Supplementary Table S2. Program code for optimizing the value of external resister (Code B)

```

1  /* (Program Name: Short Antenna Network Unit/ ShAnNU-B): Code B for the study of the Metamaterial
2  Sensor under different external resistors. Readings will be taken for 5 seconds in Microsoft Excel. Take
3  average and plot graph */
4  const int META1 = A0;
5  int delay_time = 100; // in milliseconds
6  int next_interval = 10000; // time before program runs again (in milliseconds)
7  void setup() {
8      Serial.begin(9600);
9      Serial.println("CLEARDATA"); //clear excel sheet
10     Serial.println("LABEL,Time,Sensor Value"); //label for excel
11 }
12 void loop() {
13     for (int x = 1; x < 51; x = x + 1) {
14         Serial.print("DATA,TIME, ");
15         Serial.print(analogRead(META1));
16         Serial.print(",");
17         Serial.print("Reading ");
18         Serial.println(x);
19         delay(delay_time);
20     }
21     Serial.println("--- End ---");
22     delay(next_interval); }
```

Supplementary Table S3. Program code for real time monitoring when connected to computer (Code C)

```

1  /* (Program Name: Short Antenna Network Unit/ ShAnNU-C): Code C for real-time
2  monitoring of META */
3  const int FSR = A0;
4  int delay_time = 100;
5  void setup() {
6      Serial.begin(9600);
7      Serial.println("CLEARDATA"); // Clear Excel sheet
8      Serial.println("LABEL,Time,Sensor Value"); // Label for Excel
9  }
10 void loop() {
11     Serial.print("DATA,TIME, ");
12     Serial.println(analogRead(FSR));
13     delay(delay_time); }
```
