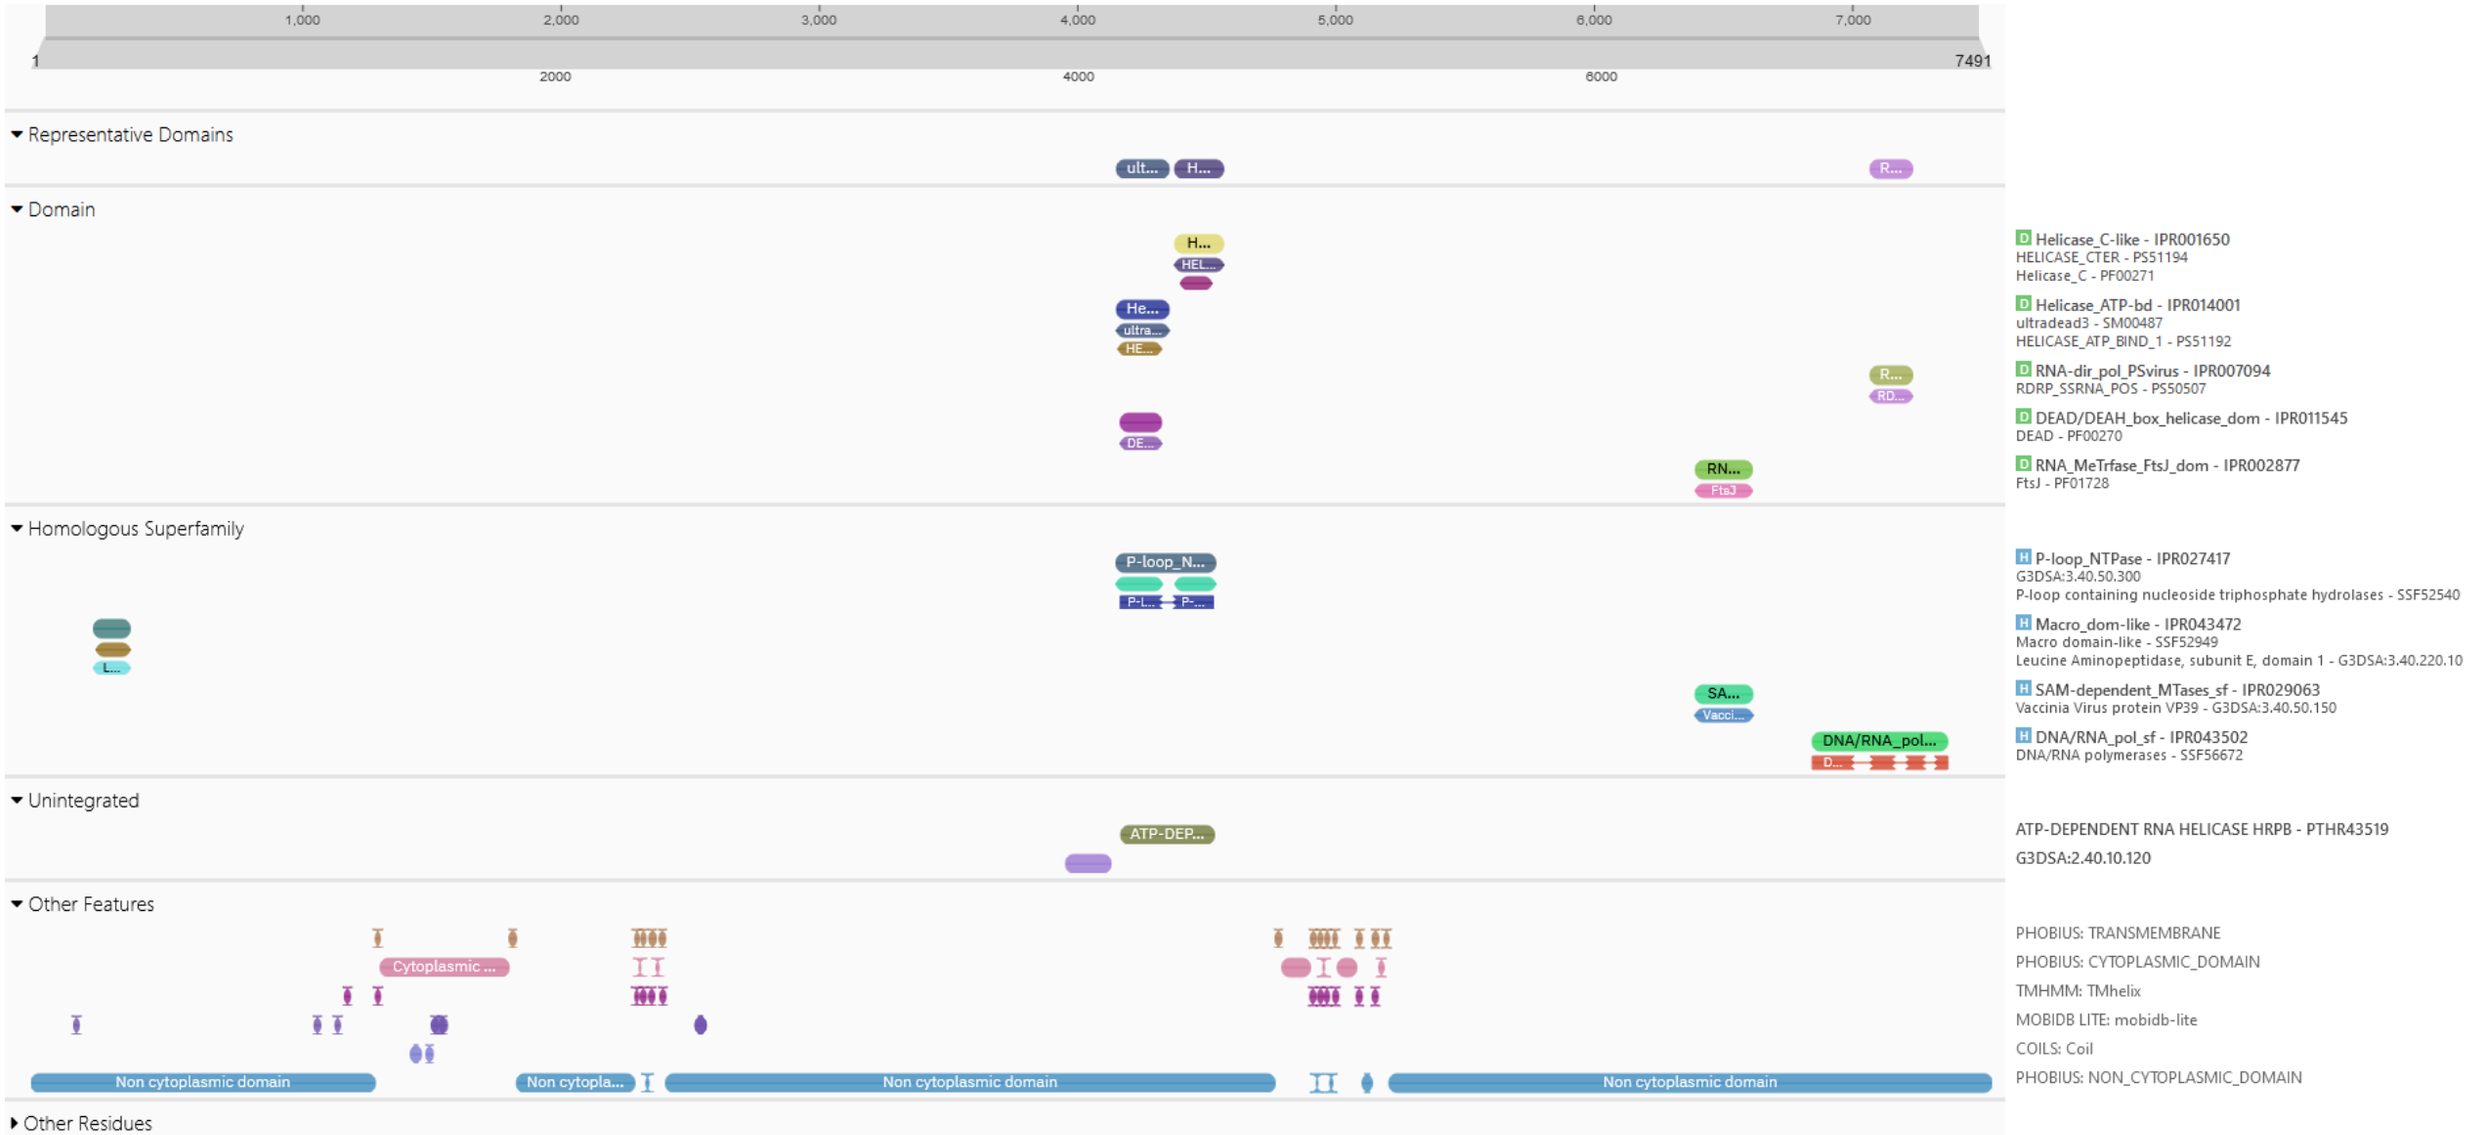

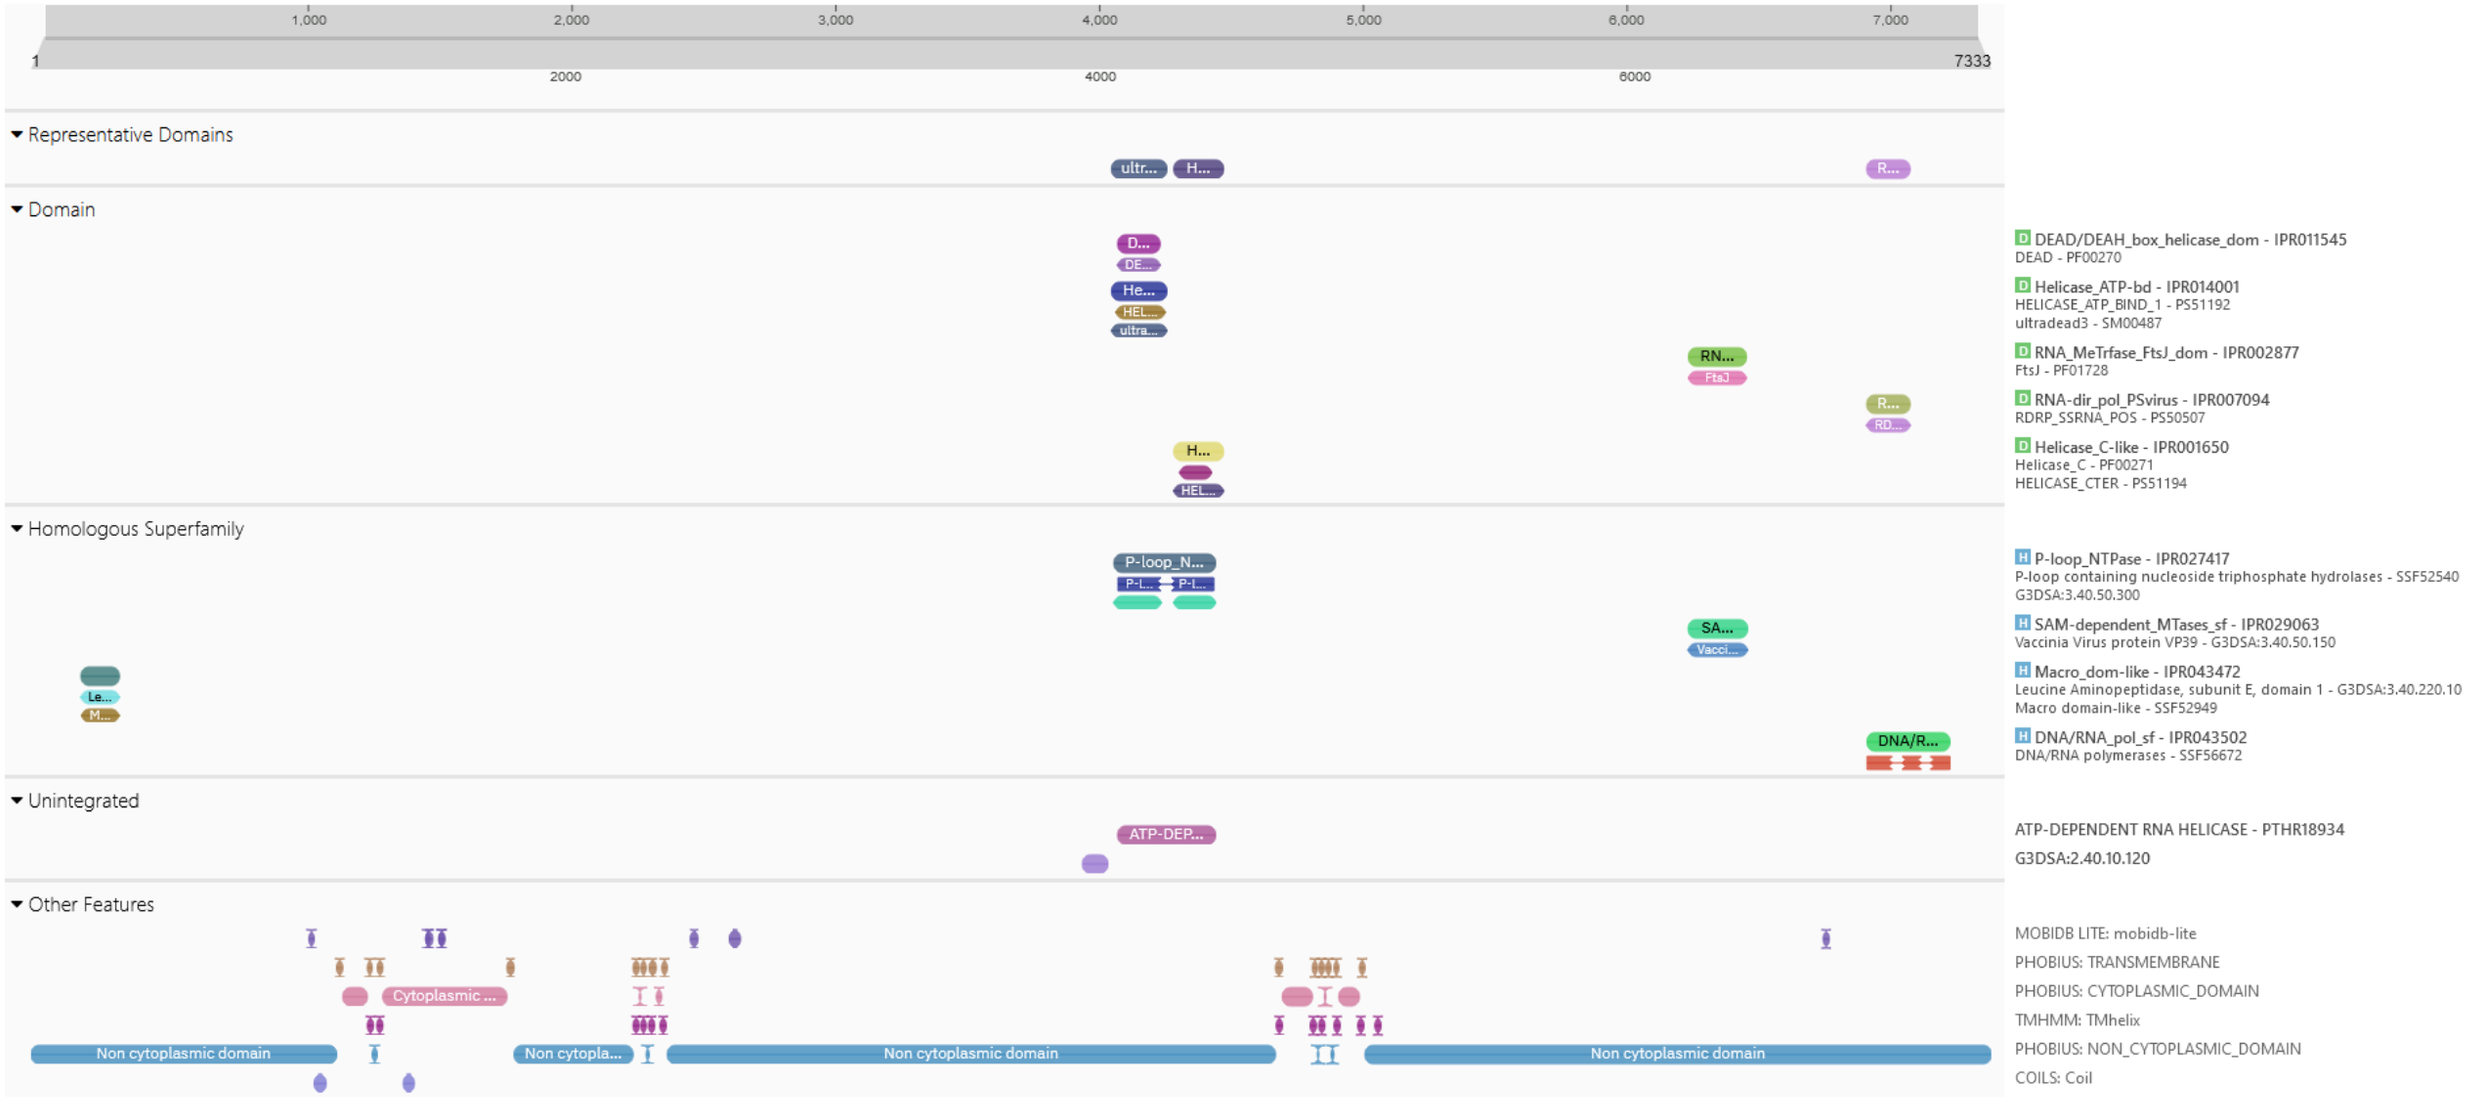

Figure S7. Functional domains/motifs and structural elements in the polyproteins encoded by Myzus persicae flavivirus (MpFV) (a), Macrosiphum euphorbiae virus 1 (MeV-1) (b) and Sitobion miscanthi flavi-like virus 1 (SnFLV-1) (c). Single large polyproteins encoded by MpFV, MeV-1 and SnFLV-1 were analyzed using InterPro at the Webserver https://www.ebi.ac.uk/interpro/ and the results are presented in panels A, B and C, respectively, as images exported from the Webserver.

(**a**) MpFV polyprotein

(**b**) MeV-1 polyprotein

(**c**) SnFLV-1 polyprotein
