

Supplementary Table S3. Comparing sensitivity, specificity, positive and negative predictive values and accuracy for CD276 immunohistochemistry and lateral lymph node metastasis in group with less than excellent response to initial therapy.

	CD276- positive group with less than excellent response to initial therapy	Group with lateral lymph node metastasis and less than excellent response to initial therapy	p-value
	<i>n</i> =22	<i>n</i> =22	
Sensitivity	72.7%	50.0%	0.0253
Specificity	58.3%	87.5%	0.0196
Positive predictive value	61.5%	78.6%	0.1309
Negative predictive value	70.0%	65.6%	0.5378
Accuracy	65.2%	69.6%	0.6565
