

# Coexistence of two closely related cyprinid fishes (*Hemiculter bleekeri* and *Hemiculter leucisculus*) in the upper Yangtze River, China

**Table S1.** Comparison of the range of morphometric characteristics between *H. leucisculus* and *H. bleekeri* from reference “Fauna Sinica – Osteichthyes Cypriniformes II” and this study.

Source	Chen 1998 [44]			This study		
Morphological traits	<i>H. leucisculus</i>	<i>H. bleekeri</i>	Sampling location	<i>H. leucisculus</i>	<i>H. bleekeri</i>	Sampling location
BL/BD	3.4–4.9	3.4–4.9	<i>H. leucisculus</i> : Taiwan, Hainan, Guangxi, Yunnan,	3.91–5.41	4.47–5.89	
BL/HL	4.0–5.0	4.3–5.0	Fujian, Zhejiang, Zunyi, Sichuan, Hunan, Hubei,	4.38–4.96	4.60–5.76	
BL/CPL	6.2–8.3	6.5–8.0	Anhui, Gansu, Jilin, and Heilongjiang province, China	4.62–6.22	4.66–7.45	
HL/SnL	3.1–4.0	3.1–4.7		3.78–4.93	3.81–5.29	Mudong
HL/ED	3.6–5.5	3.7–4.8	<i>H. bleekeri</i> : Fujian, Sichuan, Hunan, Hubei, Liaoning,	3.06–4.08	3.04–3.67	
HL/IDE	2.9–4.1	2.8–3.5	and Heilongjiang province, China.	2.73–3.78	2.98–3.53	
CPL/CPD	1.2–1.8	1.1–1.5		1.83–2.62	1.55–2.51	

BL, Body length; BD, Body depth; HL, Head length; CPL, Caudal peduncle length; SnL, Snout length; ED, Eye diameter; IDE, Inter-distance of eyes; CPD, Caudal peduncle depth.

The number of samples of *H. leucisculus* used in “Fauna Sinica – Osteichthyes Cypriniformes II” was 114, the range of body length was 86 – 205 mm. They were collected from Taiwan, Hainan, Guangxi, Yunan, Fujian, Zhejiang, Zunyi, Sichuan, Hunan, Hubei, Anhui, Gansu, Jilin, and Heilongjiang province, China. The number of samples of *H. bleekeri* used in “Fauna Sinica – Osteichthyes Cypriniformes II” was 55, the range of the body length was 82 – 128 mm. They were collected from Fujian, Sichuan, Hunan, Hubei, Liaoning, and Heilongjiang province, China.

**Table S2.** Sampling location and sample information (body length, body weight, and their mean values) that used in stable isotope analysis, and the mean of all samples

Species	location	Body length (mm)	Body weight (g)	The value of $\delta^{13}\text{C}$	The value of $\delta^{15}\text{N}$
<i>H. leucisculus</i>	Mudong	181	54.2	-20.165	10.820
		119	22.3	-22.001	10.199
		128	24.7	-20.590	10.213
		121	18.7	-19.721	10.178
		138	31.5	-21.283	10.248
		95	10.9	-21.969	9.725
		121	22.5	-21.711	10.362
		115	18.6	-20.826	10.036
