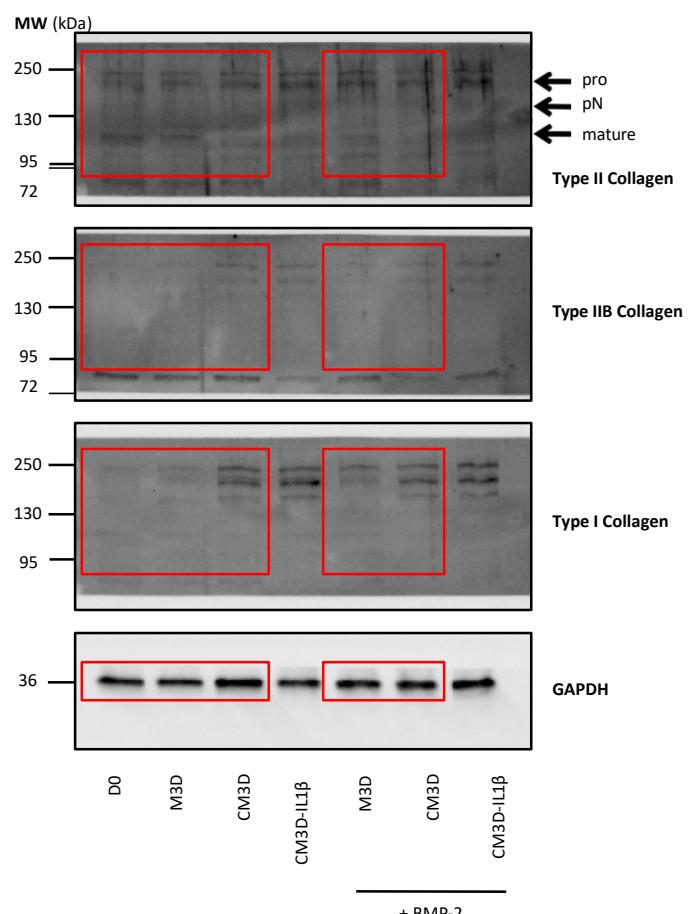

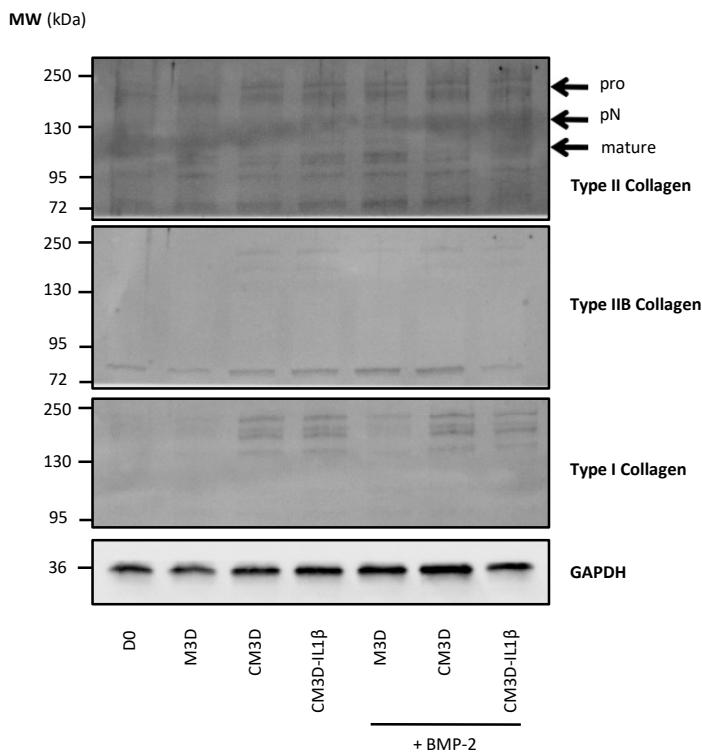

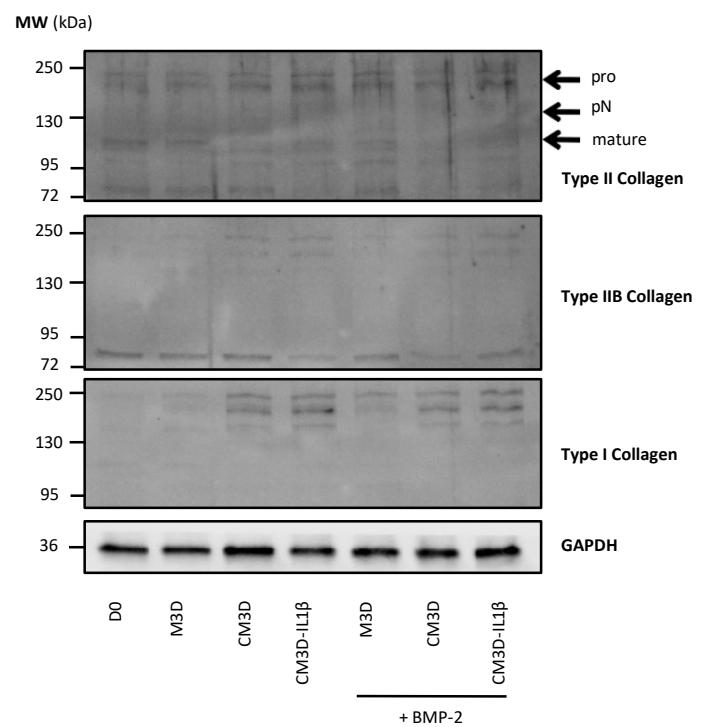

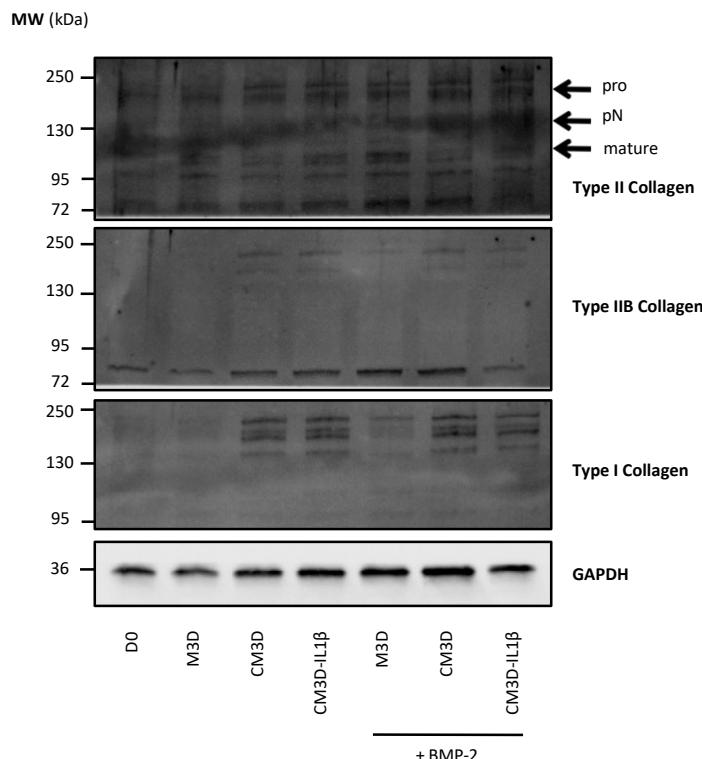

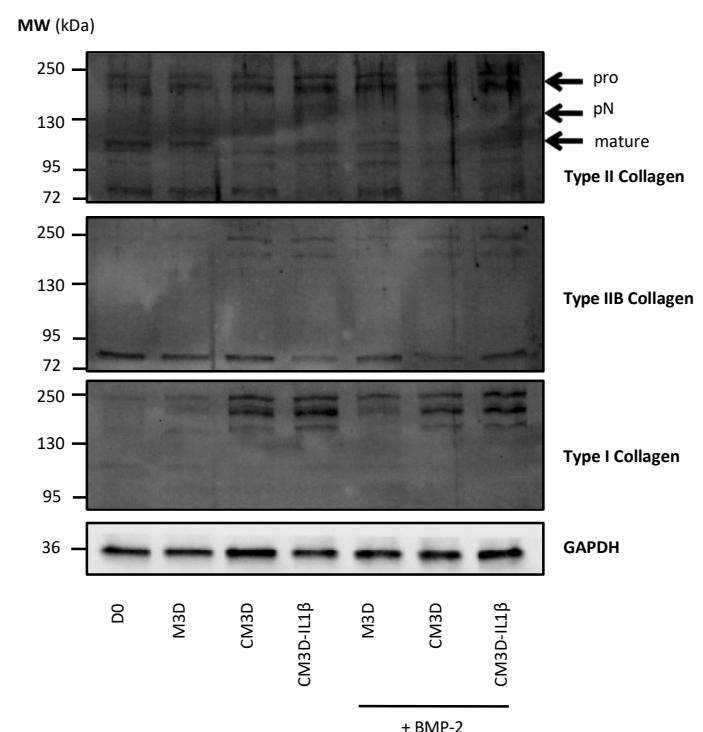

Figure S1. Complete gel and PVDF membranes analyzed in western blot presented in Figure 4B.
Images were captured with Chemidoc MP Imaging-System (Bio-Rad). Molecular weights (kDa) are indicated on the left of all blots. The cropped images shown in Figure 4B are highlighted in red boxes.

D7**D14****Figure S2. Under-exposure of the blots presented in Figure 4B.**

Images were captured with Chemidoc MP Imaging-System (Bio-Rad). Molecular weights (kDa) are indicated on the left of all blots.

D7**D14****Figure S3. Over-exposure of the blots presented in Figure 4B.**

Images were captured with Chemidoc MP Imaging-System (Bio-Rad). Molecular weights (kDa) are indicated on the left of all blots.

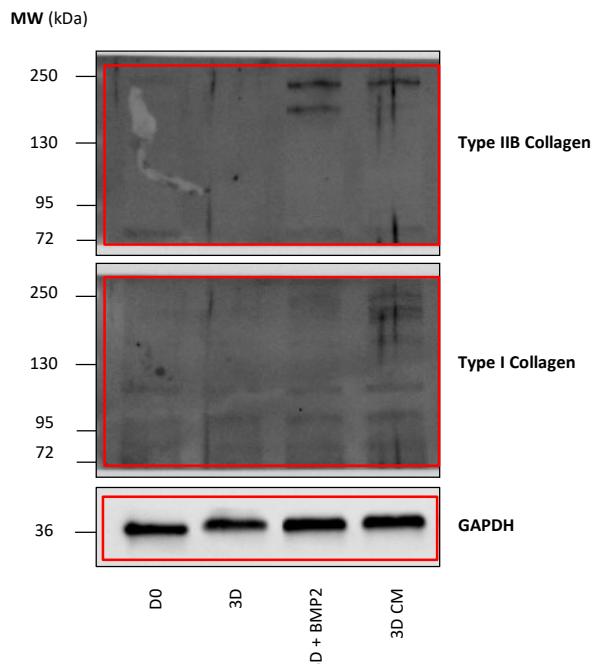

Figure S4. Complete gel and PVDF membranes analyzed in western-blot presented in Figure 4C.
Images were captured with Chemidoc MP Imaging-System (Bio-Rad). Molecular weights (kDa) are indicated on the left of all blots. The cropped images shown in Figure 4C are highlighted in red boxes.

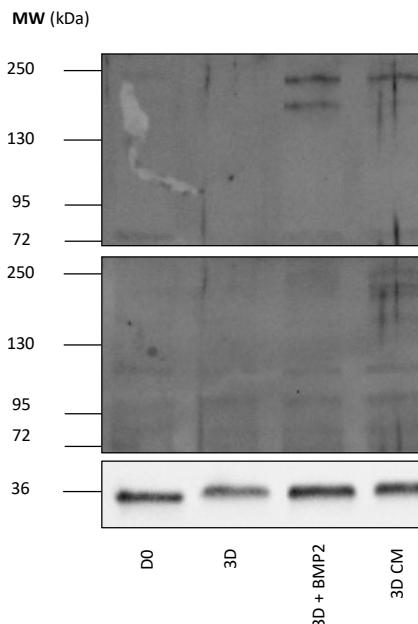

Figure S5. Under-exposure of the blots presented in Figure 4C.

Images were captured with Chemidoc MP Imaging-System (Bio-Rad). Molecular weights (kDa) are indicated on the left of all blots.

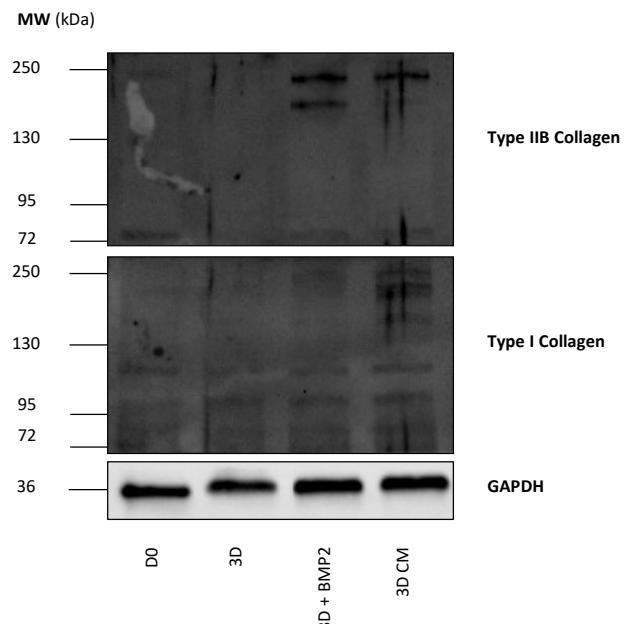

Figure S6. Over-exposure of the blots presented in Figure 4C.

Images were captured with Chemidoc MP Imaging-System (Bio-Rad). Molecular weights (kDa) are indicated on the left of all blots.
