Supplementary Materials

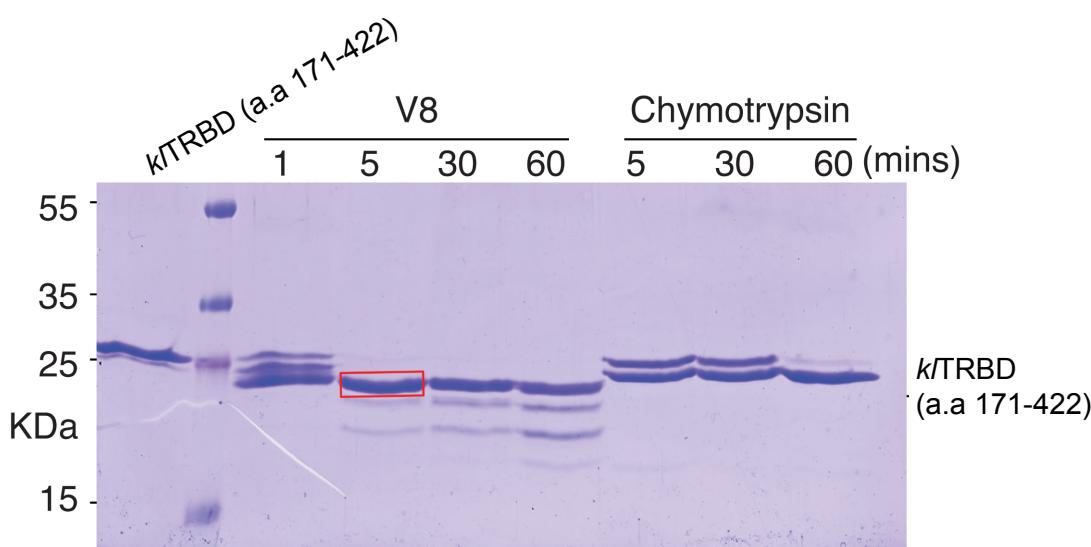

Figure S1. *k*/TRBD proteolysis. The recombinant *k*/TRBD protein fragment defined by sequence alignment, *k*/TRBD (171-422), was incubated with V8 or chymotrypsin protease at 1:100 ratio (V8 : *k*/TRBD), for 1, 5, 30 and 60mins. The reaction was stopped by incubating the sample with SDS loading buffer and run on an SDS PAGE gel. The band marked by a red box was analyzed by mass spectrometry and found to consist of residues 171-404.

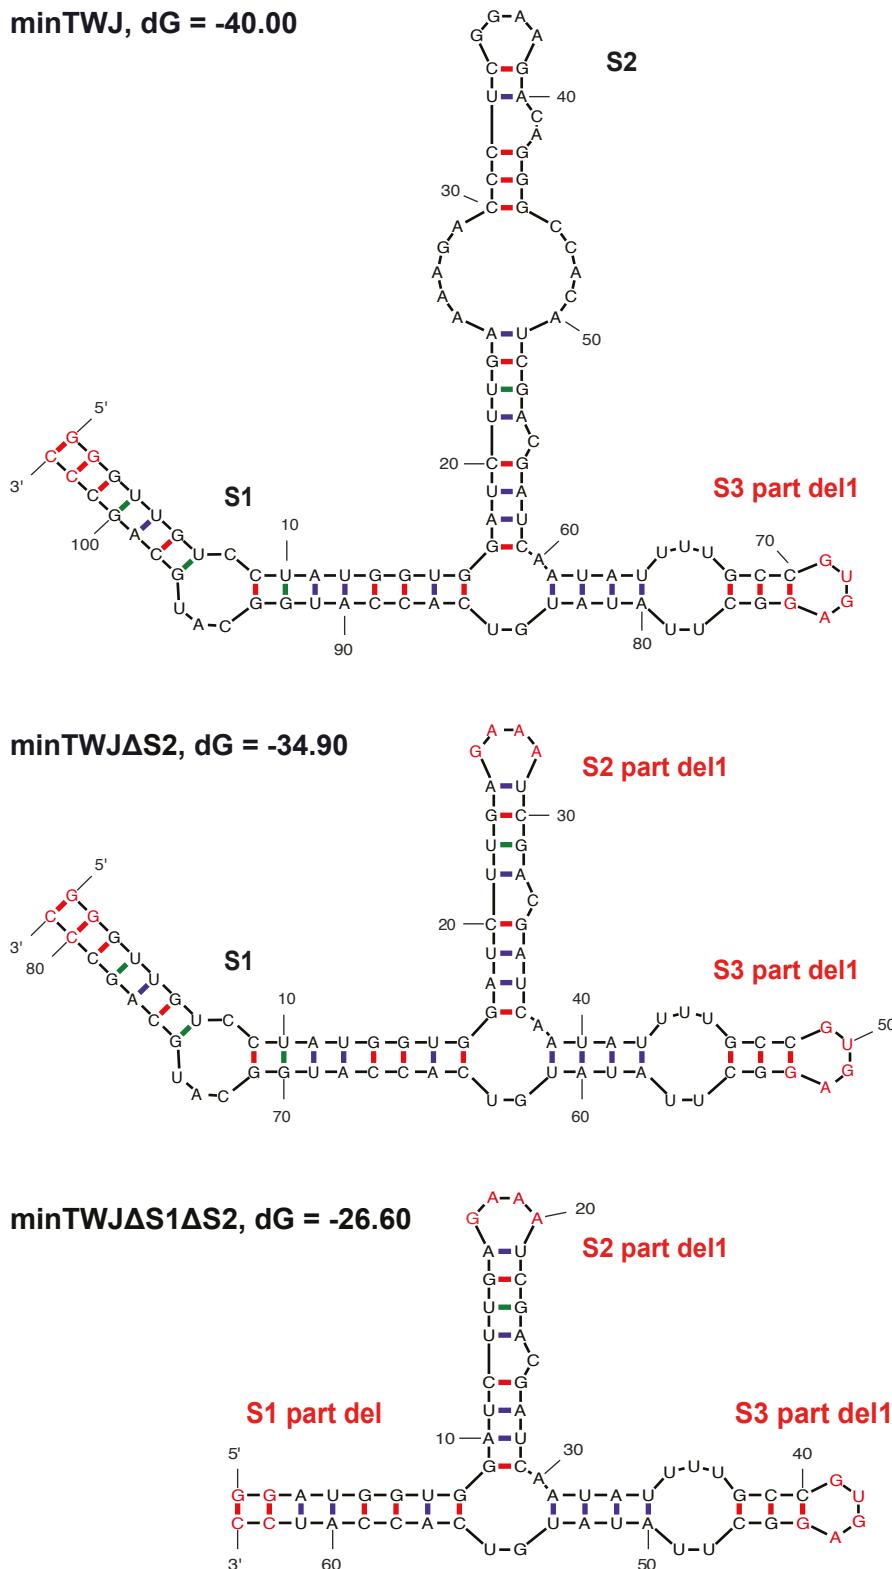

Figure S2. *In vitro* transcribed minTWJ RNA constructs. Structures and minimal energies (dG) of minTWJ, minTWJ Δ S2 and minTWJ Δ S1 Δ S2 were predicted by *mfold*. Indicated in red are nucleotides substituted from the native TWJ sequence.
