

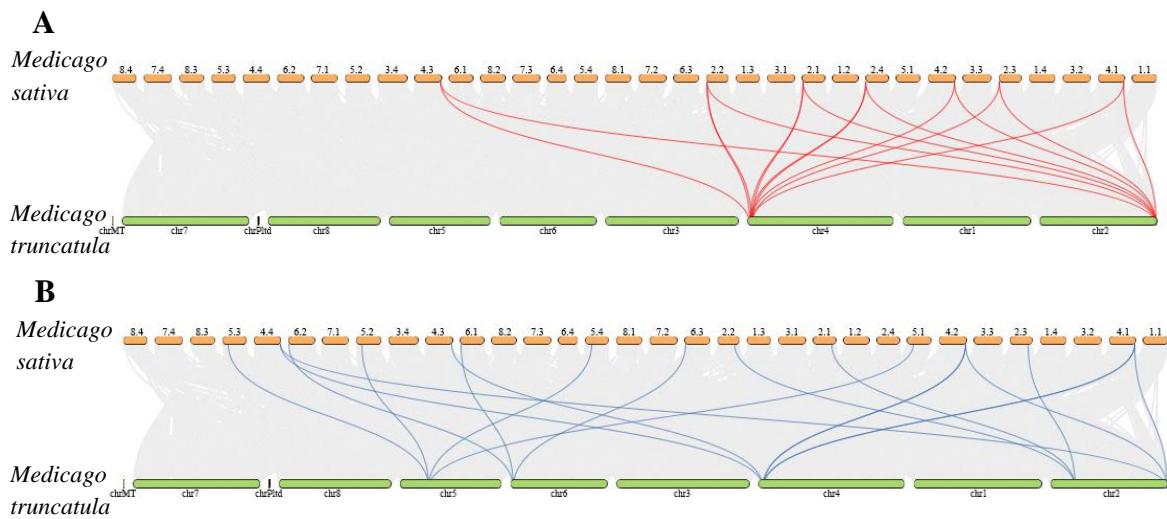

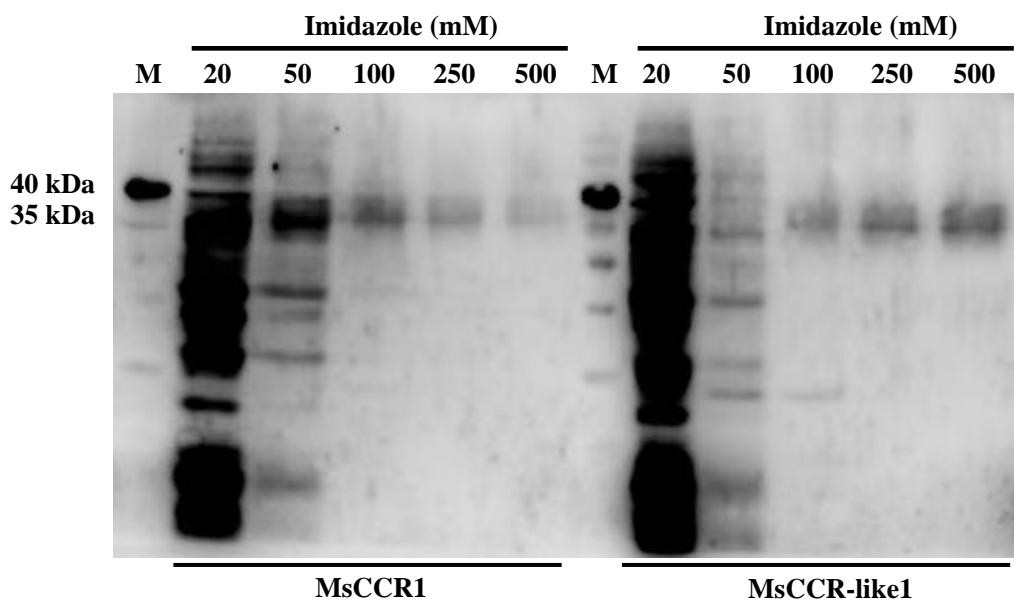

## Figure S1

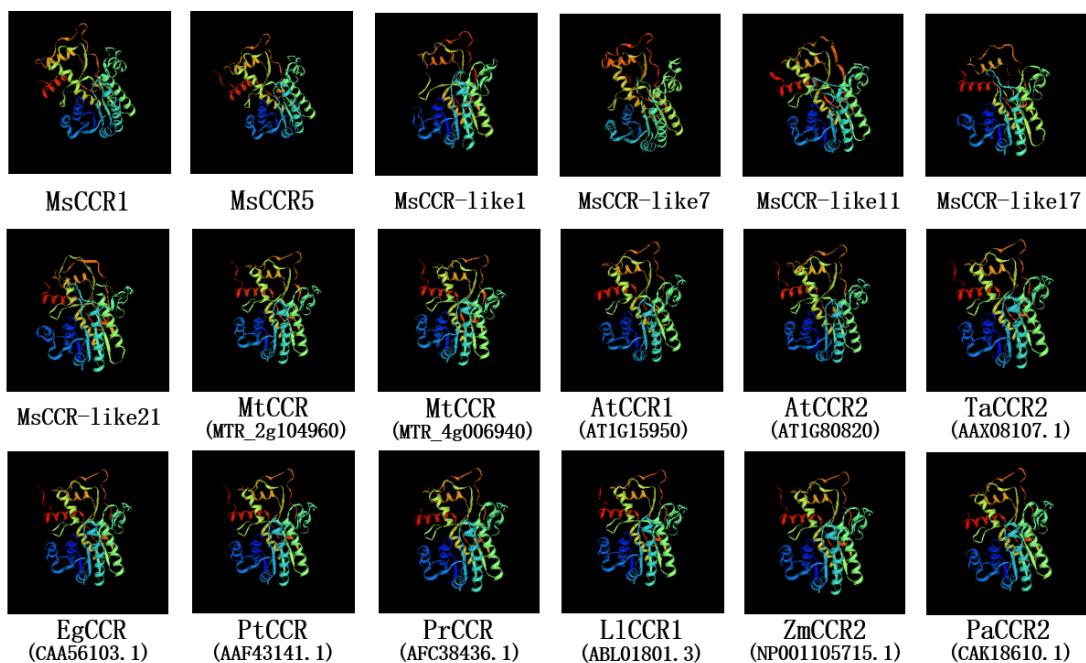

**Figure S1.** The chromosome location and synteny analysis of *CCR/CCR-like* genes in *M. sativa* and *M. truncatula*. Gray lines in the background indicate the collinear blocks within *M. sativa* and *M. truncatula*. The red (A, *MsCCRs*) or blue (B, *MsCCR-lites*) curves highlight the syntenic *CCR/CCR-like* gene pairs.

**Figure S2**

**Figure S2.** Western blot profile of recombinant MsCCR1 and MsCCR-like1. M: protein marker.

**Figure S3**

**Figure S3.** Predicted three-dimensional structures of MsCCR/MsCCR-likes and other bona fide CCRs.

**Figure S4**
