Abbreviations: C = control without misting; CM = control with misting; LS = low density smoke exposure; HS = high density smoke exposure without misting; HSM = high density smoke exposure with misting. Gu = guaiacol; Cr = cresol; Ph = phenol; Sy = syringol; 4MG = 4-methylguaiacol; MSy = 4-methylsyringol; MG = monoglucoside; GG = glucose-glucoside; PG = pentose-glucoside; R = rutinoside; SD= standard deviation; nd = not detected. Means followed by different letters are statistically significant based on Fisher's least significant difference (LSD) *post hoc* test ($\alpha=0.05$).
