

Figure S2. WES spike-in proof of concept.

Screenshot from the Alamut Visual software showing alignment of different assays for the *ABCA4* (A), *RPGR* (B), and *PCARE* (C) loci. On top, the alignment resulting from a typical WES assay. In the middle, the results of the spike-in of IDT custom capture probes for *ABCA4* are shown (A). On the bottom, the long-range PCR library spike-in results are illustrated.
