**Supplementary data**

Figure S1. Detection of rga-24 gai-t6 double mutant genotype level. The letter 'M' indicated Maker, 1~17 indicate the number of double mutant.

Figure S2. Identification of rga-24 bbx24 homozygous double mutant A. Detection of rga-24 bbx24 double mutant genotype level. The letter 'M' indicated Maker, 1~3 indicate the number of double mutant. B. Detection of rga-24 bbx24 double mutant gene expression levels. The Actin2 gene was as an internal control Table S1. Primers used for genotyping.
Table S1. Primers used for genotyping and qRT-PCR.

Table S2. Primers used for plasmid constructs.

Supplemental Data

Supplemental Figure S1 Detection of *rga-24 gai-t6* double mutant genotype level. The letter 'M' indicated Maker, 1~17 indicate the number of double mutant.

Supplemental Figure S2 Identification of *rga-24 bbx24* homozygous double mutant A. Detection of *rga-24 bbx24* double mutant genotype level. The letter 'M' indicated Maker, 1~3 indicate the number of double mutant. B. Detection of *rga-24 bbx24* double mutant gene expression levels. The *Actin2* gene was as an internal control.
