

The Simple Method of Preparation of Highly Carboxylated Bacterial Cellulose with Ni- and Mg-Ferrite-Based Versatile Magnetic Carrier for Enzyme Immobilization

Radosław Drozd, Magdalena Szymańska, Katarzyna Przygodzka, Jakub Hoppe, Grzegorz Leniec, Urszula Kowalska

Figure S2. The pairwise comparison of amino acid sequences of lipase from *Thermomyces lanuginosus* (SwissProt; O59952) and lipase B from *Candida antarctica* (SwissProt; P41365). The alignment was done with using ClustalW via BioEdit software. The compared amino acid sequences of lipases shares a low level of similarity with a few short consensus regions (shaded letters).
