

Supplementary material figure and table legends.

Table S1. Gene identifiers or locus names and accession numbers of *M. truncatula* (A) and *S. meliloti* (B) genes used in this study.

Table S2 Genes enriched in infected (A) and non-infected cells(B) of the fixation zone (extraction from Supplementary data of Limpens et al., 2013).

Table S3 Expression of *M. truncatula* genes encoding proteins of the inward transport of potassium, cation/sodium exchangers and putative regulators in the nodule developmental zones. Data (deseq-normalized RNA-seq reads) were obtained from Symbimics database. FI: Meristem; FIId: Distal infection zone; FIIP: Proximal infection zone; IZ: Interzone II-III; ZIII: nitrogen-fixing zone, mature zone.

Table S4. Expression of potassium transporters/exchangers genes of *Sinorhizobium meliloti* in root nodule developmental zones. Data (deseq-normalized RNA-seq reads) were obtained from Symbimics data base. FI: Meristem; FIId: Distal infection zone; FIIP: Proximal infection zone; IZ: Interzone II-III; ZIII: nitrogen-fixing zone.

Table S5. Relative distribution of elements in *M. truncatula* nodules of plants treated with 0 or 100 mM NaCl for 2 weeks.

Table S6 List of primers used in this research.

Figure S1 (A,B). Western blot analysis of MtNHX6 in *M. truncatula* roots with anti-NHX6 antibody. The band around 58 kD is marked by arrowhead (A); location of the peptide in the protein sequence of the exchanger highlighted by yellow (B).

Table S1. *M. truncatula* (A) and *S. meliloti* (B) genes used in this study.
