

## Total Particles by Interferometry (only particles in the 50 - 200nm range)

**GM-1**

**FM-1**

**GM-2**

**FM-2**

**GM-3**

**FM-3**

**Figure S1.** Total count of captured particles via interferometric analysis, from both sample sets, GFM and FFM, values are shown with SD and include the IgG control spot.

**Table S1.** Absolute values of colocalization analysis: both sample sets were measured in triplicates, displayed in mean values and SD.

GFM-1	CD81		CD9		CD63		CD9/63		CD9/81		CD63/81		CD9/81/63
