

Supplementary information

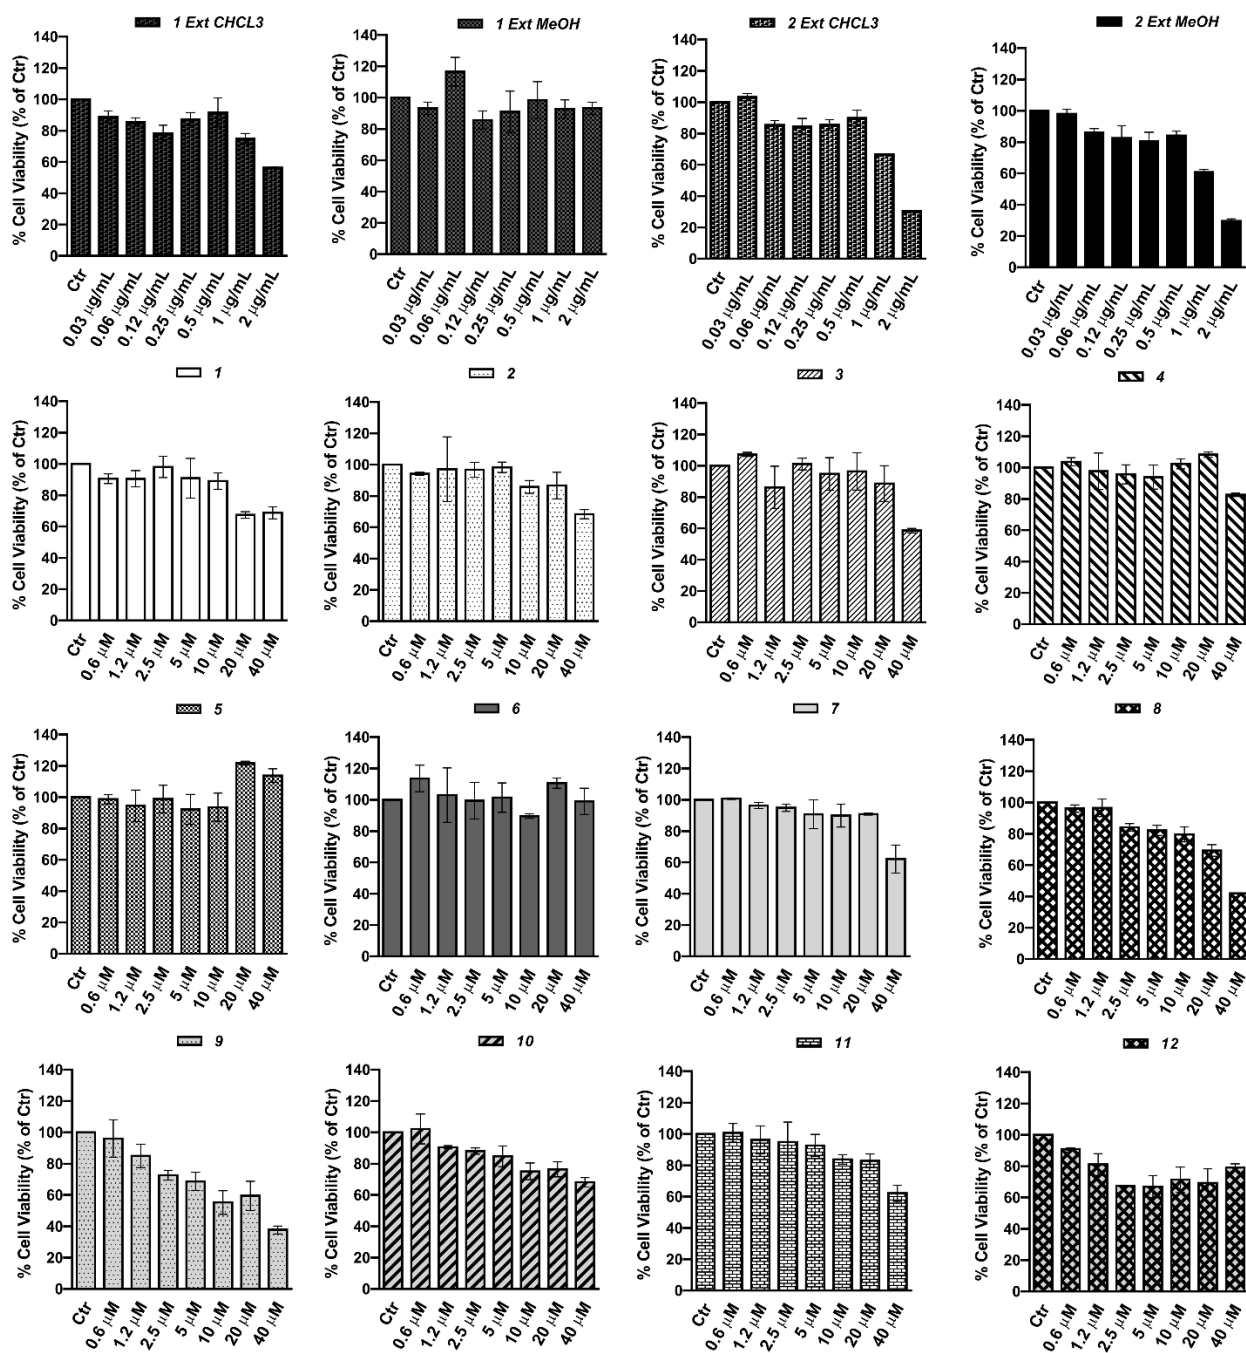

Figure S1. Evaluation of 1 Ext MeOH, 1 Ext CHCl₃, 2 Ext MeOH, 2 Ext MeOH, 1, 2, 3, 4, 5, 6, 7, 8, 9, 11, and 12 effects in HaCaT Cells. HaCaT cells were cultured for 48 h in the presence of the indicated concentrations (0-40 μ M) of individual substances or extracts (μ g/mL) before MTT assay. Results are expressed as means \pm SD of independent experiments performed in triplicate and reported as percentage *vs.* the untreated control).
