

## Supplementary Materials

**Figure S1.** OLFML3 is not a chemoattractant for glioma cells. rhOLFML3-supplemented medium (1: 1 ng/mL, 10: 10 ng/mL) in the bottom chamber of a transwell assay did not affect GL261 (A) migration ( $p = 0.29$ ), nor (B) invasion ( $p = 0.53$ ). Comparisons based on one-way ANOVA with Tukey's Multiple Comparison Test. Bars represent group mean with standard error of the mean (SEM).
