**Supplementary Figure S3. miRNA predicts binding site and cleavage site sequence peak map.** (A) zma-miR169o-5p\_ R-1 predicted binding site, the red part indicates the predicted microRNA binding site, the yellow part indicates the target gene sequence, Underlined is the race connector sequence. (B) zma-miR169o-5p\_ R-1 cleavage site sequencing peak map. (C) zma-miR444a\_ 1ss12tc predicted binding site, the red part indicates the predicted microRNA binding site, the yellow part indicates the target gene sequence, Underlined is the race connector sequence. (D) zma-miR444a\_ 1ss12tc cleavage site sequencing peak map.
