

Table S1. The number of samples of three biological fluids (maternal blood plasma, cord blood plasma and amniotic fluid) taken from 234 patients at the stage of delivery, whose lipid was determined by HPLC-MS/MS.

	Control (n=59)	Ia group (n=41)	Ib group (n=67)	Ic group (n=67)
mother plasma	51	27	51	50
Cord plasma	47	28	50	49
amniotic fluid	50	27	52	50

Table S2. Maternal plasma, cord blood, and amniotic fluid lipids, with statistically significant changes in history of Covid 19 infection, compared with controls.
