

Supplementary material

Effects of module truncation of a new alginate lyase VxAly7C from marine *Vibrio xiamenensis* QY104 on biochemical characteristics and product distribution

Luyao Tang^{1,2,3,4,5}, Mengmeng Bao^{1,2,3,4}, Ying Wang^{1,2,3,4}, Zheng Fu^{1,2,3,4}, Feng Han^{1,2,3,4*}, Wengong Yu^{1,2,3,4*}

Table S1. PCR primers for the recombinant VxAly7C and its truncated mutants

Primer name	Primer sequence (5'-3')	Recombinant enzyme
PVxAly7C-FL-F	GGAATTCC ATATGC AGAGTGG TTGTGTGCAAAGT	VxAly7C-FL
PVxAly7C-FL-R	ACGCG TCGACTTT TATATTGATT ATGTGATGTTGTAA	VxAly7C-FL, VxAly7C-TM1, VxAly7C-TM2
PVxAly7C-TM1-F	GGAATTCC ATATGG ACGCGTG CTCTAATCAAGAA	VxAly7C-TM1
PVxAly7C-TM2-F	GGAATTCC ATATGG ATAACCA TATTATTACTGATAAG	VxAly7C-TM2

The bases in bold are recognition sites for restriction endonuclease enzymes.
