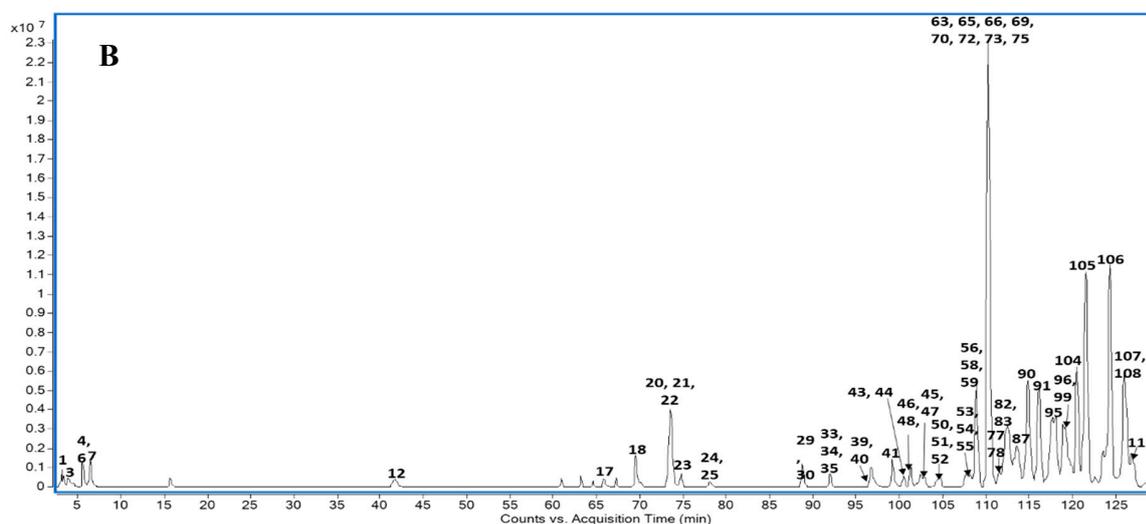

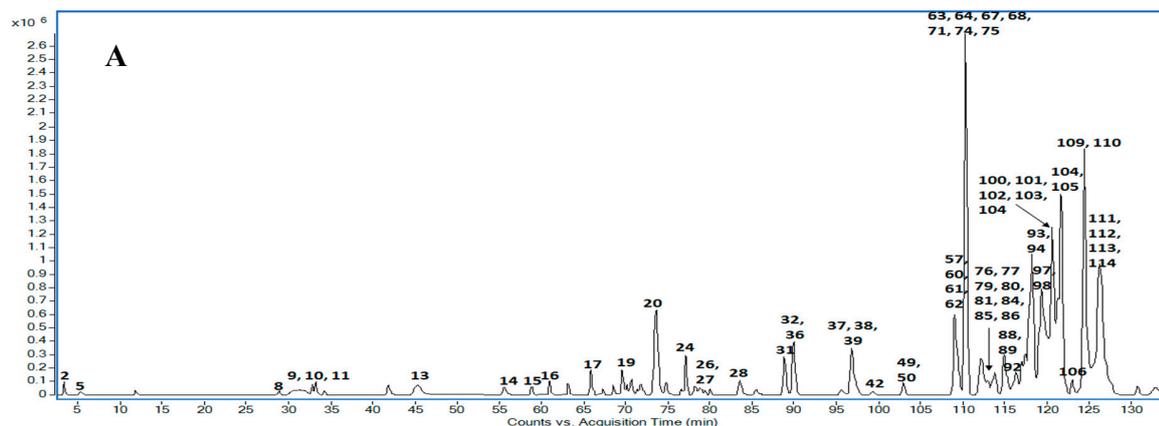

Figure S1. UPLC/MS chromatograms of identified constituents in the ethanolic extracts of *A. squamosa* (A) and *A. glabra* (B) fruits detected in positive ionization mode.

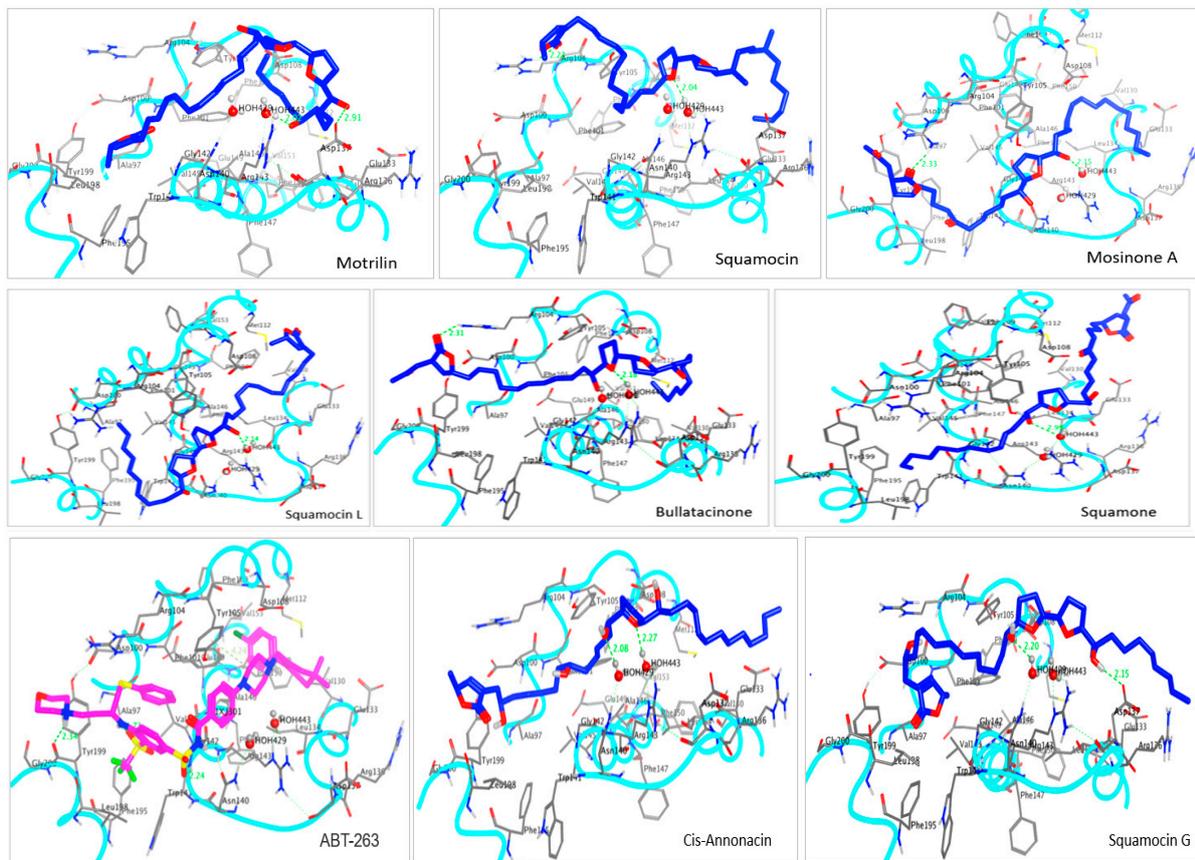

Figure S2. Visualization of interactions between the Bcl-2 receptor (4-LVT) and ABT-263, cis-annonacin, squamocin G, motrilin, squamocin, mosinone A, Squamocin L, bullatacinone, squamone, showed comparable or better binding energy and binding modes.

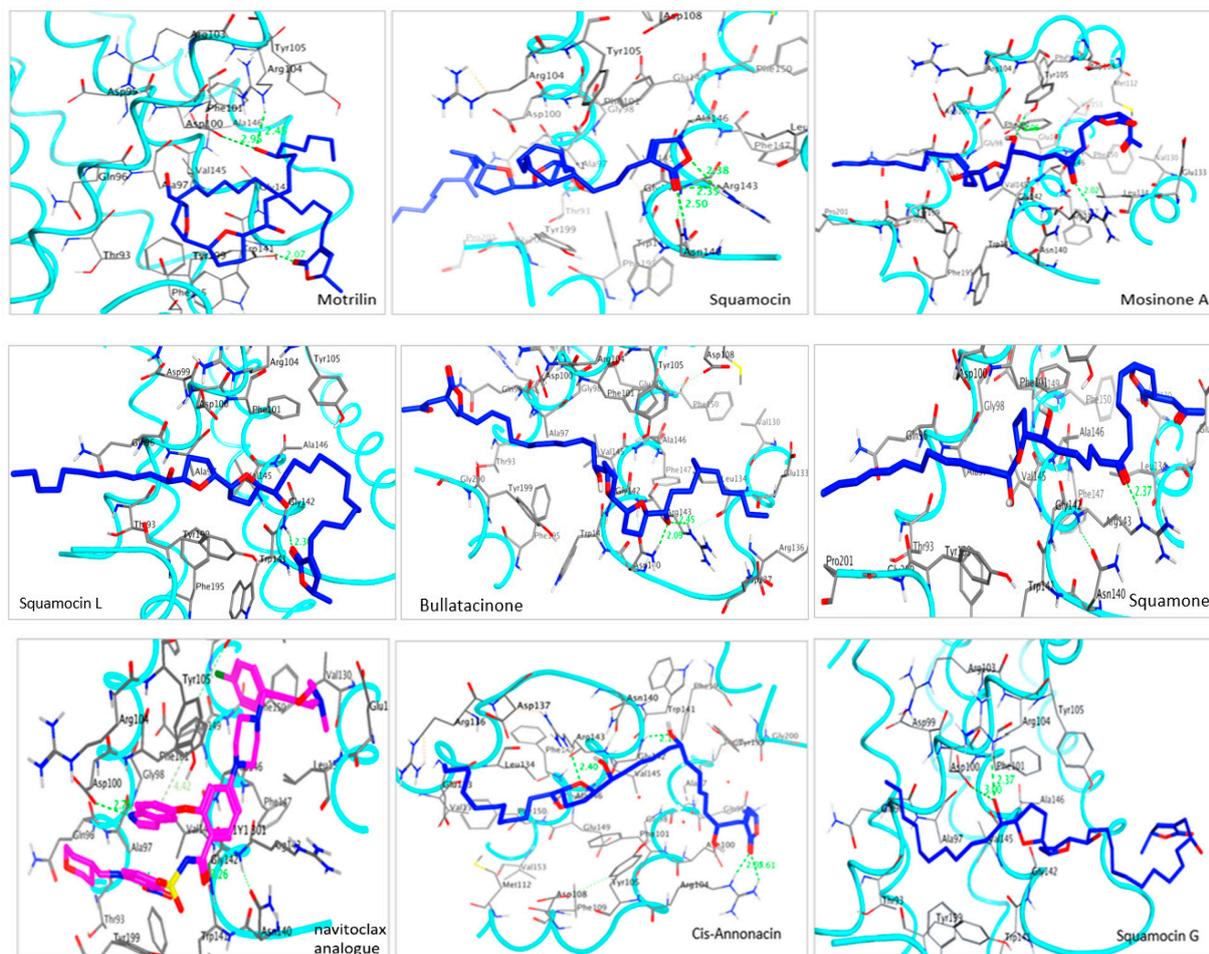

Figure S3. Visualization of interactions between the Bcl-2 receptor (4-MAN) and motrilin, squamocin, mosinone A, navitoclax analogue, cis-annonacin, squamocin G, squamocin L, bullatacinone, squamone, showed comparable or better binding energy and binding modes.

Table S1. Compounds identified in the extracts of *A. glabra* (AngTE) and *A. squamosa* (AnsTE) fruits, by UPLC-QTOF-MS/MS (positive mode).

Peak no.	R _T (min)	Indicated Molecular ion (m/z)		Error ppm	Elemental composition	Identification	MS/MS (m/z)	Source
