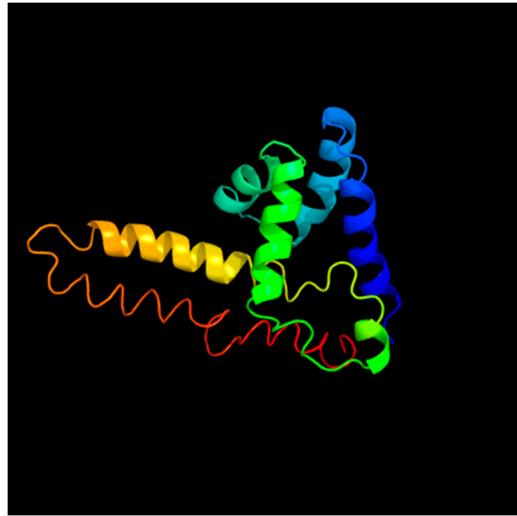

**Figure S1.** A . Characteristic growth of the tested *Salmonella* spp. strain (isolated from human milk) on XLD agar as convex colonies with a black center and a pink-red surrounded halo on a pink-red medium. B . Brilliant Green Agar (BGA) a selective and differential medium for the isolation of *Salmonella*. Characteristic growth of tested strain *Salmonella* spp. (isolated from human milk) colonies were as pinkish-white colonies on the pinkish-red medium XLD Agar (Xylose Lysine Deoxycholate Agar) is one of the mandatory media in accordance with PN-EN ISO 6579-1:2017-04 Food chain microbiology - Horizontal method for detection, enumeration and serotyping of *Salmonella* - Part 1: Detection of *Salmonella* spp.
