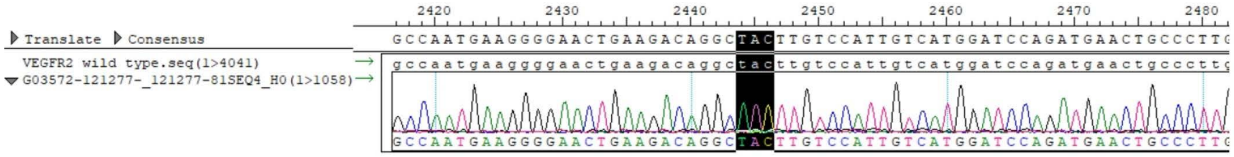
MATERIALS

Hydrogen Sulfide Exerted a Pro-Angiogenic Role by Promoting the Phosphorylation of VEGFR2 at Tyr797 and Ser799 Sites in Hypoxia–Reoxygenation Injury

Sen Zhang et al.

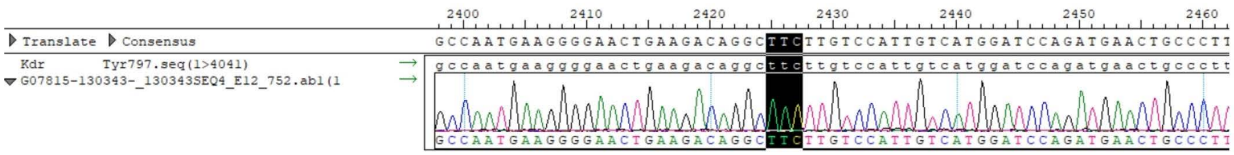
A

VEGFR2 ^{Y797}



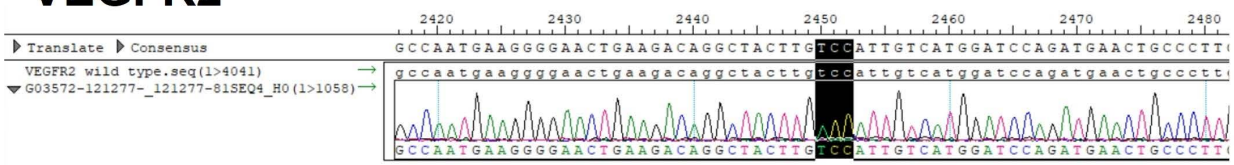
B

VEGFR2 ^{Y797F}



C

VEGFR2 ^{S799}



D

VEGFR2 ^{S799A}

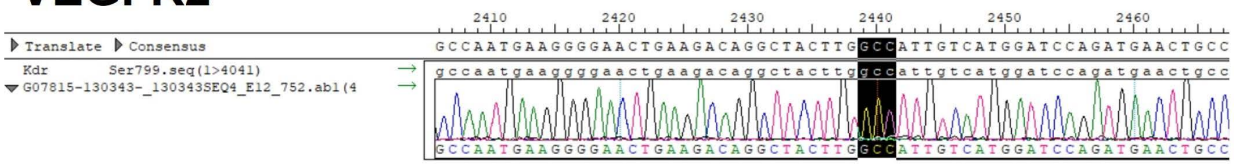


Figure S1: The plasmid sequencing results.

(A): The sequencing result of VEGFR2^{Y797}.

(B): The sequencing result of VEGFR2^{Y797F}.

(C): The sequencing result of VEGFR2^{S799}.

(D): The sequencing result of VEGFR2^{S799A}.
