Contents:

Supplementary figures

Figure S1. Correlation plots between the binding energy (E_B) and the most positive electrostatic potentials ($V_{S,\max}$) on the X atom of the XO_2 ($\text{X} = \text{S}, \text{Se}, \text{and Te}$).

Figure S2. Correlation plots between the binding energy (E_B) and the most negative electrostatic potentials ($V_{S,\min}$) on the Y atom of the CH_3YCH_3 ($\text{Y} = \text{O}, \text{S}, \text{Se}, \text{and Te}$).

Figure S3. Correlation plots between the binding energy (E_B) and the $\text{X}\cdots\text{Y}$ distance between two interacting chalcogen atoms, $\text{X} = \text{S}, \text{Se}, \text{Te}; \text{Y} = \text{O}, \text{S}, \text{Se}, \text{and Te}$.

Figure S4. Correlation plots between the binding energy (E_B) and the total interaction energies (E_{total}) of the studied complexes obtained by the SAPT analysis.

Supplementary tables

Table S1. Cartesian coordinates of the $\text{SO}_2\cdots\text{CH}_3\text{YCH}_3$ ($\text{Y} = \text{O}, \text{S}, \text{Se}, \text{Te}$) complexes in its principal inertial axis system at the MP2/aug-cc-pVTZ(PP) level of theory.

Table S2. Cartesian coordinates of the $\text{SeO}_2\cdots\text{CH}_3\text{YCH}_3$ ($\text{Y} = \text{O}, \text{S}, \text{Se}, \text{Te}$) complexes in its principal inertial axis system at the MP2/aug-cc-pVTZ(PP) level of theory.

Table S3. Cartesian coordinates of the $\text{TeO}_2\cdots\text{CH}_3\text{YCH}_3$ ($\text{Y} = \text{O}, \text{S}, \text{Se}, \text{Te}$) complexes in its principal inertial axis system at the MP2/aug-cc-pVTZ(PP) level of theory.

Table S4. The geometrical parameters associated with the $\text{C-H}\cdots\text{O}$ hydrogen bonds in the twelve studied complexes.

Supplementary figures

Figure S1. Correlation plots between the binding energy (E_B) and the most positive electrostatic potentials ($V_{S,max}$) on the X atom of the XO_2 (X = S, Se, and Te).

Figure S2. Correlation plots between the binding energy (E_B) and the most negative electrostatic potentials ($V_{S,min}$) on the Y atom of the CH_3YCH_3 (Y = O, S, Se, and Te).

Figure S3. Correlation plots between the binding energy (E_B) and the X...Y distance between two interacting chalcogen atoms, X = S, Se, Te; Y = O, S, Se, and Te.

Figure S4. Correlation plots between the binding energy (E_B) and the total interaction energies (E_{total}) of the studied complexes obtained by the SAPT analysis.

Supplementary tables

Table S1. Cartesian coordinates of the $\text{SO}_2\cdots\text{CH}_3\text{YCH}_3$ ($\text{Y} = \text{O}, \text{S}, \text{Se}, \text{Te}$) complexes in its principal inertial axis system at the MP2/aug-cc-pVTZ(PP) level of theory.
