

	MSI-status		
	<i>OR</i>	<i>95% CI</i>	<i>p-value</i>
TILs High vs. Low	6.571	3.102-13.920	<0.001
Mucus >50% vs. ≤50%	4.567	1.789-11.655	0.001
Mucus ≥10% vs. <10%	4.373	2.152-8.887	<0.001
Stroma High vs. Low	0.363	0.157-0.835	0.014
Budding High vs. Low	0.968	0.406-2.309	0.968

Table S6. Odds Ratios with 95% confidence interval calculated as the likelihood for microsatellite instability if scored into the highest histopathologic category (i.e. TILs-high, Mucus > 50%, Mucus ≥ 10%, Stroma-high and Budding-high). MSI = microsatellite instability, OR = odds ratio, CI = confidence interval, TILs = tumor infiltrating lymphocytes
