

Supplementary Figure S1. Overall survival (A) and recurrence-free survival (B) experience of the non-metastatic cohort of 54 patients where follow-up data were available. OS and RFS were estimated with a Kaplan-Meier estimator. The grey-shaded area represents the 95% confidence interval. The risk table below the graph shows numbers of OS and RFS events occurring within the respective interval report in round brackets.

Supplementary Figure S2. Relapse-free survival for sTILs with a cut-off of 10% in the cohort of 54 patients.

Supplementary Figure S3. Relapse-free survival for HER2-negative and HER2-low tumors in the cohort of 54 patients.
