Table S8. Summary of the dominant benthic invertebrates in the Snake River watershed and their functional feeding groups

Sites	Date			
	August 1980 & 1981 (McKnight & Feder, 1984)	May & October 1995 (W. H. Clements, unpublished data)	June-August 2006 (Yang, C. MS thesis)	July 2017 This study
Upper Snake	Abundant Stonefly: <i>Zapada haysii</i> (shredder-detritivore) Sparse Chironomids: <i>Diamesa latitarsis</i> , <i>Eukiefferiella</i> <i>Bavarica</i> (collectors-gatherers)	Not sampled	Abundant Stonefly: <i>Zapada haysii</i> , 90%, <i>Podomosta</i> sp.	Abundant Stonefly: <i>Zapada haysii</i>
Deer Creek	Abundant Mayflies: <i>Baetis</i> sp., <i>Cinygmulia</i> sp., <i>Epeorus grandis</i> , Stonefly of the family Chloroperlidae. (collectors-gatherers/scrapers)	Abundant Mayflies & caddisflies: <i>Baetis</i> sp., Epheemerellidae, Heptageniidae, Rhyacophilidae Sparse Stoneflies: <i>Zapada</i> sp., <i>Sweltza</i> sp., <i>Isoperla</i> sp. and <i>Paraleuctra</i> sp.	Abundant <i>Baetid mayflies</i> (60-90%) Sparse Stoneflies: <i>Zapada</i> sp., <i>Skwala</i> sp., <i>Hesperoperla</i> sp. and <i>Paraleuctra</i> sp.	Abundant <i>Baetid mayflies</i>
Lower Snake	Sparse Stonefly: <i>Zapada haysii</i>	Sparse Stonefly: <i>Zapada</i> sp. Chironomids and caddisflies	Sparse Stonefly: <i>Zapada haysii</i> , <i>Alloperla</i> sp.	Sparse Stonefly: <i>Zapada haysii</i>
Peru Creek	Not sampled	Sparse Chironomids and caddisflies	Not sampled	Sparse Stonefly: <i>Zapada haysii</i>

Table S9. Loadings of dissolved metal and REE concentrations in water samples on PC1 and PC2. Note that metals with any concentrations below the ICP-MS detection limits were not included in the PCA.

Table S11. Abundance histories for the America robin, dark-eyed junco, Lincoln's sparrow, and mountain chickadee. The values refer to the number of birds detected at each site during the specified visit. Values greater than 1 were changed to 1 for use in occupancy modeling. Shading indicates sites where no individuals were detected during any of the three visits (i.e. 000 detection history).

Table S12. Abundance histories for the ruby-crowned kinglet, white-crowned sparrow, Wilson's warbler, and yellow-rumped warbler. The values refer to the number of birds detected at each site during the specified visit. Values greater than 1 were changed to 1 for use in occupancy modeling. Shading indicates sites where no individuals were detected during any of the three visits (i.e. 000 detection history).

Table S13. Abundance histories for species that were not included in occupancy models: American crow, northern flicker, pine grosbeak, and Steller's jay. The values refer to the number of birds detected at each site during the specified visit. Shading indicates sites where no individuals were detected during any of the three visits (i.e. 000 detection history).

Table S14. Moran's I value and the corresponding p value for abundance histories of bird species.

Birds	Moran's I Value	P Value
American Robin	-0.00714	0.623416
Dark-eyed Junco	-0.0244	0.708896
Lincoln's Sparrow	-0.0556	0.051968
Mountain Chickadee	-0.00395	0.517419
