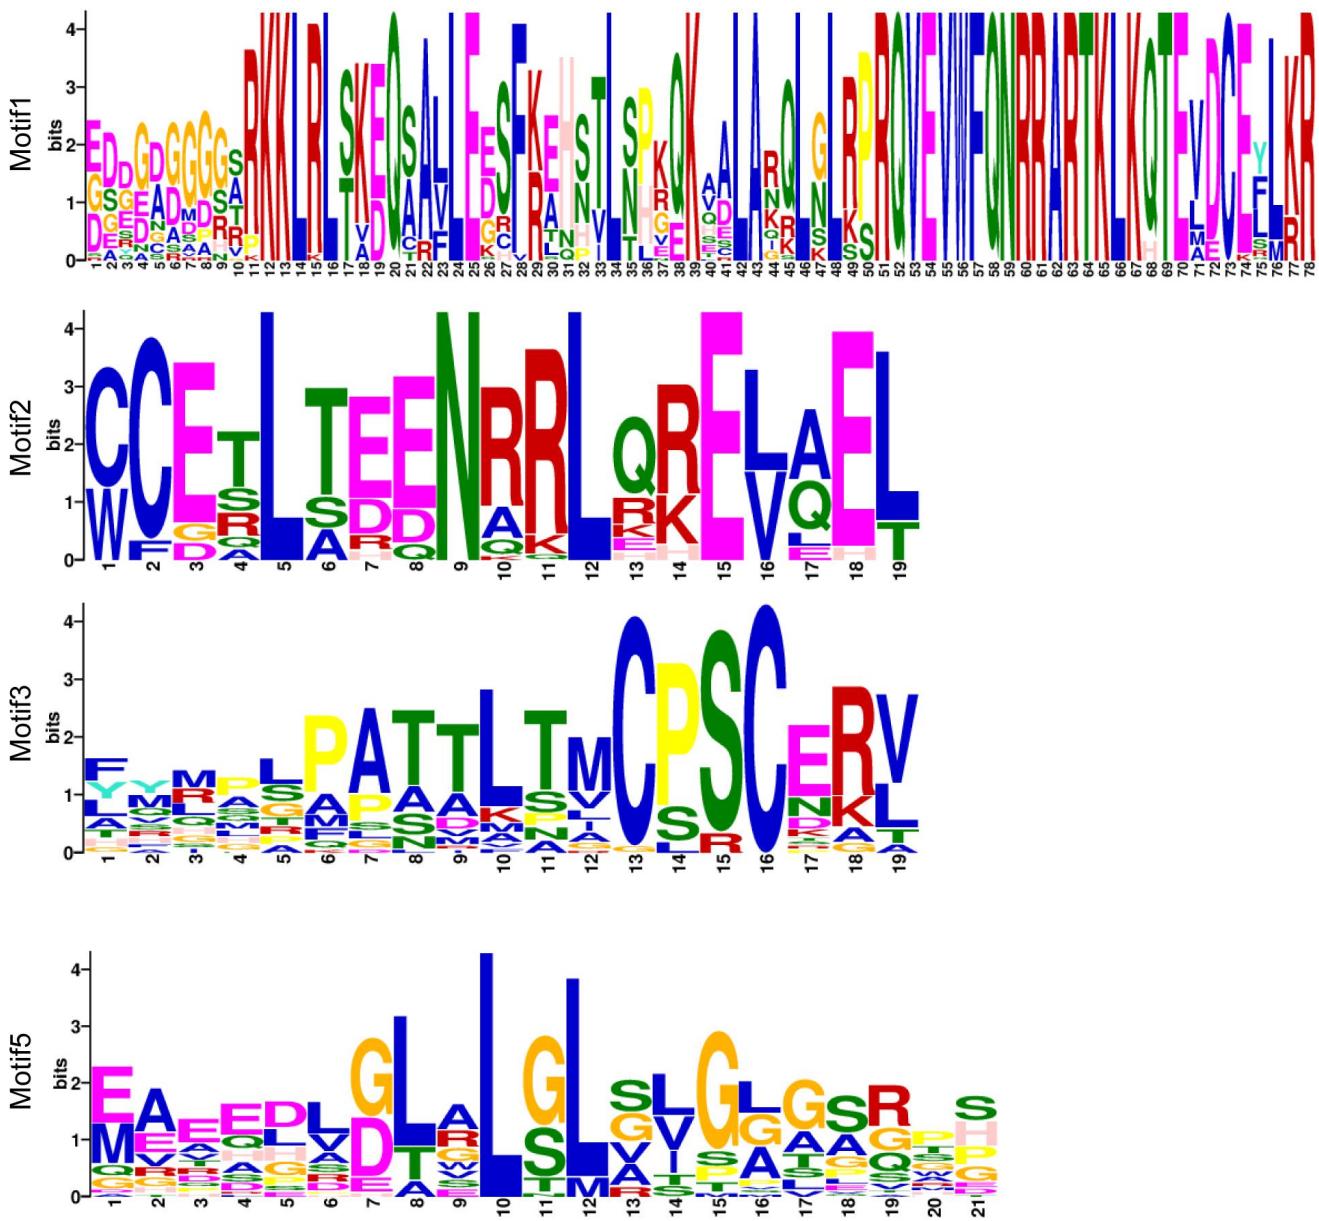

The seedlings of Col-0 and inducible-*ATHB2* plants (*iATHB2*) were grown on 1/2 MS medium with 10 μ M β -estradiol for 5.5 days. Two independent transgenic lines were used for root length measurements. The data are representative of three independent experiments.

Supplemental Figure 3

Supplemental Figure 3. Phylogenetic Analyses of the HD-ZIP II Subfamily Proteins in Wheat. The phylogenetic tree was constructed via MEGA7.0 software.

Supplemental Figure 4

Supplemental Figure 4. Logos for predicted conserved domains found in 32 wheat HD-ZIP II subfamily proteins by MEME program.

Supplemental Table 1. Constructs and Primers Used in This Study.
