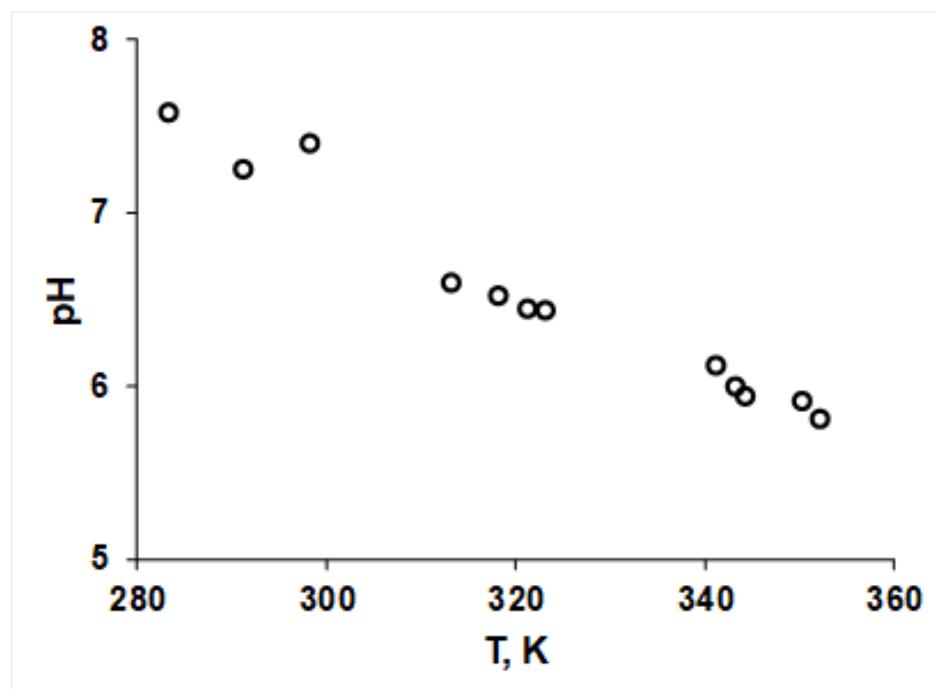

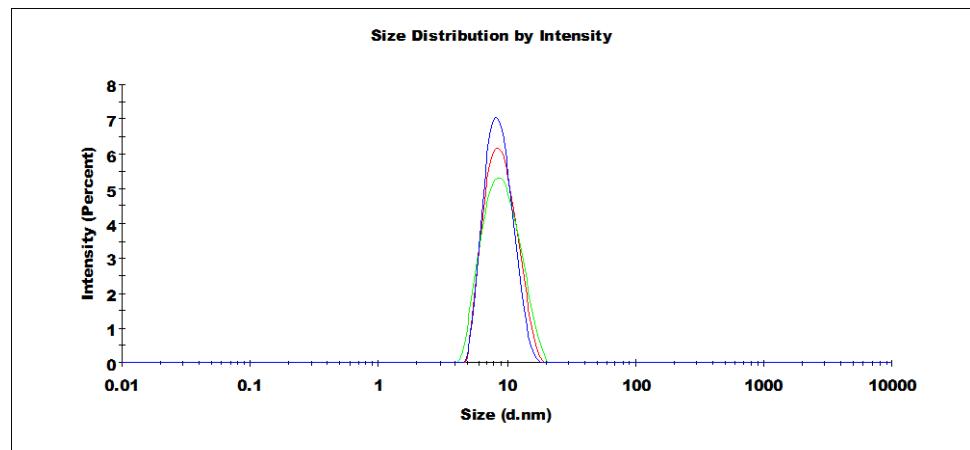

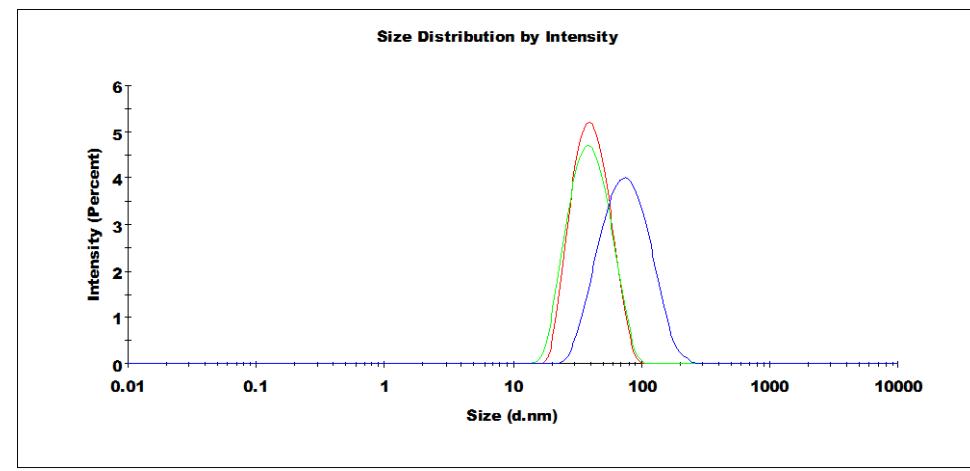

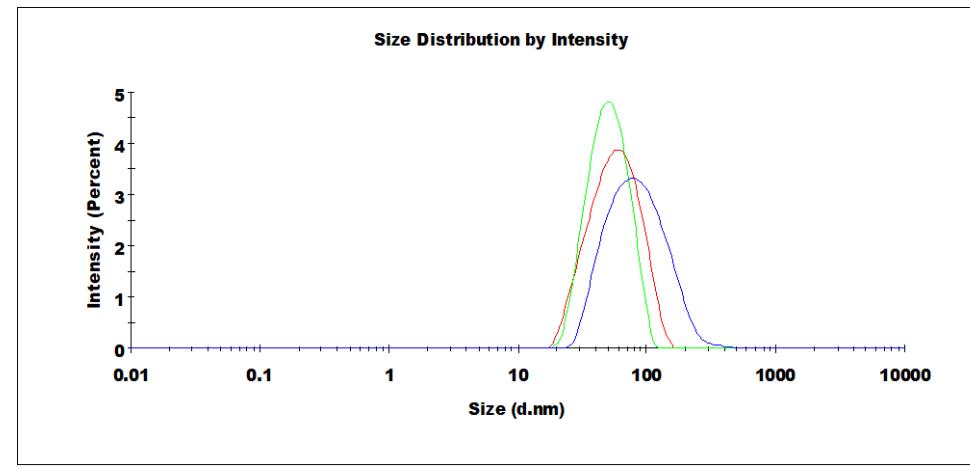

Figure S1. pH change with temperature for BSA solution in Tris buffer.

(A)

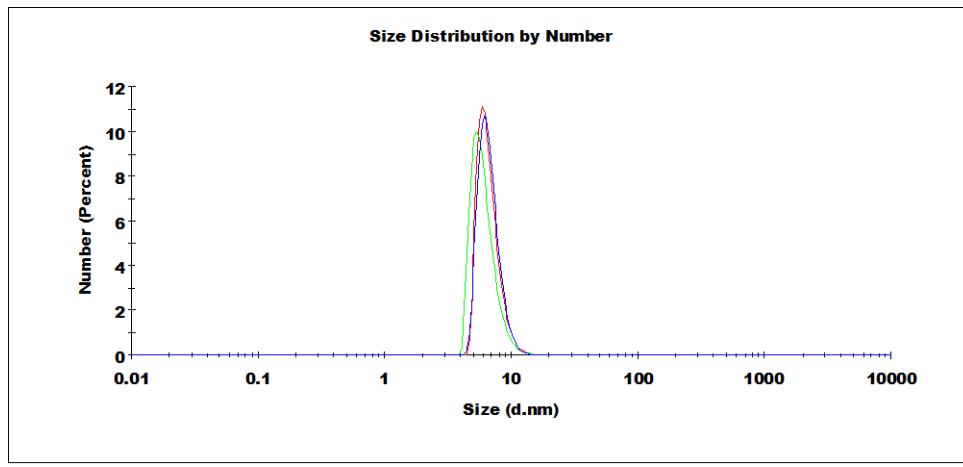

(B)

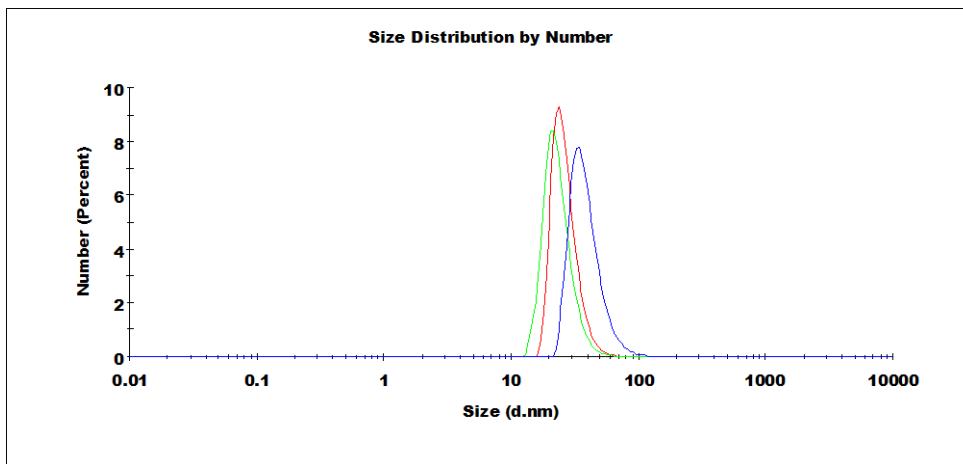

(C)

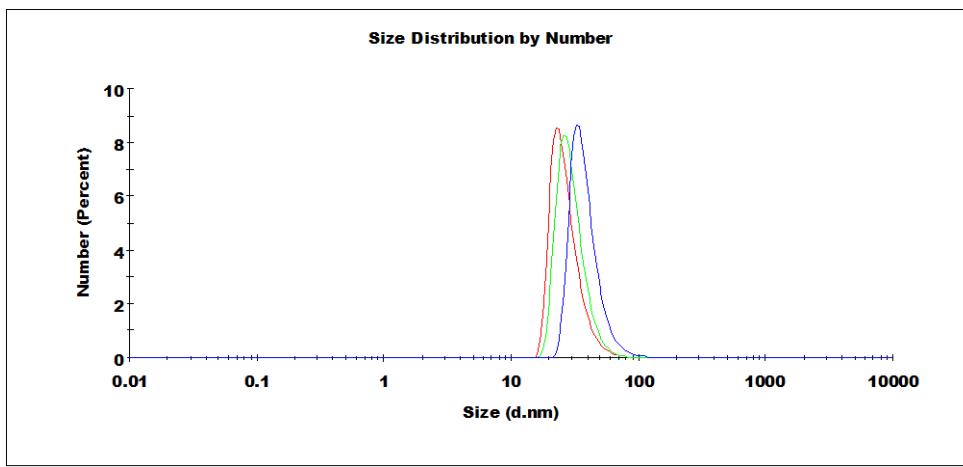

Figure S2. Size distribution by intensity for SA:BSA 0:1 (red line), SA:BSA 1:1 (green line), SA:BSA 10:1 (blue line) after (A) 24 hours at 277 K, (B) 20 hours at 338 K and (C) 48 hours at 338 K.

(A)

(B)

(C)

Figure S3. Size distribution by number for SA:BSA 0:1 (red line), SA:BSA 1:1 (green line), SA:BSA 10:1 (blue line) after (A) 24 hours at 277 K, (B) 20 hours at 338 K and (C) 48 hours at 338 K.

Table 1. The secondary structure content of protein in the absence and presence of SA evaluated using the K2D analysis algorithm from the Dichroweb website.

	system	helix	strand	random coil	NRMSD
24 h at 277 K	BSA	62	6	31	0.113
	SA:BSA 1:1	69	3	27	0.115
	SA:BSA 10:1	69	3	27	0.131
20 h at 338 K	BSA	55	10	35	0.145
	SA:BSA 1:1	58	8	34	0.156
	SA:BSA 10:1	58	8	34	0.155
48 h at 338 K	BSA	42	16	42	0.139
	SA:BSA 1:1	42	15	43	0.141
	SA:BSA 10:1	56	9	35	0.160
